

Charan Kumar Rayaprolu

Richardson, Texas - 75080 | 469.353.4236 | charanrayaprolu6@gmail.com | [Linkedin](#)

EDUCATION

The University of Texas at Dallas (UTD)

Master of Science, Information Technology and Management

- Major GPA: 3.3/4.00
- Awards:** dean's excellence scholar, crow museum technical student worker || Specialized Courses: Business analytics with R, Oops with python, advance statistics, [big data](#), Supply Chain Analytics, Business Intelligence, Data Visualization, Product Management.

Richardson, TX

January 2024 – December 2025

Sri Venkateswara university

Bachelor of commerce, computer applications

- Major GPA: 3.6/4.00

Tirupati, India

September 2018 – December 2022

TECHNICAL SKILLS

- Programming Language:** Python, R, SQL, HTML, CSS.
- Data Analytics:** Python (Pandas, NumPy, Scikit-learn, TensorFlow, pytorch, matplotlib), R, SQL, Excel (Pivot Tables, VLOOKUP), Tableau, PowerBI
- Supply Chain & Business Operations Tools:** [salesforce](#), SAP, Oracle ERP, Inventory Management Systems, MS Project, Google Analytics.
- Project Management:** Agile, Scrum, JIRA, Trello, Asana.
- Web Development & Software Tools:** HTML, CSS, React.js, Git, Figma (UI/UX).
- Soft Skills:** Effective Communication, Data-Driven Problem Solving, Time Management & Organization, Research & [Data Analysis](#), Adaptability & Flexibility, Leadership & Team Collaboration, Product Strategy & Supply Chain Optimization.

WORK EXPERIENCE

BDM Innovative Solutions

Data analyst Intern

Tirupati, India

August 2023 – December 2023 •

- Designed and implemented SQL stored procedures to efficiently manage and process large volumes of data.
- Utilized ETL (Extract, Transform, Load) tools and data warehousing strategies for effective data retrieval and processing.
- Managed data migration from on-premises systems to the cloud using pipelines and explored azure cloud resources such as Azure Data Factory, Azure Databricks, and Azure Data Lake to support cloud-based data solutions.
- Extracted, cleaned, and analyzed large datasets to generate insights that improved operational efficiency.
- Created interactive Power BI dashboards to track key business performance metrics and enhance decision-making.
- Designed automated ETL pipelines to streamline data processing and reduce manual workload.
- Migrated on-premises databases to Azure Cloud, utilizing Azure Data Factory and Databricks for large-scale data management.

PROJECT EXPERIENCE

UniConnect – College Life Companion React, Node.js, Firebase, Git | Agile Methodology

The Revamped MASSTOR APP leverages AI-driven technologies. It is built using a cloud-based SaaS architecture, NLP, integrating machine learning models, react for frontend, and Node.js for backend to enhance usability and accessibility.

The B2B Health Sector Appointment Management System streamlines hospital scheduling, patient records, and secure billing while ensuring HIPAA compliance. It utilizes SQL for data management, Python/Java for backend processing, React.js for the frontend, and integrates authentication, analytics, and payment APIs for efficiency.

Blockchain and stock market analysis the project is about analyzing blockchain and stock market data using Hadoop, Apache Spark in a Jupyter Notebook environment. It involves processing large datasets stored in HDFS and MySQL, utilizing Spark Core (RDDs) for distributed computing and Spark SQL for structured queries to extract insights such as block counts, transaction volumes, stock prices, and trends.

The [impact of remote work on mental health](#) using R programming for decision tree modeling, logistic regression, and data visualization. It explores factors like stress, work hours, and satisfaction, using Excel for data preprocessing and metrics like accuracy and confusion matrix for models.

KEY COMPETENCIES

- Product Strategy & Road mapping:** Experience in setting product vision and defining roadmaps for technical and business teams.
- [Agile & Scrum Development:](#)** Familiar with Agile methodologies and contributing to team deliverables in fast-paced environments.
