

Charishma Singireddy

Data Engineer

Bridgeport, CT | +1 (469) 938 1980 | charishma@quickitmail.com | [LinkedIn](#)

SUMMARY

- Data Engineer with over 3 years of experience in designing and implementing scalable, high-performance data solutions.
- Expertise in Big Data technologies, including Hadoop, Spark, and Hive, for efficient large-scale data processing and analytics.
- Proficiency in developing and optimizing ETL pipelines using Apache NiFi and Talend, ensuring seamless data integration across multiple sources.
- Experienced in cloud platforms like AWS and Azure, leveraging cloud-based solutions for cost-effective and scalable data processing.
- Good knowledge of database management skills with SQL Server, PostgreSQL, and MySQL, ensuring efficient data storage, retrieval, and performance optimization.
- Hands-on experience with data science libraries like Pandas, Scikit-learn, and TensorFlow to support analytics and machine learning initiatives.
- Skilled in creating interactive dashboards and data visualizations using Tableau and Power BI, enhancing business intelligence and decision-making.
- Well-versed in Agile methodologies and the full software development life cycle, ensuring efficient project execution and continuous improvement.

SKILLS

Programming Language: Python, R, SQL, Scala

IDE's: PyCharm, Jupyter Notebook

Big Data Ecosystem: Hadoop, MapReduce, Hive, Apache Spark, Pig, Sqoop, Pyspark, Snowflake, HDFS

ETL Tools: SSIS, Apache NiFi, Apache Kafka, Talend, Apache Airflow, Informatica

Databases: MySQL, SQL Server, PostgreSQL, Oracle

Cloud Technologies: AWS, Azure, GCP, DataBricks

Reporting Tools: Tableau, Power BI, SSRS

Packages: NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, Seaborn, TensorFlow

Version Control Tools: Git, GitHub, GitLab

Methodologies: SDLC, Agile, Waterfall

Operating Systems: Windows, Linux, Mac

Other Skills: Data Cleaning, Data Wrangling, Critical Thinking, Communication Skills, Presentation Skills, Problem-Solving, Data Management

EXPERIENCE

State Street, USA | Data Engineer

Jan 2024 - Present

- Designed and developed high-performance data pipelines using Python, Apache Spark, and Hive, enabling faster data processing and improving overall system efficiency.
- Created ETL workflows using Apache Airflow, Talend, and Informatica, ensuring seamless data integration from multiple sources.
- Conducted in-depth data analysis using Python, Seaborn, and Matplotlib to identify patterns, trends, and anomalies.
- Developed and deployed scalable AWS cloud solutions for data storage and processing, leveraging services like S3, RDS, and Lambda.
- Designed and built interactive Tableau dashboards that provided real-time analytics and visual insights for stakeholders.
- Processed and analyzed massive datasets exceeding 10TB using PySpark and Hadoop, improving data analytics efficiency by 30%.
- Engineered ETL workflows using SSIS, Apache NiFi, and Talend to streamline data processing and reduce execution time.
- Implemented distributed storage solutions with HDFS, ensuring scalability and reliability for handling large volumes of structured and unstructured data.
- Optimized Oracle database performance by refining indexing strategies and query execution plans.

Groovy Web, India | Data Engineer

Jul 2019 - Jul 2021

- Controlled the implementation of Agile methodologies in data engineering projects, promoting cross-functional collaboration, iterative development, and continuous improvement.
- Designed and fine-tuned spread data processing solutions using Apache Spark and Hive, enabling high-speed data transformation.
- Industrialized and orchestrated end-to-end ETL workflows with Apache Airflow and Talend, ensuring efficient data ingestion, transformation, and loading.
- Spearheaded the migration of on-premises data infrastructure to Azure, optimizing cloud resource utilization and ensuring enhanced scalability and reliability.
- Built and deployed interactive real-time dashboards and analytical reports in Power BI, enabling data-driven decision-making.
- Optimized ETL pipelines using SSIS and Informatica, reducing data processing times and ensuring smooth data flow across various platforms.
- Designed scalable and efficient data workflows using Hive, Sqoop, and Apache Airflow, streamlining data extraction and processing.
- Developed high-performance data pipelines with Hadoop, Hive, and Kafka, optimizing real-time and batch data processing.
- Improved database performance by optimizing SQL queries and indexing strategies in PostgreSQL and MongoDB.

EDUCATION

Masters in Science in Computer Science

University of Bridgeport

Dec 2023

Bridgeport, CT
