

Charit Kumar B

Java Full Stack Developer

San Jose, United States, 95118, +1 6892162892, charitboreddy21@gmail.com

Professional summary

Around 6+ years of IT experience as Senior Java/JavaScript Full Stack Developer with expertise in Java/J2EE Development, UI and Back end technologies including Java 11/8, Spring Framework, Kotlin, Spring REST APIs, Spring Boot, JavaScript/JQuery, React, Angular, and various modern web technologies.

Employment history

Sr. Java Full Stack Developer, Feb 2024 - Present

Voya Financial, Hartford, CT

Developed business logic with Node.js, Java core, collections, and java 11 lambda expressions, streamers Local Date objects and Lead the team.

- Used Splunk logging for tracking, application monitoring, and for security and compliance.
- Used Version One and Confluence for documentation, planning, tracking work, and reporting across teams.
- Troubleshoot and isolate the root cause of such problems by Mining performance data from AppDynamics and viewing it in Splunk using the AppDynamics Controller REST API.
- Responsibilities include estimation and development of new modules using the AGILE process and pair programming using the divide and conquer method of breaking down a chunk of requirements into piecemeal stories and breaking each major release into iterations.
- Experience in Pair programming and managing the data flow in risk management applications utilizing tech stacks such as Angular 12 and Material design components.
- Upgraded several applications in Angular 12 latest version to improve the performance and resolve peer dependencies in Node packages when performing the upgrade.
- Extensively used @Ng Module to import different modules, to declare different components, to describe the providers and services that are used to develop the Angular 8 application.
- Developed UI Components using Angular 8 with TypeScript as a scripting language.
- Created inbound and outbound API projects and set up base projects for middle-ware services as part of the migration plan from Mule to Spring Boot.
- Developed Single Page Application (SPA) with Angular 8 controllers, directives, factories, services, routing, and DOM manipulation using JavaScript, JQuery, and Angular 8.
- Designing and developing Restful API and services using best practices to interact within the micro services and with the front end. Using spring MVC and spring rest.

Java Full Stack Developer, Feb 2023 - Jan 2024

CVS Health, Hartford

Involved in Analysis, Design, Development of an application using AGILE Methodology.

- Designed the back-end applications using Spring boot to handle the user requests and used JPA repository to make data base calls and execute the necessary SQL queries.
- Developed rest services using spring boot.
- Exposed Rest service for payment Type Derivation using microservices with spring boot.
- Developed DAO / Repository components using spring JPA.
- Implemented the design patterns such as singleton, service locator and factory pattern etc.
- Worked on Swagger API and auto-generated documentation for all REST calls.
- Implemented Restful API in JAVA on Micro-services Architecture using Spring Boot.
- Implemented JMS using the Spring JMS module to communicate with Apache Active MQ queues.
- Involved in maintaining and updating the procedure for ETL process.
- Invoked ETL process with the help of Spring Batch
- Configured the Spring Batch for handling large file processing (detecting fraudulent transactions in transaction log)
- Involved in Code reviews for production fixes following best practices.
- Created JSON request and validated the response using postman Interceptor and Swagger UI.
- Monitoring services and performance in OpenShift Container, Kubernetes and logs in Kibana.
- Used STS IDE to develop the Web Application and deployed on WebLogic application server.
- Setup the Continuous Integration (CI) & Continuous Deployment (CD) for the application using Jenkins.
- Worked on Jenkins for continuous integration with Gradle and GitHub.
- Used Log4j for logging errors and publishing logging information to various destinations.

- Added the log statements to monitor logs using logging libraries (Ex:log4j, slf4j) for better debugging/ analyzing of Application.
- Loading and managing code versions using GIT repository
- Used Git Bash control to push the code to higher environments.
- Active participation during Sprint planning and worked on assigned Jira tickets.

Java Developer, Dec 2021 - Nov 2022

Sanofi, Chennai, India

Involved in Requirements gathering, Analysis, Design, Development and Testing of application using AGILE methodology (SCRUM) in a test-driven development (TDD) approach.

- Exposed Rest service for payment Type Derivation using microservices with spring boot.
- Identifying the deprecated API to the existing application and analyze their corresponding replacement for the targeted environment
- Developed multiple enterprise applications using Spring Boot, Hibernate framework, Spring IOC, Spring MVC, Spring JDBC, Spring Annotations, Spring AOP, Spring Integration, frameworks, RESTful webservice.
- Developed and designed the web interface using HTML5, CSS3, JavaScript, jQuery, Angular 2 and Bootstrap.
- Designed, Developed application components using spring framework.
- Design data base models in PostgreSQL, designed entity relations and executed required scenarios using queries.
- Used JQuery to manipulate and event handling, xml scripts to display repository content in front end.
- Used various jQuery and Bootstrap plug-in like date picker, Bootstrap selectors.
- Worked on Swagger API and auto-generated documentation for all REST calls.
- Involved in maintaining and updating the procedure for ETL process.
- Responsible for creating efficient design and developing User Interaction screens using HTML, CSS3, Bootstrap, JavaScript, Angular8 and Node JS.
- Develop an application to interact with MongoDB database using JDBC to retrieve the clustered data.
- Changing the AWS infrastructure Elastic Beanstalk to Docker with Kubernetes.
- Deploy the application on Amazon Web services (AWS).
- Use Amazon CloudWatch to monitor AWS resources & Amazon CloudWatch Logs to collect and store logs from AWS services.
- Experienced in writing real-time processing and core jobs using Spark Streaming with Kafka as a data pipe-line system.
- Implemented spring boot microservices to process the messages into the Kafka cluster setup.
- Developed Mockito and JUnit test cases to improve code coverage.
- Created JSON request and validated the response using postman Interceptor and Swagger UI.
- Setup CI/CD pipeline process for the application using the Jenkins.
- Apache Maven tool has been used for the build and deployment of the application.
- Added the log statements to monitor logs using logging libraries (Ex:log4j, slf4j) for better debugging/ analyzing of Application.

Software Engineer, Jun 2020 - Nov 2021

Deutsche Bank, Bangalore, India

Used Agile Development methodology of software development from Analysis through Design, Development, Integration, and testing phases.

- Used Java/J2EE technologies such as Spring, Hibernate, EJB, JSP, JSF, Struts framework.
- Developed the application using JSF for front end, Spring to manage business layer components.
- Developed in Eclipse environment using Struts based MVC framework.
- Created JSPs using JSTL and Struts tag libraries.
- Involved in developing JavaScript, jQuery, HTML and CSS sheets for UI.
- User Input Validation was done using the JavaScript and Action Form.
- Designed JSON responses according to the request, send it back to the front end after the logic.
- Performed SQL, HQL queries using Oracle Database.
- Wrote PL/SQL stored procedures, Prepared statement and used API.
- Involved in writing and executing stored procedures, functions, and triggers for Oracle to create a Database Management System.
- Worked with high volume and complex PL/SQL stored procedures and packages using TOAD.
- Used Session Beans for business logic and Entity Beans for database persistence.
- Involved in Developing, Testing and Deploying application in JBoss Application Server.
- Performed Validations on UI data using JSF validations and JavaScript.
- Performed unit testing and to maintain the unit test case using Junit framework.
- Performed Integration testing support and involved in bug fixing.

- Resolved the issues assigned in JIRA tracking on and before time.

Education

Masters in Computer Science

Florida Institute of Technology, Florida, US

Courses

Computer Science

Florida Institute of Technology

Skills

Java, JavaScript, Spring Boot, React, Angular, Node.js, TypeScript, HTML5, CSS3, AWS, Docker, Kubernetes, REST API, Microservices, Git, Jenkins, MongoDB, PostgreSQL, MySQL, Hibernate, Maven, JUnit, Agile, DevOps.
