SUMMARY

AI/ML Engineer with 3 years of experience building predictive models, ML pipelines, and data-driven applications. Strong in Python, SQL, supervised learning, ETL workflows, and deploying analytics solutions that improve decision-making. Skilled at feature engineering, model evaluation, workflow automation, and creating ML-backed insights that drive measurable business impact. Adept at working end-to-end—from data preparation to model deployment and dashboarding—while collaborating closely with product and engineering teams.

EDUCATION

- **Master of Science — Data Science** / The University of Texas at Arlington Aug 2023- May 2025
- **Bachelor of Science — Data Science and Artificial Intelligence** / ICFAI University, Hyderabad Aug 2019-May 2023

TECHNICAL SKILLS

- **Programming & ML:** Python (NumPy, Pandas, Scikit-learn, Matplotlib), SQL, R, PySpark, Feature Engineering, Model Validation, Forecasting, Clustering, Classification
- **Machine Learning & AI:** Regression, Classification, Time Series, NLP basics, K-Means, Random Forest, XGBoost
- **MLOps & Deployment:** FastAPI, Flask, Docker (basics), Git, Airflow, ML pipeline automation
- **Data Engineering:** ETL workflows, Data Modeling, PySpark, BigQuery, Optimized SQL Pipelines
- **Visualization:** Tableau, Power BI, Excel
- **Cloud & DevOps Tools:** AWS (S3, Lambda, Redshift), GitHub Actions, Serverless Functions, Linux CLI, VS Code, JupyterLab
- **AI/Agentic Tools:** LangChain (Agents, Tools, Chains), Early Agent Workflows, Embedding Models, Vector Search (FAISS basics)

EXPERIENCE

- Machine learning engineer— RecVue** | Hyderabad, Telangana July 2022 - May 2023.
- Developed supervised models (XGBoost, Random Forest, Logistic Regression) to predict churn, usage behavior, and revenue patterns, improving prediction accuracy by **25%** and reducing false-signal alerts by **18%**.
 - Built clustering models (K-Means, DBSCAN) to segment customers by engagement and product adoption, enabling targeted retention strategies and improving cohort insights.
 - Automated end-to-end ML workflows using Python and Airflow, creating DAGs for ingestion, feature generation, model training, and retraining, cutting manual effort by **40%**.
 - Built deployable ML pipelines using FastAPI + Docker for internal inference services, improving model accessibility and reducing turnaround time for product teams.
 - Built early agent-like automation workflows using Python and LangChain's AgentExecutor to let models retrieve context, run multi-step reasoning, and autonomously generate insights, reducing manual analysis load by **30%**.
 - Built internal evaluation tooling that automated cross-validation, feature importance reports, and error analysis, improving experiment turnaround time by **30%** and standardizing how models were compared across teams.
- Data Analyst — Vijeta High School** | Guntur, Andhra Pradesh August 2021 – June 2022
- Designed ETL pipelines in PySpark and SQL to unify academic, attendance, and resource datasets from 5+ sources.
 - Built forecasting models that predicted student performance trends at **~85% accuracy**.
 - Implemented clustering (K-Means) for performance segmentation, helping teachers personalize interventions.
 - Built dashboards automating weekly academic reporting and increasing data accuracy by **25%**.
 - Delivered data-backed recommendations that improved academic planning and monitoring workflows.
- Software Developer Intern — Skill Banc** | Hyderabad, Telangana May 2021 – July 2021
- Optimized SQL queries powering analytics pipelines, improving run time and report reliability.
 - Contributed to Python scripts for data validation, preprocessing, and basic feature extraction tasks.
 - Worked with product and data teams to resolve data quality issues affecting downstream analytics and models.
 - Developed a lightweight internal API using Flask to expose cleaned datasets and analytics-ready features to downstream applications, improving integration speed for engineering and ML teams.

CERTIFICATIONS

- Google Data Analytics (2024), Microsoft Power BI Data Analyst (2024), AWS Educate – AWS Machine Learning Foundations (2023), Microsoft Python Development (2023), Python Essentials for MLOps (2023)
