## EDUCATION

### University of Central Florida

Master of Science in Computer Science | GPA: 3.85

Orlando, Florida

Aug 2023 - May 2025

**Relevant Coursework:** Design and analysis of algorithms, Machine learning, Computer Vision, Current topics in ML, Machine learning with biomedical data, Malware and software vulnerability.

### K. L university

Bachelor of Technology in Computer Science | GPA: 3.68

Guntur, India

June 2016 - July 2020

## TECHNICAL SKILLS

**Programming Languages** - Python, HTML, CSS, C, JavaScript

**Libraries / Frameworks:** REST API, Django, NumPy, Pandas, Matplotlib, PyTest, Unittest, Postman, Junit, Postman, Bootstrap, React

**Databases** - MySQL, PostgreSQL, MongoDB.

**Data Visualization and Statistical Tools** - Tableau, Power BI, Matplotlib, Plotly, Seaborn, Excel, Microsoft Office

**Tools & Tech:** Outsystems, Git, Power BI (DAX, Power Query, Data Modeling), AWS (IAM, EC2, S3, RDS, Lambda, CloudWatch), Docker, Linux

## WORK EXPERIENCE

### TECH MAHINDRA Pvt Ltd

Hyderabad, India

Python Developer | CLIENT: British Telecom

May 2022- May 2023

- Developed full-stack web modules using **Django** views, Django templates, and Bootstrap, powering interactive admin dashboards accessed by 200+ users.
- Developed Django-based CMS for internal data portals and billing dashboards.
- Integrated third-party APIs via REST for live data feeds and automations.
- Integrated 12+ REST APIs with 99.9% uptime using Django **REST** Framework.
- Worked with analysts and business teams to understand requirements and design technical tools that improved decision-making
- Troubleshoot and debugged code issues, improving reliability and reducing data pipeline errors by 30%
- Documented automation processes and backend logic for future enhancements and audit readiness.
- Implemented reusable frontend logic and form validation, improving UX and reducing bounce rates by 20%.
- Troubleshoot and debugged code issues, improving reliability and reducing data pipeline errors by 30%

Automation & Backend Developer | CLIENT: Parker Hannifin Corporation

Aug 2020-May 2022

- Designed and implemented backend tools using Python and SQL to support data integration across warehousing, purchasing, and order tracking systems
- Created and scheduled Python scripts to extract data from APIs, transform it, and load it into internal dashboards.
- Developed self-service reports and automation tools that cut down reporting time by 50%
- Wrote and maintained **ETL routines** handling structured and semi-structured data from internal sources
- Collaborated with compliance and QA teams to ensure that all data pipelines followed data security and governance standards.
- Documented backend service endpoints and contributed to API schema standardization.
- Managed script versioning and deployment using **Git** version control and CI/CD workflows
- Utilized Python and SQL to streamline data creation and automate backend validation checks for supply chain and inventory management applications, ensuring accurate data flow across parker purchasing, warehousing, and order tracking modules.
- Logged and resolved 30+ production issues via **JIRA** contributing to on-time deployments in Software Development Life Cycle, Agile methodology.

## PROJECTS

ReliefTrack: A Donation & Inventory Tracker | Digital aid Seattle

July 2025

- Designed and built a full-stack logistics system using **Django**, Django **REST Framework**, and Django **ORM**, enabling shelter staff to record donations, track distributions, and monitor inventory through both intuitive web forms and structured API endpoints.
- Developed dynamic reporting features and a **Bootstrap**-powered UI, replacing admin workflows with user-friendly pages for donor entry, inventory visualization, and distribution tracking optimized for real-world usability and future scalability.

Cloud-Based Sales Data ETL Pipeline

- Built a serverless ETL pipeline using AWS Lambda to extract and transform JSON data from S3.
- Loaded processed data into AWS RDS (PostgreSQL) for analytics and reporting use cases.

## CERTIFICATION

- Google IT Automation with Python by Google [Credential ID: [CG515O2YENMN](#)]
- Generative AI with Large Language Models by Coursera [Credential ID: [H7TG0E0DBAC4](#)]
- Meta Backend developer Professional certificate [Credential ID: [XH4QH72E8WYW](#)]

**Bravo Award:** Received '**BRAVO**' Award of excellence, Tech Mahindra Pvt Ltd, for demonstrating the core values of rise and driven positive change at work.
