EDUCATION

B.S. in Computer Science, University of Illinois at Chicago Expected 2024

- **Relevant Coursework:** Data Structures, Machine Learning, Software Design, Network Security, Software Eng.

SKILLS

Programming Languages: C++ (3+ years), Python (3+ years), C (3+ years), Java (3+ years), SQL (2+ years)
Technical Skills: Cloud Computing, Machine Learning, App Development, Microsoft Office, Software Engineering, Network Security

EXPERIENCE

Data Quality Intern - Northern Trust May 2022 - June 2022
Break Through Tech - BTT Chicago, IL

- Work collaboratively with Data and IT teams to implement a Data Quality framework.
- Used SQL and other data transformation tools as well as languages such as Python and R, develop automated processes for checking quality of data at rest in Snowflake or other databases.
- Generate Data Quality dashboards to show data quality issues.
- Iteratively refine user requirements based on the results of the data quality checks.

Portal Development Intern - Northern Trust June 2022 - August 2022
Chicago, IL

- Build and manage an intranet portal to organize and publish data technology artifacts and training materials.
- Contributed to shared codebase used in software deployment on multiple machines.
- Worked collaboratively with data office team to develop and publish data management and governance artifacts.
- Automated capturing and publishing of data governance metrics on the portal.

Teaching Assistant - Program & Design May 2021 - July 2021
University of Illinois at Chicago Chicago, IL

- Led in-class exercises, project time, and lecture discussions.
- Taught small groups of students focused on specific parts of coursework.
- Collaborated with leader on curriculum content and instruction.
- Identified negative trends such as groups of students missing key concepts and worked with professors to resolve concerns.

PROJECTS

WCSZ - Summer 2023

- A platform designed to empower women in the field of computer science by connecting them with tailored opportunities.
- The platform enables women to showcase their accomplishments and gain recognition for their contributions.
- A secure platform for women to exhibit their work and engage with like-minded individuals within the same field of study.

Personality Test — Data Structures (C++)

- Allows users to participate in a questionnaire that returns personality type based on the selected category.
- Utilizes maps and sets to formulate the closest match from OCEAN score.
- The app includes a menu, allowing the user to communicate with the program.

Restaurant Waitlist System — (C)

- By gathering information on the waiting status at a restaurant, seated based on an accumulation of factors such as priority, arrival time, and disruption.
- Implements queue, stack, and arrays.
- Allows users to make adjustments based on additional restaurant activity
