EDUCATION

George Washington University, Washington, DC.

May 2025

- MS, Data Science; GPA: 4.0

Vellore Institute of Technology, Amaravathi, India

May 2023

- B.Tech, Computer Science with Specialization in Data Analysis

TECHNICAL SKILLS

Languages: Python, R, SQL, Bash, Java, HTML, CSS

Tools and Environment: Jupyter Notebook, Google Colab, RStudio, Tableau, Power BI, Apache Spark, Git, GitHub

Libraries: scikit-learn, TensorFlow, PyTorch, XGBoost, Statsmodels, Prophet, NLTK, NumPy, Pandas, SciPy

Databases: PostgreSQL, MySQL, MongoDB, Snowflake, AWS (S3, RDS)

Cloud Technologies: AWS (SageMaker, Glue, Lambda, QuickSight), Google Cloud Platform

Certifications: AWS Certified Data Engineer Associate, Oracle Cloud Infrastructure 2025 Certified Data Science Professional

PROFESSIONAL EXPERIENCE

Data Scientist, Cybecys, Inc – Fairfax, VA

July 2025 – Present

- Implemented LLM-based NLP pipelines for Generative AI summarization to address employee queries on salary and agreements, generating concise escalation notes that accelerated problem resolution.
- Engineered pipelines from AWS S3 to Snowflake, standardizing documents to accelerate NLP model training and analysis.

Data Scientist, ZettaMine Labs Pvt Ltd. – Hyderabad, India

May 2024 – August 2024

- Coordinated a 2-member team to apply NLP-based sentiment analysis on patient surveys and app reviews, identifying negative feedback and dissatisfaction patterns for deeper analysis.
- Developed and produced a time series forecasting model with 92% accuracy to predict daily bed occupancy across hospital departments, enabling better resource allocation and workforce planning.
- Gathered 3M+ multi-source clinical records into a unified system, enabling insurance claim validation and patient clustering for predictive healthcare analytics.

Data Analyst, Suvega Technologies – Hyderabad, India

January 2022 – August 2023

- Reduced truck cycle times by 35% by developing and evaluating predictive route optimization models on GPS delivery data using SQL and Python; collaborated with the development team to deploy insights into a real-time driver app.
- Led weekly client meetings to deliver dashboards, translating data into actionable KPIs for managers and stakeholders.
- Designed 10+ interactive Tableau dashboards by preprocessing vehicle trip data in Python sourced from SQL; integrated insights via TabPy to deliver real-time analytics on cargo efficiency and vehicle performance.

SQL Data Analyst, RSSC Solutions - Chennai, India

January 2021 – December 2021

- Mitigated product quality issues by 23% through statistical root cause analysis of defects and inspection logs, identifying wear-off patterns and failure durations to support predictive maintenance.
- Streamlined manufacturing data pipelines with Python, validating 85% of records into PostgreSQL and ensuring clean datasets for downstream analytics.

PROJECT EXPERIENCE

Temperature Forecasting using Time Series Techniques

January 2025 - May 2025

- Led a team of 3 to analyze 2.9M U.S. daily temperature records and forecast short- and long-term trends using machine learning, deep learning, and time series models; applied feature engineering, statistical analysis, and encoding.
- Visualized forecast results and actual vs predicted trends using Power BI and Plotly for easy stakeholder interpretation.

Multi-Feature Evaluation On Facial Data Using CNN

January 2023 – April 2023

- Devised a real-time facial analytics system using MediaPipe's 468-point 3D face model with CNNs and OpenCV to classify age, gender (96% accuracy), and emotions for adaptive interfaces and monitoring applications.
- Led feature engineering (EAR, MAR ratios) on MediaPipe landmarks for eye-blink, mouth state, and feature detection.
