PROFESSIONAL SUMMARY

Experienced Data Engineer with around 4 years of expertise in designing scalable **data pipelines**, optimizing **ETL** workflows, and leveraging **Azure**, **Databricks**, and **AWS** for cloud-based solutions. Skilled in big data processing, real-time analytics, Apache **Spark**, **Kafka**, **SQL**, and data governance to drive business insights. Adept at collaborating in **Agile** environments to deliver efficient, data-driven solutions.

WORK EXPERIENCE

Data Engineer | *One Community Global*

Jul 2024 - Present

- Designed and implemented scalable data pipelines using **Azure cloud** services to manage and process over 1TB of community data, including feedback, event information, and resource allocation, reducing manual data handling by 60%.
- Designed and maintained relational databases in **SQL Server and T-SQL**, ensuring data integrity through normalization, constraints, and triggers, while optimizing complex queries for analytics and reporting.
- Developed ETL workflows using **Azure Data Factory**, transforming and loading both structured and unstructured data into **Azure Data Lake**, increasing data processing efficiency by 40% and enabling real-time access for reporting and analysis.
- Built REST API-based ETL pipelines** using Python and Azure Functions to automate data ingestion from third-party services, reducing manual data retrieval by 50%.
- Built and maintained interactive dashboards using **Power BI**, providing real-time insights into key engagement metrics for over 500 community members and enabling internal teams to track resource utilization with 95% accuracy.
- Ensured data security and compliance by implementing access control policies within **Azure Active Directory** securing sensitive data.
- Optimized performance of data storage and retrieval by leveraging **Azure SQL** databases, reducing query times by 50% and improving system scalability to handle data growth of over 200GB per month.
- Documented data **workflows** and technical processes to ensure smooth team **collaboration**, reducing troubleshooting time by 20% and improving onboarding efficiency for new team members by 35%.

Graduate Teaching Assistant | *Northern Arizona University*

Aug 2023 - May 2024

- Supported 160 students in Data Engineering and Big **Data Analytics** courses, providing personalized guidance on ETL processes, data modeling, SQL Server(SQL Server Management Studio) and distributed computing.
- Offered **hands-on** assistance to improve proficiency in tools like **Apache Spark**, and SQL for efficient data pipeline development.
- Managed grading for assignments related to data processing, analytics, and cloud-based solutions, while addressing student inquiries and fostering a deeper understanding of data engineering concepts.
- Supported classroom activities and group projects, **guiding students** through the basics of data ingestion, transformation, and analysis using Apache Spark and SQL.

Data Engineer | *Carmax/Cognizant Technology Solutions*

Mar 2021 - Dec 2022

- Designed and developed **data pipelines** to process vehicle sales, inventory, and customer transaction data, enabling real-time insights into dealership performance. Implemented **Databricks** on Azure and **Data Build Tool (DBT)** to optimize processing efficiency by 30%, leveraging Delta Lake, Z-Order indexing, and partitioning strategies to manage **large-scale data**.
- Developed real-time and batch pipelines using **Kafka, PySpark, Spark SQL and T-SQL** to ingest vehicle pricing, purchase trends, and maintenance records from Oracle DB and SQL Server into ADLS and Synapse Analytics, processing over 50GB of data daily.
- Applied **Medallion Architecture** (Bronze, Silver, Gold) and **Star schema** to enhance data quality and support analytical reporting, reducing data inconsistencies by 15% and improving scalability by 50%.
- Integrated Databricks **Autoloader** and **Delta Live Tables** to automate data transformation, reducing storage footprint by 20% and improving data freshness by 35%. **Integrated Airflow with Azure Data Factory**, streamlining job scheduling across multiple cloud environments.
- Monitored and optimized** the performance of data pipelines using **Datadog**, reducing processing latency by 20% and proactively identifying failures in Spark jobs and Kafka streaming.
- Implemented **Unity Catalog** for centralized **data governance**, ensuring compliance with security policies and providing controlled access to vehicle data for over 100 users across 5+ teams.
- Automated ETL workflows using ADF, **Databricks Workflows**, and CI/CD pipelines with **Git** and **Jira**, reducing deployment time by 40% and improving issue tracking by 30%.
- Worked closely with **business teams** to provide insights on vehicle lifecycle trends, enabling data-driven decision-making and improving dealership strategy execution.
- Actively participated in **Agile** ceremonies, including daily standups, sprint planning, and retrospectives, ensuring 95% on-time delivery of data solutions aligned with business needs.

EDUCATION

Northern Arizona University at Flagstaff, AZ, USA: Master of Science - Computer Science

May 2024

TECHNICAL SKILLS

Programming Languages: Python, SQL, T-SQL, Java, Scala, R

IDEs: PyCharm, Jupyter Notebook

Cloud Technologies: Azure (Azure Data Factory, Data Lake, Synapse, Blob Storage, Azure DevOps, Databricks), GCP (BigQuery, Google Cloud Storage, Dataflow, Dataproc, Cloud Composer, Cloud Monitoring, Google Cloud Deployment Manager, Google Cloud Data Catalog), AWS (EC2, S3, RDS, ECS, ECR, EMR, IAM, Batch, Lambda, Glue, Athena, AWS Pipeline, Redshift, Database Migration Service, CloudWatch, SQS, SNS, SageMaker), Docker, Kubernetes

Big Data Ecosystem: Spark, Databricks, Apache Airflow, Hadoop, Hive, Apache Kafka, Snowflake, DBT, Delta Lake, Data dog, Lakehouse

Visualizations: Power BI, Tableau, Excel

Packages & Data Processing: NumPy, Pandas, PySpark, Spark SQL, SSIS, Data Pipelines

Version Control & Databases: GitHub, Git, SQL Server, PostgreSQL, MongoDB, DynamoDB, MySQL

Methodologies: Agile/Scrum, CI/CD, Jenkins, UML, SDLC, Design Patterns, Program Development Documentation

CERTIFICATIONS

- Microsoft Certified: [Azure Data Engineer Associate](#)
- Databricks Certified: [Fundamentals of Databricks Lakehouse Platform](#)
