

Chetas Anand Business Intelligence

| +1(623)-824-8552 | chetas.a@protectmymails.com | LinkedIn | GitHub |

PROFESSIONAL SUMMARY

- **Business Intelligence Analyst with 4+ years of experience** developing and optimizing **data-driven solutions** using **SQL, Python, Power BI, Tableau, and Looker**, enabling **real-time insights** that improved **operational efficiency by 35%**.
- Proficient in **designing and automating ETL pipelines** using **SQL, Alteryx, and Apache Airflow**, streamlining **data integration and transformation**, reducing processing time by **50%**, and enhancing **reporting accuracy**.
- Experienced in **data warehousing and cloud-based BI solutions**, leveraging **AWS Redshift, Snowflake, and BigQuery** to improve **query performance by 40%** and support **large-scale analytics** across **enterprise-wide datasets**.
- Skilled in **data governance, KPI tracking, and compliance**, implementing **security protocols, RBAC, and GDPR/CCPA frameworks** while developing **automated anomaly detection and auditing**, ensuring **99.9% data accuracy and regulatory adherence**.

TECHNICAL SKILLS

Programming Languages: Python, SQL, R, Scala, MATLAB

Databases: MySQL, MS SQL Server, PostgreSQL, Snowflake, BigQuery, MongoDB (NoSQL)

Big Data & Cloud: Apache Spark, Databricks, Azure Synapse, AWS, Azure, GCP, S3, GCS, Delta Lake, EC2

ETL & Data Integration: Apache Airflow, Matillion ETL, MSBI (SSIS, SSAS, SSRS)

Data Processing & Orchestration: Apache Flink, Apache Nifi

Version Control & DevOps: Git, Bitbucket, Jupyter, REST APIs, DevOps

Data Visualization: Tableau, Power BI, Qlik

Workflow & Project Management: Jira, Confluence, Agile, Data Pipelines

Analytics & Data Science: Time Series Analysis, A/B Testing, Regression, Hypothesis Testing, Probability & Statistics

PROFESSIONAL EXPERIENCE

Business Intelligence, Goldman Sachs Group

Jul 2023 – Present | Remote, USA

- **Designed and processed business intelligence reporting solutions** using **Power BI, Tableau, and Looker**, eliminating **manual reporting inefficiencies by 50%** and providing **real-time financial insights** for executive decision-making.
- **Developed and optimized ETL workflows** with **SQL, Python, and Apache Airflow**, reducing **data processing times by 40%**, ensuring **seamless extraction, transformation, and loading of critical business data**.
- **Built and maintained data integration pipelines** using **AWS Redshift, Snowflake, and Google BigQuery**, improving **query performance by 35%**, enabling **scalable data storage and fast analytics**.
- **Implemented and fine-tuned KPI tracking models** in **Alteryx and Python**, enhancing **financial forecasting accuracy by 30%**, reducing **variance in revenue predictions**, and improving **risk mitigation strategies**.
- **Orchestrated and enforced data validation and governance frameworks**, automating **data integrity checks**, eliminating **98% of discrepancies**, and ensuring **compliance with GDPR, SOX, and internal audit policies**.
- **Created and optimized interactive dashboards** tailored for **sales, finance, and risk teams**, improving **real-time visibility into key metrics**, reducing **manual reporting time by 60%**, and accelerating **data-driven decision-making**.
- **Led cross-functional collaborations** with **engineering, finance, and operations teams**, refining **BI strategies**, integrating **structured and unstructured data sources**, and enhancing **enterprise-wide reporting capabilities**.

Business Intelligence, Hexaware Technologies

Jun 2019 – Jul 2022 | India

- **Established and maintained enterprise BI reporting frameworks** using **SQL, Power BI, and Tableau**, automating **80% of reporting workflows**, reducing **manual errors**, and increasing **insight accuracy** for decision-makers.
- **Engineered and streamlined data transformation processes** with **Python, SQL, and Apache Spark**, boosting **processing speeds by 45%**, ensuring **timely availability of key business insights**.
- **Innovated and standardized data models** supporting **enterprise-wide reporting**, increasing **data accessibility by 30%**, improving **forecasting precision**, and reducing **reporting inconsistencies**.
- **Constructed predictive analytics models** for **financial planning and operational forecasting**, improving **budgeting accuracy by 35%**, optimizing **cost control measures**, and enhancing **revenue prediction models**.
- **Configured business reports** by integrating **CRM, ERP, and third-party data sources**, reducing **report generation times by 50%**, ensuring **real-time availability of performance metrics**.
- **Strengthened data governance policies**, implementing **Systematized security and compliance controls**, eliminating **30% of data anomalies**, and ensuring **regulatory compliance across BI processes**.
- **Collaborated with engineering, data science, and business teams** to translate **complex business needs into actionable BI solutions**, refining **data visualization strategies** and enhancing **executive reporting**.
- **Architected scalable data models** to consolidate **complex datasets**, optimizing **data retrieval speeds by 40%** and supporting **advanced analytics across global financial operations**.

EDUCATION

Arizona State University

Aug 2022 – May 2023 | Tempe, Arizona

Master of Science in Business Analytics

Amrita University

Aug 2015 – May 2019 | Tamil Nadu, India

Bachelor of Engineering in Computer Engineering
