Summary

Results-driven Software Engineer with hands-on experience in building scalable backend systems and distributed microservices using Java, Spring Boot, and AWS. Skilled in developing secure, high-performance APIs and event-driven architectures with Kafka. Collaborated across teams and with non-technical stakeholders to translate business needs into scalable solutions. Strong understanding of system design, data structures, and algorithms, reinforced through regular problem-solving and design discussions. Committed to clean code, continuous integration, and cloud-native development. Proven ability to adapt quickly, work in high-scale environments, and deliver reliable solutions aligned with business goals.

Education

Master of Information Systems

Jan 2023 - Dec 2024

Union Commonwealth University, Barbourville, Kentucky.

Bachelor of Technology in computer science and engineering

Aug 2018 - Aug 2022

Sathyabama Institute of Science and Technology, Chennai, India.

Skills

- **Languages:** Java, Python, JavaScript, SQL
- **Scripting Tools:** Bash, Ruby
- **Frameworks:** Spring Boot, Hibernate, Microservices, React.js, Angular, Redux, React Router, React Hooks, TypeScript
- **Web Technologies:** HTML, CSS, Bootstrap, jQuery, JSON, REST, GraphQL, Apollo Client, Tailwind CSS
- **Cloud & DevOps:** AWS (EC2, S3, Lambda), Docker, GitHub Actions, Kafka, Nginx, Tomcat
- **Databases:** PostgreSQL, MySQL, Redis, MongoDB, Oracle
- **Testing & Tools:** JUnit, Mockito, Jest, Enzyme, Selenium
- **Practices:** JWT/OAuth2.0 Auth, RESTful APIs, CI/CD, System Monitoring, Load Testing, TDD, Production Debugging,
- Distributed Architecture

Experience

DXC Technology, USA

Software Engineer

Nov 2024 – Present

- Reduced page load times by 40% by addressing performance issues in a high-traffic Angular application using lazy loading and optimized change detection.
- Solved backend latency issues by implementing Spring Boot REST APIs, cutting average response time to under 200ms.
- Closed security gaps by integrating JWT authentication and RBAC, eliminating unauthorized access incidents.
- Improved deployment reliability by containerizing services with Docker and deploying via Kubernetes, achieving 99.9% uptime.
- Collaborated with cross-functional teams in an Agile/Scrum environment, participating in sprint planning, daily standups, and retrospectives to ensure timely delivery of features.
- Resolved frontend state management bugs using React Hooks and Redux, reducing user-reported UI issues by 35%.
- Streamlined CI/CD pipeline with Jenkins and GitLab CI, reducing production deployment time by 60%.

Hexaware Technologies, India

Software Developer

Jan 2020 – Dec 2022

- Modernized legacy frontend by building a React.js app, reducing load time by 45% and increasing user retention.
- Migrated monolithic services to Spring Boot microservices, improving modularity and scaling capability across multiple environments.
- Fixed inefficient data fetching by integrating GraphQL and Apollo Client, cutting API call volume by 50%.
- Strengthened authentication using Spring Security and OAuth 2.0, mitigating vulnerabilities identified during audit.
- Automated test coverage using JUnit, Mockito, and Jest, increasing code reliability and reducing post-release bugs by 40%.
- Cut deployment time by 30% by setting up a CI/CD pipeline with Docker, Kubernetes, and GitLab CI.

Projects

Eye Movement Tracking Computer Vision Model	Aug 2024 - oct 2024
• Built a computer vision model to accurately track eye movement on a screen, utilizing deep learning techniques such as Convolutional Neural Networks and optical flow algorithms for motion detection with potential applications in user interface design, eye health monitoring, and human-computer interaction research. • explored deep learning-based visual interaction models with future potential in agentic AI UX solutions • Explored ML techniques for computer vision using CNNs and OCR to enhance user interaction analysis. • Skills: Deep Learning · Coding Experience · Oral Communication · Research Skills · OpenCV · Python (Programming Language) · Optical Character Recognition (OCR) · Git · Computer Vision	

EDA on Finance Data using Alteryx workflows	Jan 2024 - Mar 2024
• Centralized RentBureau reporting by designing and deploying Alteryx workflows on the Alteryx Gallery, enabling non-technical users to access real-time, accurate data without SQL queries, significantly improving reporting efficiency, accuracy, and reducing data retrieval time by 73%. • Conducted exploratory data analysis on Alteryx of RentBureau retention policies, providing actionable insights that led to a strategic revision of the policy, optimizing data retention practices and supporting informed business decision-making. • Skills: Alteryx BI + Visualization Solutions · Alteryx · Exploratory Data Analysis · Workflow Applications · SQL	

Certifications

• Microsoft Azure Administrator (AZ-104) • Microsoft Azure Solutions Architect Expert (AZ-305)
