Objective:

M.S. Computer Science, B.S. Mechanical Engineering, seeking a software engineering role in Raleigh, NC.

Experience

DataAnnotation | Remote, USA

June 2025 – Present

AI Data Analyst

- Reviewed and edited over 100 AI responses to programming questions for companies such as Google, Meta, and Amazon.
- Created and reviewed questions designed to stump AI agents such as ChatGPT, Gemini, and Claude.

ASUS Robotics & AI Center | Taipei, Taiwan

June 2023 – May 2025

Robotics / Software Engineer

- Programmed a custom robotics path planning algorithm based on the Open Motion Planning Library (OMPL) to enable our robot to autonomously navigate an office environment.
- Improved a machine learning development environment to allow seamless Continuous Integration/Continuous Delivery (CICD) for other developers using Kubernetes, Google Cloud Platform, Terraform, and Bazel.

Southwest Research Institute (SWRI) | San Antonio, TX

May 2022 – August 2022

Software Engineering Intern

- Programmed a computer vision traffic monitoring system using YOLOv5 and DeepSORT to automatically detect and track moving vehicles.
- Developed a cybersecurity assurance case for military autonomous vehicles to ensure system impenetrability.

Lucid Motors | Newark, CA

March 2021 – October 2021

Mechanical Design Release Engineer – Automotive Safety

- Designed and executed over 30 airbag tests to prototype a new driver airbag design.
- Updated and redesigned 3D models of airbags, seatbelts, and safety electronics within CATIA 3DX.

Education

Georgia Institute of Technology - GPA 4.0/4.0

August 2021 – May 2023

M.S. Computer Science

Specialization in Computational Perception and Robotics

Georgia Institute of Technology – GPA 3.94/4.0

August 2015 – Dec 2019

B.S. Mechanical Engineering

Skills

Programming Languages: Python (very proficient), Java (proficient), C/C++ (proficient), Javascript (learning)

Tools: Git, Kubernetes, Docker, PyTorch, Tensorflow, Terraform, Google Cloud Platform, Bazel, CATIA/3DX

Languages: English (native), German (advanced), Chinese (intermediate), Spanish (beginner)

Projects

AI Traffic Monitoring - [5 min Video](#) - [25 min Video](#)

May 2023

- Combined YOLO Object Detection and DeepSORT tracking to analyze real-time traffic camera videos.
- Designed my own speed tracking algorithm using homography transformations of videos.

Real Estate Forecasting and Visualization - [Video](#) - [Tool](#) - [Report](#) - [Poster](#)

April 2022

Computational Photography Portfolio - [Link to Portfolio](#)

December 2021
