Databases and other: PostgreSQL, MongoDB, Oracle, MySQL, RESTful Routing, JSON

Operating Systems: Windows, Linux/UNIX

Interpersonal skills: Leadership, Critical Thinking, Collaboration, Great Communication Skills

POSTGRADUATE RESEARCH & PROJECTS

WeatherPulse Pro - [GitHub](#) | [Web App](#)

WeatherPulse Pro is a user-friendly weather app that offers various features, including viewing weather conditions, hourly forecasts, and long-term predictions. Users can sign up, log in, and search for weather information by location.

- Combines MongoDB, Express.js, React, Swiper JS, animate.css, Bootstrap and Node.js to create a full-stack web application that can efficiently manage user data, provide real-time weather information, and offer a seamless user experience.
- Incorporated Google Maps API for map integration and the Open Weather API to search and fetch real-time weather data, seamlessly integrating both into its MERN stack application to provide users with up-to-date weather information based on their selected locations.

FuzzyFriends - [GitHub](#) | [Web App](#) - Django, Python, PostgreSQL, HTML, AWS, Bootstrap.

A web platform for pet enthusiasts, enabling logged-in users to share photos and express their affection for their beloved animals.

- Collaborated within a GitHub-based team workflow, ensuring smooth project management and code integration among team members.
- Implemented user authentication and authorization using secure practices to protect user data and enhance privacy.
- Enhanced user engagement and interaction by incorporating 'likes' and 'comments' features, effectively improving user experience and interactivity.

Soccer Match Rater - [GitHub](#) | [Web App](#) - Express, MongoDB, Node.js

Soccer Ratings & Match Review is your go-to web app for taking your soccer passion, sharing your match ratings and opinions with other soccer enthusiasts.

- Made RESTful API fetch calls to an Express, MongoDB, Node.js backend handling all create, read, update, delete (CRUD) operations.
- Ensured secure login using Google OAuth
