# Colton Matthews

---

## PROFESSIONAL SUMMARY

---

Detail-oriented data science professional with a passion for transforming data into actionable insights to drive better decision-making. Leverages nearly four years of retail domain experience and a Bachelor's degree in Computer Science, complemented by a Data Science certification. Proficient in Python, SQL, Jupyter Notebook, Excel, and GitHub, with hands-on expertise in data analysis, visualization, and predictive modeling. Excited to apply a unique combination of technical skills and retail knowledge to contribute to innovative, data-driven solutions as part of a dynamic team.

## CERTIFICATION

---

### IBM DATA SCIENCE — *Non-credit Professional Certificate*

JANUARY 2025

- Developed hands-on skills in Data Science and Machine Learning
- Learned Python with libraries of NumPy, Pandas, and Scikit-Learn, and SQL
- Performed Data Visualization and Analysis, and created Machine Learning Models

## RELEVANT EXPERIENCE & PROJECTS

---

### TARGET — *General Merchandise Expert Team Member*

JUNE 2021 - PRESENT

- Ensured a welcoming shopping experience by zoning aisles daily to maintain organized, tidy displays for customers.
- Managed freight on the sales floor by efficiently stocking products and back-stocking inventory in the backroom.
- Executed weekly ad setups by applying promotional labels, arranging signage, and updating end-cap headers to highlight deals and enhance visual merchandising.

### PERSONAL PROJECT — *Customer Purchase Behavior Prediction*

MARCH 2025

- Utilized Python libraries, including NumPy, Pandas, and Scikit-learn, to preprocess data and perform feature engineering for predictive analysis.
- Conducted exploratory data analysis to derive actionable insights on purchasing behavior based on dataset features.
- Developed and implemented a machine learning model to predict customer purchase likelihood, optimizing performance through evaluation and accuracy metrics.

### CAPSTONE PROJECT — *IBM Data Science*

JANUARY 2025

- Performed web scraping to collect SpaceX's rocket launch and landing history data, creating a comprehensive dataset for analysis.
- Utilized Python and SQL for data cleaning, preprocessing, and uncovering correlations between features and rocket landing outcomes.
- Developed and evaluated multiple machine learning models to predict rocket landing success, optimizing accuracy to enhance predictive performance.

## EDUCATION

---

### GUSTAVUS ADOLPHUS COLLEGE — *Bachelor of Arts Degree*

SEPTEMBER 2019 - MAY 2023, COMPUTER SCIENCE

- GAIN Program
- Mathematics & Computer Science Club
