SUMMARY

Proactive and results-driven **Software Engineer** with experience in developing responsive and user-friendly web applications in fintech and educational sectors. Skilled in **JavaScript, HTML, CSS, TypeScript, React, Next.js, Tailwind, Node.js, Go, Python** with a strong focus on delivering pixel-perfect designs and seamless API integrations. Proven ability to collaborate with cross-functional teams in **Agile, start-up** environments and ensure high-quality outcomes through attention to detail and rigorous testing

SKILLS

- *Languages*: Typescript, JavaScript, HTML5, CSS3, Node.js, Python, Go, Java
- *Libraries, Frameworks*: React, Next.js, Angular, Flutter, React Native, Express, TailwindCSS, styled-components, Material UI, Mantine, Ant Design, MobX, Redux, Zustand, React Query, tRPC, OAuth, JWT, Jest, Playwright, Chai, Mocha, Hardhat, jQuery
- *Databases*: PostgreSQL, MySQL, SQLite, MongoDB
- *Tools*: Git, GitHub Actions, ESLint, Postman, Jira, Notion, WordPress, Netlify, Vite, yarn, npm, VS Code
- *Platforms*: Docker
- *Operating Systems*: macOS, Linux

EXPERIENCE

Contract (a language school's website)

2023 - 2024

Frontend Engineer

- Developed a responsive web application using TypeScript and Next.js, utilizing Chrome extensions for design validation to **achieve 100% Figma design compliance across 4 device types**
- Integrated frontend components with **RESTful APIs** to ensure accurate data retrieval and display **for 10+ language programs and schedules**, improving data consistency and system reliability
- Collaborated with teams including frontend and backend engineers and UX/UI designers in an Agile environment, participating in weekly sprint cycles and daily standup meetings to ensure the website features and content are aligned with the client's vision and technical requirements
- Increased website reliability by cross-browser manual testing and collaboratively finding and resolving **20+ UI inconsistencies and functional issues** using Jira for bug tracking, ultimately ensuring the application's final UI fully matched the design specifications

Ongrid Systems

2022 - 2023

Software Engineer

Platform for listing projects to raise capital and collect investments from users

- Built responsive UI of the web platform from scratch using JavaScript, React, styled-components, delivering 100% specification compliance within an agile small-team environment
- Critically analyzed platform specifications, **identifying 7+ key logic inconsistencies and gaps**, submitted them to the project manager and ensured comprehensive client input and alignment with project objectives
- Developed a secure authentication system using JWT and integrated a third-party KYC provider, resulting in a significant increase in legitimate investment applications and **minimizing the client's verification time**
- Collaborated with the backend team to integrate frontend components with APIs, contributed to the design of a Django Admin interface that allowed the client to update platform information independently, reducing reliance on developer support

- Performed rigorous manual testing across all devices to meet functionality requirements, drafted a comprehensive testing protocol, and authored detailed documentation. Successfully delivered the platform to the client by presenting its UI logic and conducting manual testing of all workflows during a call, **enhancing the client's understanding** and **significantly reducing support requests**

Game Character Token Marketplace

- Updated the UI of the web marketplace by implementing new features and designs aligned with the client's game update requirements, using JavaScript, React, styled-components
- Integrated new smart contracts into the marketplace for purchasing game characters using web3.js and ethers.js libraries. Conducted both **automated testing by writing and executing test cases with Hardhat and Chai in JavaScript** on a test network and rigorous manual testing of the purchasing flow, ensuring all features and designs met specifications and functioned seamlessly in the marketplace
- Conducted comprehensive UI testing for the web marketplace **by writing unit tests with Jest**, achieving 90% coverage. Complemented automated testing with rigorous manual testing of key workflows, and drafted a detailed testing protocol to standardize the QA process, reducing post-release defects
- Maintained repositories with frontend code ensuring code quality and consistency through regular code reviews and collaborative feedback

Block explorer with real time and historical information on blockchain transactions

- Customized UI of existing open-source block explorer for the client using HTML and CSS ensuring pixel-perfect alignment with Figma design layouts. Conducted thorough manual testing to ensure functionality and design consistency across multiple browsers, enhancing user experience and reliability

Innovat

2021 - 2022

Junior Frontend Developer

Student information system

- Developed responsive UI for a web platform with electronic school diaries for students and grade books for teachers, utilizing TypeScript and React, styled-components based on designs from the design team
- Collaborated with backend developers to implement APIs for the teacher grade book system, achieving efficient data exchange and ensuring functionality aligned with platform requirements
- Set up CI/CD tools and performed code reviews, enhancing code quality and consistency, which reduced deployment issues and streamlined the development process
- Conducted manual cross-browser and cross-device testing of teacher grade book system to ensure its responsiveness and compatibility, logging bugs in Jira for the frontend team, which improved accessibility and usability across various environments

PROJECTS

Frontend Engineer: Planner App

2021 - 2022

- Built a minimalistic web app for organizing days and improving work-life balance with TypeScript, React, styled-components, react-calendar, Chart.js. Implemented state management using MobX, utilized local storage to securely store all application data

EDUCATION

Kutafin State Law University, *Master of Laws*

2018 - 2020

Ural State Law University, *Bachelor of Laws*

2014 - 2018
