SUMMARY

Results-oriented Data Analyst with 3+ years of experience in SQL, Access, Power Query, Power BI, Excel, Python (Pandas), Java, and Information Systems. Skilled in data wrangling, reporting, visualization, and quality assurance, with a proven ability to develop ad hoc reports that meet risk and regulatory standards. Adept at transforming complex datasets into actionable insights to support business strategy and decision-making. Seeking to leverage expertise in data analytics, AI, and campaign performance optimization to enhance business processes and drive measurable efficiency.

KEY COMPETENCIES

Python	Business Intelligence Reporting	Regulatory Knowledge and Compliance
SQL	Forecasting and Analysis	Cross-functional Collaboration
Power BI	Data Management	Vendor Management
Excel	Tableau	

EXPERIENCE

Talon America Commercial Business Analyst

April 2025- August 2025

- Delivered recurring reports on \$30M+ in media investment, programmatic spend, and client performance to support leadership decisions across North America.
- Analyzed trends and flag risks or growth opportunities to influence trading strategy across U.S. and Canadian markets.
- Partnered with Strategy, Finance, and external media owners to ensure reporting accuracy and contract fulfillment.
- Streamlined data pipelines and reporting workflows by optimizing Plato and Atlas platforms, cutting manual effort by 35%.
- Conducted regular data audits to maintain consistency, accuracy, and reliability across business units.
- Participated in agency and vendor meetings to align on pricing, investment pacing, and performance goals.
- Leveraged Power BI, advanced Excel, and SQL to automate reporting and surface actionable insights for stakeholders.

Equimax Market Research Analyst

July 2023- March 2025

- Developed SQL queries to streamline data wrangling, optimize data loading processes, and improve reporting efficiency.
- Leveraged Power BI and Excel to analyze market data, contributing to a 15% YoY increase in profitability.
- Designed performance dashboards and KPI tracking tools to assess market performance and present findings to senior management.
- Developed vendor management dashboards to track supplier performance, streamline procurement, and enhance cost efficiency.
- Assisted in settlements and P&L reporting for individual properties, ensuring accurate profitability assessments and financial transparency.
- Supported pricing forecasts by analyzing historical trends and market conditions, providing insights into strategic planning and investment decisions.

Headstarter AI Jr Backend Developer

March 2022- July 2023

- Contributed to the development of an AI-driven weather clothing app that recommends apparel based on user preferences and historical data, using SQL for data management and Java for backend functionalities.
- Leveraged advanced data analytics to generate actionable insights, enhancing user decision-making.
- Collaborated with a team of 12 members, employing agile methodologies to ensure effective coordination and timely deployment of the application.
- Applied data-driven techniques to improve app functionality and user experience, handling large datasets, integrating diverse data sources, and driving continuous improvement through analytics.
- Provided insights into user behavior and programmatic ad placements to optimize audience targeting and engagement strategies.
