EDUCATION

BABSON COLLEGE, USA

August 2024 - December 2025

M.S. in Business Analytics (STEM)

Coursework: Advanced Analytics, Product & Pricing Strategy, Marketing Analytics, Data Visualization, Economics, Operations & Supply Chain

DAVV, India

Post graduate Diploma in Computer Applications (2022-2023)

July 2019 - July 2023

Bachelor of Business Administration (2019-2022)

EXPERIENCE

United Nations, New York, USA

July 2025- Present

Digital Analyst Intern

- Analyzed large multi-source datasets using SQL, Python, and Excel to build models and KPI dashboards in Power-BI and R Shiny for 10+ countries, identifying performance gaps, risk drivers, and leading indicators to support strategic planning and investment decisions for \$4M+ AI Landscape Assessment (AILA) digital capacity-building program.
- Evaluated adoption trends, historical performance benchmarks and operational drivers to assess future readiness and execution risk, supporting product improvement and strategic planning decisions, and improving planning effectiveness by 30%.
- Conducted hypothesis driven analytical deep dives and developed ongoing monitoring reports and executive presentations for senior stakeholders, translating complex analysis into actionable recommendations that informed quarterly strategy reviews, resource allocation, and product refinements, improving cross-functional alignment by 25%.

Deco-Lite Industries, India

August 2022 - July 2024

Business Analyst

- Led sales, pricing, and demand analysis for hundreds of SKUs across multiple export markets using SQL and Excel, building forecasting models and Tableau dashboards to identify revenue drivers, pricing effectiveness, demand risk and margin impact, supporting \$2M in annual export revenue and improving forecast accuracy by 20%.
- Partnered with cross-functional teams to conduct ad-hoc deep dives on product performance, customer demand, and regional patterns, translating insights into recommendations that improved market prioritization and customer conversion across global markets.
- Delivered data-backed recommendations to inform quarterly planning decisions and implemented automated reporting and performance monitoring solutions, reducing manual reporting effort by 40%, improving execution speed and decision responsiveness.

Genie Events, Dubai, UAE

Jan 2022 - July 2022

Market Research Analyst

- Analyzed digital campaign performance and customer engagement data across multiple channels using Excel, evaluating response rates, conversion patterns, and audience behavior to identify high-performing content and optimal timing, informing data-driven marketing and go-to-market strategy decisions.

KEY PROJECTS

Healthcare Predictive Analytics Dashboard- Tableau

September 2025 - December 2025

- Applied statistical and predictive models (linear regression, KNN) to forecast patient volumes, service demand, and operational trends, achieved a 25% improvement in prediction accuracy, and built dynamic Tableau dashboards to monitor bed utilization, refusal rates and patient satisfaction and generated actionable insights that optimized resource planning and allocation.

GoDaddy, United States

January 2025 – May 2025

Venture Forward Data Analytics & Insights Consulting Project

- Conducted customer and market analysis of 4+ years of data using R and SQL to evaluate retention behavior, churn risk, and lifecycle patterns, informing segmentation and product recommendations that improved retention strategy effectiveness by 15%.
- Designed R Shiny dashboards to communicate insights to non-technical stakeholders of GoDaddy to support product refinement and marketing prioritization, improving marketing ROI by 27% and increasing customer profiling accuracy by 40%.

BlueBikes Demand Prediction ML Model

September 2024 - December 2024

- Built an end-to-end BlueBikes demand prediction model using Python, cleaning trip, time, and station-level data to identify key demand drivers (time of day, location, usage patterns) to support station-level planning and demand management decisions. Applied machine learning models (Logistic Regression, Random Forest, KNN) with time-based train/test splits to ensure realistic and reliable forecasts.

SKILLS

Analytics & Tools: R, R Shiny, SQL, Python (NumPy, Pandas, Seaborn, Matplotlib), Excel (Pivot, VLOOKUP), BI tools (Tableau, Power BI, Looker).

Modelling & Strategy: Statistics, Predictive Modeling, Statistical Modeling, Business Strategy, Trend Analysis, Pricing, Market Research, Product Performance Analysis, A/B Testing, Forecasting, Storytelling with data, Optimization methods, Insights Synthesis,

Communication & Execution: Stakeholder Communication & Reporting, Detail Oriented, Cross- Functional Collaboration, Adaptability, Communication skills, Analytical Storytelling, Fast Learning, Problem- Solving, Decision-Making, Attention to detail
