

Bhargavi Reddypally

Data Analyst

NJ,USA | +1(561)875-1739| Email:bhargavi@myworkmails.com

Professional Summary

Data Analyst with 4 years of experience in analyzing, transforming, and visualizing data to support business decision-making across IT consulting and enterprise domains. Skilled in SQL, Python, Power BI, Tableau, Excel, Snowflake, and Apache Spark, with experience in building ETL pipelines, statistical models, and interactive dashboards. Proven ability to translate raw data into actionable insights, automate reporting workflows, and optimize data systems on AWS, Azure, and GCP. Strong expertise in data modeling, forecasting, and KPI development, delivering measurable improvements in reporting efficiency, cost savings, and compliance with HIPAA, GDPR, and SOX.

Professional Experience Data Analyst, HCL,USA

Jan 2025–Present

- Designed and developed dashboards in Tableau and Power BI to track operations, sales, and finance KPIs with advanced drilldowns and scorecards, reducing manual reporting cycles by 40% and improving executive decision-making speed by 30%.
- Performed comprehensive data profiling, cleansing, and validation using SQL, Python (Pandas), and Excel Power Query, addressing duplicates, missing values, and schema mismatches that improved accuracy of critical business reports by 20%.
- Authored and optimized complex SQL queries, stored procedures, and joins across Oracle and SQL Server databases to generate ad-hoc and recurring reports, cutting query runtime by 25% and enabling faster delivery of compliance and financial reporting.
- Built end-to-end ETL workflows using Informatica and Python scripts to integrate multi-source customer and finance datasets into Snowflake, reducing reporting latency by 35% and establishing a unified data warehouse for analytics.
- Partnered with business stakeholders to define KPIs, reporting metrics, and dashboard wireframes, translating them into analytical models that improved visibility into operational efficiency and increased reporting adoption across business teams.
- Conducted trend and forecasting analysis in R and Python (time series, regression models) to predict customer churn and sales growth patterns, improving forecasting accuracy by 15% and supporting proactive business planning.
- Automated recurring monthly and weekly reports with Python scripting and Excel VBA, standardizing reporting templates and saving the analytics team over 20 hours per month in manual effort.
- Documented data dictionaries, KPI definitions, ETL workflows, and reporting standards, which improved knowledge sharing, accelerated onboarding for new analysts by 25%, and ensured alignment across cross-functional teams.
- Worked with infra teams on MongoDB installation & administration, implemented monitoring & backup solutions (on-prem & cloud).

Data Analyst, TCS, India

Aug 2019–Nov 2022

- Extracted, transformed, and loaded datasets from ERP, CRM, and marketing platforms into Snowflake and SQL Server using Talend, ensuring data consistency, integrity, and readiness for advanced analytics and reporting.
- Developed Excel models and Tableau dashboards to monitor operational KPIs, project costs, and resource utilization, improving project delivery efficiency by 15% through more informed and effective allocation decisions.
- Performed exploratory data analysis (EDA) in Python to identify operational inefficiencies and revenue leakage, delivering actionable insights that enabled a \$1.2M revenue recovery for a key client.
- Integrated cloud-based analytics tools such as AWS Redshift and GCP BigQuery to scale enterprise reporting capabilities, reducing data refresh times from several hours to just minutes and enabling faster decision-making.
- Collaborated with stakeholders to translate complex business requirements into efficient SQL-based solutions, ensuring analytics outputs directly supported strategic objectives and informed high-impact decisions.
- Automated data validation processes using Python scripts and SQL triggers, enhancing monthly report accuracy and eliminating recurring data quality issues across critical business datasets.
- Designed KPI scorecards that aggregated data from multiple business units, improving transparency and providing leadership teams with clear visibility into performance metrics for informed decision-making.
- Standardized reporting templates for client deliverables, reducing manual formatting time by over 20 hours each month and enhancing consistency, accuracy, and overall client satisfaction.
- Collaborated with data engineers to refine data models and schemas, optimizing query performance and significantly improving dashboard load times for a seamless end-user experience.

Technical Skills

- Languages & DA Tools:** Python, R, SQL, Excel (Pivot Tables, VLOOKUP, Macros), (Pandas, NumPy, Seaborn, Matplotlib)
- Visualization Tools:** Tableau, Power BI, Looker, Google Data Studio
- Databases:** MySQL, SQL Server, MongoDB, Cassandra, Oracle
- ETL & Big Data:** Informatica, Talend, Alteryx, Airflow, Hadoop, Spark, Kafka
- Cloud Technology:** AWS (S3, EC2, IAM, RDS, Lambda), Azure, SSIS, SSAS, SSRS, Snowflake
- Big Data & Data Engineering:** Hadoop, Spark, Kafka, ETL, Data Cleaning, Data Wrangling, Airflow, Alteryx
- DevOps & CI/CD (Additional Strengths):** Docker, Kubernetes, Jenkins, Shell Scripting, Git, GitHub
- Machine Learning:** Regression, Classification, Clustering, Decision Tree, Boosting & Bagging, NLP
- Project Management:** Jira, Trello, Service First, ServiceNow
- IDEs:** Visual Studio Code, Jupyter Notebook, RStudio, Atom
- Tools:** Git, GitHub, Microsoft Office Suite (PowerPoint, Excel, Word), Power Pivot, Power View, Power Query
- Soft Skills:** Critical Thinking, Communication Skills, Presentation Skills, Problem-Solving

Education

Masters | Florida Atlantic University, USA.

Bachelors |Anurag Group of Institutions, India.

Certification

- Microsoft Power BI Data Analyst (PL-300) – In Progress
- SQL for Data Analysis – Completed
- Python for Data Science – Completed
- Google Data Analytics Certificate – Completed
