Education

University of Texas at Dallas

Bachelor of Science in Business Analytics and Artificial Intelligence

August 21 - Dec 25 (Expected)

Relevant Courses: Database Analytics, Business Analysis with R, Web Analysis, Machine Learning, Project Management, Big Data Analytics, Data Visualization, Business Intelligence

Experience

Business Systems Analyst Intern, CSC Global

June 25 – August 25

- Developed a **Power BI** dashboard using **Data feeds** and **Power Query**, providing real-time insights that improved sprint visibility for the team.
- Automated data integration pipelines in **Azure DevOps Server**, enabling continuous delivery of analytics updates to Power BI dashboards.
- Built **Power Automate** approval/denial workflow with conditional logic, reducing manual review time by **40%**.
- Enhanced an **Alteryx workflow** by expanding input capacity and refining numeric configurations, improving data accuracy and processing speed by **30%**.

Data Analyst, University of Texas at Dallas

March 22 - May 25

- Led an initiative to update alumni information, increasing data accuracy by **20%** and improving database integrity.
- Automated data transformation tasks by writing **Python scripts** using Pandas to manipulate CSV files, saving at least **16 hours** of manual work.
- Supported **ChatGPT-based GenAI** tool development by providing technical input and applying **Agile methodology** to increase project efficiency.
- Developed **SQL** queries for report generation and streamlined data extraction for internal analytics and performance tracking.

Data Analyst Intern , NVEEE

May 24 – August 24

- Developed and executed targeted surveys to gather insights on community needs, informing program development and improving engagement.
- Analyzed survey data using **SPSS** and **Python**, creating **Tableau** and **Excel** visualizations to guide strategic decision-making.
- Led **UX/UI** enhancements and **SEO** optimization, boosting website traffic by **20%** and **15%** increase in user engagement.
- Delivered analytical reports to senior leadership, enabling effective strategy formulation and program improvements.

Projects

Predictive Customer Segmentation Model | Python, MySQL, Tableau

- Developed a predictive model and built complex SQL queries to analyze customer purchase behavior, identifying high-value segments which **increased average order value by 12%**.
- Applied time series forecasting to predict demand trends, which enhanced inventory planning accuracy and reduced stockouts.

Sentiment Analysis on Customer Reviews | R, NLP, Tableau

- Performed natural language processing (NLP) on **10,000+ customer reviews**, assigning sentiment scores to identify satisfaction drivers.
- Built and evaluated machine learning models (Naive Bayes, SVM, Logistic Regression) to classify review sentiment, **achieving 80% accuracy**.
- Created visualizations in Tableau, such as word clouds and heatmaps, to highlight region-specific issues, helping to inform localized product strategies.
- Communicated findings to cross-functional teams, promoting data-driven improvements in customer service and product quality.

Car Price Prediction Mode | Python, Machine Learning

- Developed a machine learning model for predicting used car resale values using regression techniques.
- Compared Linear Regression, K-Nearest Neighbors, and Decision Tree models, **with Decision Tree explaining 93% of variance and reducing error by 32%**.
- Conducted time series analysis on historical sales data to identify car depreciation trends, informing future price predictions.
- Delivered data-driven insights on resale pricing, enabling dealerships to refine pricing strategies for increased competitiveness.

Skills

Languages: Python (Pandas, NumPy, Scikit-Learn, Seaborn), Java, R

Databases: MS SQL Server, PostgreSQL, AWS (Redshift, S3), NoSQL, Snowflake, Hadoop (HDFS, Hive), BigQuery

BI/ ETL Tools Tableau, Power BI, Looker studio, Advanced Excel (VLOOKUP, Pivot Tables), Databricks, Airflow, Alteryx, Power Automate, Power Query, Azure DevOps Server

Statistics: Hypothesis Testing, A/B Testing, T-test, Chi-square, Regression, Time Series, ANOVA

Skills: Data Analysis, Data Visualization & Reporting, Data Modeling, Prediction & Regression Analysis

Certification

TATA Group - Data Visualization Virtual Experience Program on Forge, Google - Data Analysis Certificate, IBM - Introduction to Data Analysis, IBM - Machine Learning with Python, AWS Cloud Practitioner
