

Dakshayani indukuri

.Net Developer

262-724-6255 | indukuridakshayani242@gmail.com| WI

SUMMARY

.NET Developer with 4 years of experience in designing and deploying full-stack applications. Skilled in C#, ASP.NET Core, MVC, Entity Framework, and cloud services for Azure and AWS. Adept at Agile methodologies, including Scrum and Kanban, and fostering cross-functional collaboration to streamline development lifecycles. Demonstrated success in building responsive front-end interfaces with Angular and React, and optimizing databases using SQL Server, MySQL, and Oracle. Currently pursuing a Master's in Information Technology Management, graduating in December 2024, and bringing fresh academic perspectives to real-world tech challenges. Eager to leverage strong DevOps (Docker, Kubernetes) and problem-solving skills to deliver robust, scalable software solutions.

SKILLS

Languages & Frameworks: C#, .NET Core, ASP.NET MVC, Entity Framework

Front-End: Angular, React, JavaScript, HTML5, CSS3

Database & ORM: SQL Server, MySQL, Oracle, LINQ

Cloud & DevOps: Azure, AWS, Docker, Kubernetes, Jenkins

Agile & Collaboration: Scrum, Kanban, Jira, Confluence, Git, SVN

Testing & Quality: NUnit, xUnit, MSTest

Soft Skills: Communication, Team Collaboration, Problem-Solving, Time Management

EDUCATION

Masters in Information Technology Management

Dec 2024

University of Wisconsin - Milwaukee, WI

EXPERIENCE

Saayam for all, CA - Full Stack developer

March 2025 – Current

- Developed and maintained reusable React and React Native components for the Saayam web and mobile applications.
- Integrated frontend components with RESTful APIs, ensuring smooth and secure data flow across platforms.
- Created and managed GitHub Issues and corresponding tasks to streamline the development workflow.
- Used Git and GitHub for version control, maintaining a clean commit history, and managing pull requests within a collaborative team environment.
- Identified and fixed bugs, optimized application performance, and ensured timely delivery of high-quality releases.
- Built reusable UI components and front-end libraries, improving code reusability and speeding up development cycles.
- Utilized React Navigation and deep linking in React Native for seamless in-app navigation.
- Managed state across components using Context API and custom hooks for better code organization and maintainability.
- Participated in daily standups, sprint planning, and retrospectives in an Agile development environment.
- Assisted in configuring CI/CD pipelines for automated deployment using platforms like GitHub Actions and Vercel.
- Wrote clean, maintainable code following best practices and conducted code reviews to ensure team-wide consistency.

ServiceNow, WI - .Net Developer

June 2024 – March 2025

- Collaborate with cross-functional teams using Agile methodologies (Scrum, Kanban), enhancing team productivity by 20% through optimized workflows via Jira and Confluence.
- Develop high-performance web applications using C#, VB.NET, and ASP.NET Core, resulting in a 15% increase in application speed and user satisfaction.
- Implement ASP.NET MVC design patterns, emphasizing MVC and dependency injection to ensure modular, scalable codebases.
- Create user-centric front-end interfaces with Angular and React, boosting user engagement by 25%.
- Manage SQL Server databases, using query optimization and indexing to improve data retrieval times by 30%.
- Configure and maintain Azure cloud environments, reducing operational costs by 10% through resource optimization.
- Streamline DevOps pipelines using Docker and Kubernetes, cutting deployment times by 40%.

Aptean Indian Private Limited, Bangalore, India - Associate Engineer

Aug 2022 - July 2023

- Served as a full-stack developer on an E-Commerce product (Enterprise Asset Management), leveraging Azure DevOps, .NET Core, Web API, SSMS, and Sencha Ext JS.
- Addressed front-end and back-end requirements, resolving critical bugs and building new features in .NET Core and Sencha Ext JS.
- Strengthened product security by defining access permissions and user roles, aligning with stakeholder requirements for secure deployments.

Infinite Infolab, India - .Net Developer

Jan 2021 - Aug 2022

- Led the development of enterprise applications using Entity Framework for efficient data modeling and LINQ queries, resulting in a 40% improvement in data handling.

- Built and maintained scalable web apps using JavaScript, HTML5, and CSS3, enhancing client satisfaction by 35%.
- Improved database responsiveness by 50% with advanced SQL optimization across MySQL and Oracle.
- Integrated AWS cloud services (EC2, S3, Lambda), reducing system downtime by 60% through the use of cloud-native architectures.
- Established CI/CD pipelines using Jenkins, resulting in a 25% acceleration of release cycles.
- Managed version control with Git/SVN, minimizing code conflicts and boosting team collaboration by 30%.
- Created RESTful APIs with JSON for seamless inter-system data exchange, lifting interoperability by 45%.
- Adopted Test-Driven Development (TDD) principles using NUnit and xUnit, reducing bugs by 50%.
- Oversaw multiple project timelines through Jira, achieving a 95% on-time project completion rate.
