EDUCATION

California Polytechnic State University, San Luis Obispo June 2025
Master of Science in **Business Analytics**

Bachelor of Science in **Applied Mathematics** June 2024
Emphasis: **Computer Science**, Minor: **Economics**

APPLIED DATA SCIENCE AND AI INTEGRATION

California Polytechnic State University, San Luis Obispo, CA April 2025- June 2025
Business Analytics and AI Solutions Consultant – Claritas

- Engineered an AI-powered dashboard that combined ARIMA-based time-series forecasting, LLM-generated summaries, and AI-enhanced web search to deliver real-time marketing insights from pixel tracking data.
- Performed end-to-end data preparation, including cleaning, feature engineering, exploratory data analysis, and clustering, to uncover key audience segments and behavioral trends.
- Applied the dashboard to a real-world case, Peloton vs. fitness competitors, to generate actionable insights and deliver a tailored marketing strategy aligned with client objectives.

TRUST Dropshipping, Encinitas, CA April 2025-June 2025
AI Consultant

- Designed and deployed an AI-powered chatbot to improve user engagement and learning for an e-commerce education platform
- Built a Retrieval-Augmented Generation (RAG) system to enhance LLM performance by integrating structured course materials and external knowledge sources.

California Polytechnic State University, San Luis Obispo, CA January 2025-March 2025
Analytics and Data Science Consultant - Seattle Seahawks

- Developed predictive models in Python and R to identify key drivers of fan conversion from waitlist to season ticket holders, using those insights to inform a data-driven marketing strategy tailored to high-impact audience segments.
- Cleaned and transformed fan engagement data to support predictive modeling and improve data quality, ensuring models were trained on reliable, structured inputs.
- Led monthly stakeholder meetings to present data-driven recommendations, using scenario simulations and model insights to highlight which fan behaviors most influenced conversion and how the organization could act on those patterns. Contributing to our team being awarded “Best Marketing Plan” among peer consulting groups.

RESEARCH, LEADERSHIP, AND PROFESSIONAL COMMUNICATION

Cal Poly Learning Hub, San Luis Obispo, CA October 2024-June 2025
Peer Educator

- Delivered one-on-one tutoring in math, economics, and computer science, using active listening and positive reinforcement to create a supportive learning environment.
- Communicated complex concepts effectively, adapting to individual learning styles and fostering student confidence through constructive feedback.
- Strengthened leadership, communication, problem-solving, and time-management skills by preparing tailored session plans and guiding peers toward academic success.

Cal Poly Club Baseball, San Luis Obispo, CA June 2024-May 2025
Vice President

- Collaborated closely with the President and board members to communicate strategic goals, organize team operations, coordinate logistics for games and field arrangements, and ensure alignment across a nationally ranked club.

California Polytechnic State University, San Luis Obispo, CA
Mathematics Research Assistant

- Worked closely with a team of four to decompose complex mathematical problems into manageable subgoals, contributing to a paper accepted for publication.
- Presented research findings at the 2024 Joint Mathematics Meetings in San Francisco, effectively communicating complex ideas to an audience of peers and professionals.

SKILLS AND CERTIFICATIONS

- Languages:** Python, R, SQL, Java, MATLAB, C
- Tools & Libraries:** TensorFlow, scikit-learn, Pandas, NumPy, LangChain, Streamlit, Tableau, GitHub, AWS
- Techniques:** Predictive Modeling, Classification, Clustering, Forecasting, Logistic Regression
- AI & LLMs:** Generative AI, Retrieval-Augmented Generation (RAG), Agents, LLM Chatbots
- Certifications:** AWS Certified Cloud Practitioner
