Software Developer | Experience in C/C++, Linux, and Android IFE systems (Panasonic, Thales) | Focused on integration, debugging, and automation

Relevant Experience

Software Developer at Anuvu

June 2022 – May 2024

- Developed, debugged, and integrated over 90 C++ games and applications created for use in Linux and Android In-Flight Entertainment systems.
- Achieved 100% approval rating from our customers by reducing escaped defects to zero and consistently adhering to submission deadlines.
- Collaborated with the QA team to troubleshoot and resolve errors, significantly boosting application stability and performance.
- Automated the installation process of our game catalog onto Android devices using Bash scripts, reducing manual effort by 50% and accelerating the testing phase.
- Utilized SSH to access Linux systems to upload, install, and accurately diagnose issues between client systems and our software applications.

Education

Bachelors of Science in Computer Science

Oregon State University – GPA 3.70

Feb 2019 – Mar 2022

Skills

- **Programming Languages:** C++, Bash, Python
- **Tools:** Visual Studio, Android Studio, Git, GitHub Actions, Bitbucket, Atlassian JIRA, Confluence
- **Methodologies:** Object-Oriented Design, Agile Development, CI/CD, Code Reviews
- **Soft Skills:** Team Communication, Writing Documentation, Time Management, Critical Thinking

Personal Projects

Beat the Beatles – Text Game

- Developed a C++ executable game using Object-Oriented Programming, incorporating robust algorithms and design principles.
- Coded and documented several mini-games, including a quiz show, hangman, and tic-tac-toe.

Check Mate – Android App

- Implemented pre-commit linting and CI/CD pipeline with GitHub Actions for automatic builds.
- Developed in Kotlin using Android Jetpack Compose, creating a checklist app and resolving defects through pair programming.

Other Experience

Business Office Clerk at Magnolia Surgery Center

Dec 2024 – Current

- Perform multiple duties including scheduling, insurance verification, and medical records.

Data Entry Clerk at Volt Workforce Solutions

Feb 2019 – May 2020

- Took the initiative to introduce a formal process for updating job statuses, allowing recruiters to effectively prioritize their time and effort, resulting in more hires.
