EDUCATION

California State University, Long Beach, California

Master of Science in Computer Science

Aug. 2022 — May. 2024

University of Mumbai, Mumbai, India

Bachelor of Engineering in Information Technology

June. 2016 — Oct. 2020

SKILLS

Languages: Java, Python, C#

Databases: Oracle SQL, SQL Server, MySQL, MongoDB, PostgreSQL, Cassandra

Data Engineering: Snowflake, Informatica PowerCenter, Airflow, PySpark, Kafka, Flink, Elasticsearch, Kibana, PowerBI, DBT

Other Technology: AWS (S3, EC2, EMR, Lambda, RDS, DynamoDB, Redshift, Glue Catalog), Azure, Docker, Git, Jenkins, Scrum

EXPERIENCE

Data Engineer - INFOSYS, Mumbai, MH(India)

Mar 2021 – Jun 2022

- Created, optimized, and modified ETL pipelines using Informatica PowerCenter, Oracle SQL, Perl, and shell scripts to serve 3.5 million healthcare insurer members, adhering to HIPAA regulations, and employing Agile Scrum methodology.
- Collaborated with the Enrollment and Billing team to develop pipelines impacting customer billing, including adding state subsidies for health insurance in MD and VA.
- Modified pipelines to revert billing changes, removing the COVID-19 period's 6-month grace period and incorporated additional business logic requirements that reduced processing time by 30%.
- Developed advanced pipelines for broker commission calculations, increasing enrollments by 20% and facilitating efficient data storage and retrieval in the in-house data warehouse.
- Processed ingestion pipelines from various sources for biweekly and monthly broker payment reports, supporting informed decision-making for the Billing and BI teams.

Web Developer Intern – PLAYERZPOT MEDIA, Mumbai, MH(INDIA)

Jun 2019 – Jun 2019

- Spearheaded Firebase Notification integration into a PHP CodeIgniter-based Admin panel for a fantasy gaming platform app, supporting a user base of 1.5 million.
- Created a notification subsection in the admin panel for easy, multiple, and simultaneous notification blasts, with or without device IDs, resulting in a 20% increase in user return rates.
- Utilized Git version control to ensure smooth deployment of functionalities, achieving 0% downtime in production.

PROJECTS

Real-Time Data Processing and Analytics Pipeline

- Architected a robust data processing pipeline using Python, integrating PostgreSQL, Apache Airflow, Kafka, Spark, and Cassandra which efficiently ingests data, supports real-time streaming, performs scalable analytics, and ensures fault-tolerant storage, enabling data-driven decision-making in real-time environments.
- **Technologies:** *Python, PostgreSQL, Apache Airflow, Apache Kafka with Zookeeper, Spark, Cassandra.*

Realtime Election Voting System

- Engineered a high throughput voting solution with Python, Kafka, and Spark Streaming, capable of handling millions of votes in real-time and visualizing outcomes on a Streamlit dashboard, enhancing electoral transparency and efficiency.
- **Technologies:** *Python, Apache Kafka, Spark Streaming, PostgreSQL, Streamlit, Docker Compose.*

Apache Flink E-Commerce Analytics with Elasticsearch and PostgreSQL

- Built a real-time sales analytics application that processes and analyzes financial transaction data instantly, providing comprehensive insights into sales performance and trends, leveraging Flink, Elasticsearch, PostgreSQL, orchestrated with Docker Compose, and Maven.
- **Technologies:** *Java, Python, Apache Flink, Apache Kafka, Docker, PostgreSQL, Elasticsearch, Kibana, Maven.*

Realtime Data Analytics using DBT, Snowflake and AWS

- Developed a scalable, real-time data pipeline and analytics platform using DBT, Snowflake, and AWS (DMS, RDS, Lambda, API Gateway, S3) to streamline data ingestion, transformation, and visualization, resulting in enhanced data quality, reduced latency, and real-time business insights.
- **Technologies:** *DBT, Snowflake, AWS DMS, AWS RDS, AWS Lambda, AWS S3, AWS Glue, Power BI.*
