

LIKITHA DAKKILI

Data Analyst/ Business Analyst

Contact: 347-460-5144 | **Email:** likithad9807@gmail.com

LinkedIn: linkedin.com/in/likitha-dakkili-9318b4239/

CAREER OBJECTIVE:

Data Professional with an **M.S. in Data Science** and 5+ years of experience specializing in **data engineering and advanced analytics**. Expert in **SQL, Python, and Big Query**, with a proven track record of building scalable ETL pipelines and high-impact visualizations in **Tableau and Power BI**. Strong expertise in **data modeling** and distributed computing to drive actionable business insights

PROFESSIONAL SUMMARY:

- 5+ years of experience as **Data analyst**, specializing in **data visualization, reporting** and **business intelligence** across finance and retail and cloud security domains.
- A great deal of experience in creating interactive dashboards, metric-driven reports and executive-level insights using **Tableau, Grafana, Google Data Studio**, and **Amazon Quick Sight**.
- Capable of creating automating and refining **ETL pipelines** with **AWS Glue, GCP Dataflow, DataProc** and **Data Prep** to provide precise, timely and clean datasets for analytics and reporting.
- Demonstrated capacity to provide real-time reporting solutions with spice in **Cloud/Pub/Sub/** composer and **Quick Sight** allowing for proactive monitoring of risk metrics and business process.
- Strong **SQL, Python** (Pandas, NumPy), and **Snowflake** expertise for data extraction, transformation, and metric calculations, supporting dashboards and audit-ready reporting.
- Proficient in monitoring, alerting, and pipeline orchestration using **Cloud Monitoring, CloudWatch, Jenkins, Sh-Airflow**, and **SNS** to ensure pipeline reliability and system health.
- Practical Knowledge in centralizing and integrating data from many sources, such as **MYSQL, MongoDB, Aurora RDS, Dynamo DB, S3, One Lake** and warehouse systems.

WORK EXPERIENCE:

Eficens System INC- Client: Discover Financial Services - Data Analyst (Mar 2025 – Present)
|Chicago, IL

- Maintained and improved over 10+ **Amazon QuickSight** dashboards that tracked certification compliance across the whole enterprise and provided manager- and **LOB-level** performance insights with **99%** data accuracy.
- Collaborated with 50+ engineering leads to validate **database** access and permissions, ensuring 100% adherence to internal security and compliance policies.
- Applied **statistical methods** and exploratory data analysis (EDA) in Python to identify trends in user behavior and system performance metrics.
- Designed and implemented robust **Star and Snowflake schemas** in cloud data warehouses to ensure data integrity and high-performance visualization in Tableau
- Used **Cloud Radar** to identify and catalog active AWS resources, such as **RDS** and **Dynamo**
- Collaborated with multiple teams to onboard application database to **CloudSentry**, improving the **ETIP METRIC** from 90% to 96% through enhanced secure access and compliance tracking.
- Developed and maintained **ETIP** reporting dashboards to monitor the progress of **CSDB** onboarding, offering insight into team adoption and achieving 99% ETIP compliance through focused follow-ups.

Tool Stack: AWS, IAM, S3, Aurora RDS, DynamoDB, Neptune, Quick sight, SQL, Python, Grafana, Snowflake, Tableau, Agile (Scrum).

Client: UBS - Data Analyst (Sep 2023 – Feb 2025) |Weehawken, NJ

- Developed and maintained interactive dashboards in **Tableau and Google Data Studio** to monitor client accounts, transaction trends, and digital service adoption, enabling data-driven decision-making.
- Designed and optimized **ETL pipelines using Python, SQL, and GCP Dataflow** to prepare structured and unstructured client and transaction data for analytics and reporting.
- Centralized transactional, account, and customer data from **Oracle, MySQL, and internal banking systems** into a secure **Cloud Data Lake**, ensuring consistent and reliable reporting.
- Automated data ingestion and refresh workflows with **Cloud Pub/Sub and Cloud Composer**, enabling near real-time updates to dashboards and reporting pipelines for online services.
- Built metric-driven reports for **risk and operations teams** to monitor digital service usage, detect anomalies, and improve client experience.
- Leveraged **Big Query** and **Cloud DataProc (Spark)** to process and analyze multi-terabyte datasets, optimizing query performance for real-time business intelligence
- Implemented pipeline deployment automation using **Cloud Build**, ensuring dashboards and reports always reflect the latest financial and operational data with minimal manual intervention.
- Monitored data pipelines and reporting workflows using **Cloud Monitoring**, providing actionable alerts and reducing downtime for client-facing digital reporting.
- Enforced data security and access controls using **GCP Key Management Service (KMS)** and internal banking compliance protocols to protect sensitive client information.
- **Collaborated with cross-functional teams under Agile Scrum, translating business requirements into actionable visualizations and reports for operational, compliance, and product stakeholders.**

Tool Stack: Tableau, Google Data Studio, Python, SQL, GCP Dataflow, Cloud Storage Data Lake, Cloud Pub/Sub, Cloud Composer, Cloud Build, Oracle, MySQL.

Client: Capital One – Software Developer/Data Analytics (Sep 2022 – Aug 2023) |Plano, TX

- Developed a **SCAN tool** to identify potential sensitive loan data (HSHD) in OneLake and AWS S3 datasets.
- Utilized **ER/Studio** for logical and physical data modeling, ensuring alignment with data engineering best practices.
- Integrated loan data from S3 into the SCAN tool to automate manual record maintenance previously done in Google Sheets.
- Wrote **Python scripts** to detect sensitive loan data via pattern matching across OneLake and S3 buckets.
- Used **AWS Glue crawlers** to store SCAN tool results in S3 and load into **Snowflake** for metric calculation.
- Automated status updates in the **SCAN UI** using built-in connectors in **AWS Lambda**.
- Built **interactive Grafana dashboards** to provide insights on SCAN case metrics and status.
- Automated **email notifications** to dataset owners twice a week using **SNS topics and subscribers**.
- Calculated SCAN tool metrics using **complex SQL queries in Snowflake**.
- Developed **QuickSight visualizations** to share metrics with senior management.
- **Used Apache Airflow (Sh-Airflow) for scheduling, orchestrating, and monitoring data workflows and DAG deployment**

Tool Stack: Snowflake, AWS S3 buckets, RDS, Grafana, Quicksight, Lambda, SNS, Glue jobs, Agile, SQL, Python, Onelake, Jenkins, Sh-Airflow, Splunk.

Savvients INC - Client: Apple – Software Developer / Data analyst
(Jan 2021- Aug 2022) | Austin, TX:

- Developed **data pipelines** in Glue to process, clean, and transform logs related to malware, unauthorized access, and phishing for analysis.
- Integrated processed data from S3 to **Amazon QuickSight**, creating a unified view for stakeholders.
- Built real-time dashboards using **QuickSight SPICE**, visualizing potential security threats detected by machine learning models.
- Collaborated with security teams to **validate and refine threat detection algorithms** based on operational feedback.
- Monitored and optimized dashboard and pipeline performance using **AWS CloudWatch**, ensuring reliable and timely threat detection.
- Defined and deployed AWS resources and configurations using **CloudFormation Templates (CFT)**.

EDUCATION:

M.S in Data Science, University of Maryland Baltimore County (2020–2021)

B.E in Computer Science, Loyola-Icam College of Engineering (2015–2019)

SKILLS:

GCP	Cloud Data Proc, Cloud Data Flow, Big Query, Cloud Storage, Google Data Studio, Cloud Functions, Cloud Monitoring, Cloud Key Management Services, Cloud Pub/Sub, Cloud Composer.
AWS	IAM, EC2, EMR, AWS S3 buckets, RDS, Quick Sight, AWS Lambda, SNS, CFT, AWS Glue, Cloud Watch, Code Pipeline, Secrets Manager, Redshift.
Visualization	Tableau, Power BI, Grafana.
Databases	MySQL, Oracle, MongoDB.
Other technologies	ER/Studio, Sh-Airflow, Splunk, Jenkins, Python, Snowflake.
