Summary

Experienced Business Data Analyst with a strong background in data analysis, reporting, and automation across finance, operations, and HR domains. Skilled in Power BI, Excel (advanced functions), SQL, Python, and SAP (GUI, STORMS, SuccessFactors) for data-driven decision-making. Hands-on expertise with AWS cloud services, Workday HRIS, and CI/CD tools like JIRA and Confluence. Proven track record in developing dashboards, automating workflows, and ensuring data integrity for executive and operational teams.

Skills

- Microsoft Office Suite (Excel Expert).
- Jazz/ Jira/ Azure DevOps.
- SQL, Snowflake and Cypress
- Methodology Agile/ Scrum and Waterfall.
- SAP Success Factors, SAP GUI and STORMS.
- Perform Regression, Unit and Smoke testing.
- JSON Data Parsing & Transformation.
- Public cloud: Amazon web services, S3, EC2, BitBucket add-ons, plugins, Elasticsearch.
- Generative AI for business with MSFT AZURE OpenAI Program.

Experience

Sr. Data Analyst | DSA | Remote | Jan 2024 to Present

- Implemented AI-driven automation tools (e.g., Microsoft Copilot, ChatGPT) to streamline document workflows and reduce manual processing.
- Participated in AI strategy sessions focused on integrating generative AI and large language models into daily operations.
- Conducted data analysis using SQL and Excel to support business decisions and reporting needs.
- Created dashboards and visual reports using Power BI and Tableau for internal stakeholders.
- Worked with large datasets from data warehouses to identify trends, patterns, and actionable insights.
- Participated in Agile development cycles, collaborating with cross-functional teams to deliver data solutions.
- Authored comprehensive analytical documentation, ensuring reproducibility and transparency by maintaining all work in a team GitHub repository.
- Communicated findings through clear presentations and written reports for technical and non-technical audiences.
- Assisted in data integration efforts across departments, enhancing data accessibility and usability.
- Applied data modeling techniques to support reporting, visualization, and decision-making processes.
- Developed Python scripts to automate the ingestion and normalization of nested JSON data for reporting and analytics.
- Built and maintained data warehouses in Snowflake, enhancing data retrieval speed.

Sr. Data Analyst | National Grid | Remote | Jul 2023 to Jan 2024

- Developed custom reports and dashboards for Veeva Vault Registrations, supporting product lifecycle management.
- Automated data extraction from Vault using APIs and integrated with Power BI for real-time analytics.
- Provided training to end-users on Veeva Vault reporting capabilities and Power BI best practices.
- Employed advanced statistical methods to infer proprietary metrics from incomplete public disclosures, including reconciling non-GAAP to GAAP figures.
- Performed in-depth data analysis using SQL to extract, clean, and interpret large datasets for business insights.
- Developed and automated reports and dashboards in Excel, utilizing advanced formulas, pivot tables, and data visualization tools.
- Used Python for data manipulation, statistical analysis, and automating repetitive data processing tasks.

- Designed custom Excel-based project management tools, resulting in resolving more than 100 accounts discrepancies.

Lead Business Data Analyst | Brilliant Corp. | Remote | February 2022 to May 2023

- Performed unit and regression testing across Elasticsearch, database, and UI platforms to validate code functionality and system stability.
- Executed indexing services to populate QAQC Elasticsearch indices by scanning agency-specific buckets for new content.
- Managed access provisioning for 90+ test users by updating SQL-based Users and Organization tables.
- Led migration of 25TB of data to Snowflake on AWS, achieving a 30% reduction in data access times.
- Ingested files into the UI via AWS S3 and ran ETL job batches, ensuring timely execution and resolving issues related to authorization and access control.
- Implemented AWS services including S3, Elastic Load Balancer, and Auto Scaling groups to support scalable cloud infrastructure.
- Automated data cleaning, transformation, and analysis tasks using Python, improving workflow efficiency.
- Modeled complex Vault RIM data structures in Power BI, using DAX for advanced calculations and KPI tracking.
- Created documentation on user experience and UI-related issues, facilitating feedback loops between users and development teams.
- Developed and deployed automation scripts for cloud platform operations, including monitoring and alerting systems.
- Designed and executed complex SQL queries to extract, manipulate, and analyze large datasets for testing and validation purposes.
- Conducted reconciliation between reports using Excel, involving extensive data formatting and comparison of usage vs. estimated materials.
- Designed Power BI dashboards using data sourced from JSON files, enabling real-time insights for stakeholders.
- Collaborated with engineering teams to optimize data pipelines handling semi-structured JSON data.

Sr. Data Mapping Analyst | Kaiser Permanente | Remote | June 2021 to May 2022

- Collaborated with Kaiser's data mapping team to design high-level data mapping solutions and database structures, providing SQL code support to developers.
- Delivered comprehensive technical documentation for data mapping and modeling logic, ensuring clarity and consistency across development teams.
- Configured and maintained Epic modules (Ambulatory, Cadence, MyChart) to support clinical workflows and patient engagement.
- Developed custom reports using Epic Clarity and Reporting Workbench to support quality improvement initiatives.
- Validated, executed, and optimized SQL queries and stored procedures for efficient data loading and transformation.
- Built and maintained SQL mappings for KP.org provider applications, offering technical guidance throughout the development lifecycle.
- Used DAX formulas in Power BI to create calculated columns and measures for advanced analytics and reporting.
- Connected Power BI to various data sources (SQL Server, Excel) to enable real-time and interactive data analysis.
- Modified and implemented technical documentation in alignment with evolving project requirements.
- Created financial models and templates using Excel, incorporating Pivot Tables and Macros to streamline reporting and analysis.
- Managed the complete defect tracking lifecycle using JIRA: logging issues, generating status reports, prioritizing bugs, and maintaining detailed defect logs.

Database Application Developer | Freddie Mac. | Remote | Feb 2021 to March 2022

- Designed and developed custom UI database applications tailored to healthcare needs, collaborating with SMEs to gather requirements and implement user-centric solutions.
- Built and maintained SQL Server-based applications, creating and validating SQL code, database objects, and performing peer code reviews to ensure data integrity.
- Applied SDLC principles across all project phases, from requirement analysis and scope documentation to development, testing, and deployment.

- Utilized XAML and XML to build dynamic user interfaces and custom application components, aligning development with functional and user expectations.

Data Analyst III | Worldwide Flight Services Inc. | Remote | August 2018–August 2019

- Executed data validation and reconciliation using advanced Excel functions (VLOOKUP, PivotTables, IF statements) to ensure accuracy across HRIS records and support audit readiness.
- Developed custom reports and KPI dashboards in Workday and Power BI, enabling data-driven HR decision-making and tracking of key metrics like time-off trends and benefit enrollments.
- Configured and maintained Workday modules (Time Tracking, Absence Management, Benefits), including security administration and role-based access controls, enhancing system efficiency and compliance.
- Led system upgrades and testing efforts, including UAT and deployment phases, ensuring seamless transitions and minimal disruption to HR operations.
- Clean up data in payroll systems HRIS, ADP and AE system (like: - Position status, Naming convention, duplicate file# etc.).

Data Analyst III | Melrose Credit Union | New York | Jun 2017–August 2018

- Provided clarification and support to ETL teams for accurate data extraction and transformation.
- Coordinated with regional database teams to ensure smooth data flow from source systems, using SQL queries for validation and troubleshooting.
- Led extensive data mapping exercises to integrate source system elements into the Common Data Warehouse.
- Automated manual data profiling processes using SQL and Excel, significantly improving efficiency and accuracy.
- Compiled and analyzed data mapping findings, delivering regular reports to management for strategic decision-making.
- Created interactive dashboards using Power BI with data sourced from SQL Server and Excel, applying DAX for effective data visualization and analysis.

Lead Financial Analyst | American Express | India | October 2014 - March 2017

- Led business optimization initiatives by analyzing reporting tools, back-office systems, and payment-processing software to enhance operational efficiency.
- Facilitate month-end close process, invoicing processing, journal entries(accounting) and account reconciliation non-GAAP to GAAP figures.
- Collaborated with cross-functional teams to align business and technology goals, delivering solutions that met stakeholder requirements.
- Executed QA, system integration, and UAT testing, ensuring accurate and timely project delivery while supporting month-end close and invoice processing.

Education & Certifications

- Master Business Administration–Sikkim Manipal University, India 2014
- Bachelor – Delhi University, India 2009
- Agile at Work: Planning with Agile User Stories
- Agile Project Management: Comparing Agile Tools
- Learning JIRA software
- AWS S3 Essential Training for Architecture

Awards

- Stellar Teamwork & Accomplishment Recognition (STAR) Award at Brilliant Corporation
- Spot Bonus Award Recognition (SOAR) Award at Brilliant Corporation
- Awarded for best project and performance (ABPP) at American Express
