

Data Analyst with 3+ years of experience designing and delivering enterprise-scale analytics and reporting solutions across cloud platforms. Experienced in interpreting and analyzing data from multiple sources to support operational and business decision-making. Strong expertise in **SQL, Python, Power BI, and Tableau**, with hands-on experience in **Azure, AWS, and Snowflake** to build reliable data pipelines and reporting workflows. Proven ability to identify data irregularities, perform root-cause analysis, and communicate findings through clear visualizations and insights to both technical and non-technical stakeholders. Adept at supporting large-scale analytics initiatives, managing parallel data tasks within tight timelines, and contributing to process improvements and automation while maintaining high standards of data accuracy and compliance.

SKILLS

Languages & Databases	Python, SQL, SQL Server, MySQL
Cloud	AWS, Azure
Data Warehouse	Snowflake
BI & Visualization	Power BI, Tableau
Data Engineering	ETL/ELT Processing, EDA, Databricks
Data & Productivity Tools	Excel, Outlook
Modeling	Dimensional Modeling (Star/Primary, Snowflake), SSAS (Tabular Models), Data Governance

EXPERIENCE

Tata Consultancy Services | Hyderabad, India

Data Analyst II

NOV 2022 — JUL 2023

- Designed scalable **Power BI data models** using **star schema**, relationships, and calculated tables to support consistent KPI reporting.
- Developed complex **DAX** measures for time intelligence, conditional metrics, rankings, and dynamic filters to support business analysis.
- Integrated data from **Snowflake, Azure SQL Database**, and cloud-based sources into BI tools for reporting and analysis
- Developed **SQL-based transformation pipelines** to ingest, clean, and aggregate raw operational data into analytics-ready structures
- Used **Python** to perform exploratory analysis and apply **descriptive and inferential statistical methods** (trend analysis, distributions, hypothesis testing) to validate insights and support data-driven decisions in databricks.
- Performed advanced data analysis using **Python** to identify patterns, anomalies, and operational improvement opportunities.
- Used **Power Query (M)** in Power BI to clean, transform, and standardize data from multiple upstream systems.
- Built SQL-based **data quality checks** and validation logic to ensure accuracy before publishing dashboards.
- Collaborated with stakeholders to design analytical reporting architecture and deliver **end-to-end analytics** solutions.

Data Analyst I

NOV 2020 — NOV 2022

- Built and maintained analytical dashboards in **Tableau** used for recurring business reviews and stakeholder decision-making.
- Developed and supported analytics workflows using **AWS** services to process enterprise datasets for reporting and business analysis.
- Designed and maintained reporting schemas in **Amazon Redshift** for efficient analytical querying.
- Built complex **SQL queries** to transform and structure data from raw ingestion layers into reporting-ready datasets.
- Developed **Tableau and Power BI dashboards** to present operational performance and business insights.
- Performed **exploratory data analysis** and basic statistical validation to identify trends, anomalies, and data patterns.
- Cleaned and prepared raw datasets using Python (**Pandas, NumPy**) and SQL, addressing missing values, inconsistencies, and data quality issues.
- Used Excel to perform quick exploratory analysis and data validation using pivot tables, filters, and lookup functions to support ad-hoc business questions and stakeholder reviews.
- Collaborated with engineering and analytics teams to analyze data in Databricks, iterating on queries and transformations to refine insights and improve reporting accuracy.

EDUCATION

Bachelor's of Technology in Computer Science

2016 — 2020

Vishnu Institute of Technology

CERTIFICATIONS

- Data Analyst Certification from Udemy
- Certified as System Architect in Pega
- Certified as Senior System Architect in Pega
