Education

Trine University

Master of Science Business Analyst

Jan 2023-Current

GPA: 3.9/4.0

- Courses:** Data Mining, Business Intelligence, Predictive Analytics, Data Visualization, Statistical Analysis, Machine Learning, SQL for Business Analytics, Big Data Analytics, Capstone.

B.A. in Fashion Design, INIFD (Annamalai University), India

Jul 2017- Jun 2019

GPA : 8.99/10

Skills & Certifications

Programming Languages: Python, SQL

Libraries: Pandas, Numpy

Data Visualization: Tableau, Power BI , Jira

Core Competencies: Data visualization, Data analysis, Supervised and Unsupervised techniques, Statistical Modeling, Cleaning, Wrangling, Statistical Analysis, Modeling, Design Analytics & Trend Prediction, Predictive models, Machine Learning, Exploratory Data Analysis, Data Preprocessing, Data Handling, Problem-Solving, Gen AI.

Government & Compliance Analytics (DHS, ICE)

Certifications: AWS Cloud Technical Essentials | Foundations: Data, Data, Everywhere | Programming for Everybody (Python) | SQL for Data science with R | Introduction to R Programming | Dashboards with Excel and Cognos | Introduction to Data Analytics

Experience

Jpmorgan chase| Financial Analyst

AustinTx

April 2024 - Dec 2024

- Created Tableau dashboards to visualize key business metrics, improving data-driven decision-making.
- Developed extract data sources by summarizing datasets, optimizing data handling for better performance.
- Assisted in improving dashboard performance, reducing load times for a more efficient user experience.
- Built interactive Power BI reports to track sales, orders, and financial trends for business insights.
- Executed SQL queries to clean, transform, and analyze data, ensuring accuracy in reports.
- Conducted data validation using SQL to identify and resolve discrepancies, improving data integrity.
- Participated in team discussions and requirement gathering to align data visualization with business needs.

Genamplify Solutions Hub | Data Analyst

Hyderabad

Feb 2023 - Dec 2023

- Designed and implemented Data Analytics solutions using Data Modeling and Enterprise Data Warehousing methodologies.
- Developed advanced analytics strategies to identify and solve business problems in the US Healthcare domain.
- Collaborated with leadership and clients to define data-driven solutions and governance models.
- Analyzed large datasets using SQL, Hive, and Sqoop to extract insights and drive decision-making.
- Created interactive dashboards and reports using Power BI and Power Automate to visualize key business metrics.
- Led end-to-end project delivery, from data exploration and cleaning to reporting and strategic recommendations.
- Enhanced data quality and operational efficiency by leveraging Python, SQL, and R for data processing and analysis.

Innogenit | Data Analyst

Hyderabad

Jan 2018- 2021

- Collected, cleaned, and processed large datasets from multiple sources to ensure data accuracy for business reporting.
- Created interactive dashboards and reports in Power BI and Tableau to visualize sales, operations, and customer insights.
- Conducted exploratory data analysis (EDA) to identify trends, patterns, and anomalies for better decision-making.
- Automated routine reporting tasks using SQL queries, improving efficiency and reducing manual efforts.
- Generated ad-hoc reports to support marketing, sales, and operational strategies.
- Collaborated with cross-functional teams to define KPIs and data-driven performance strategies.

Projects

2023 - 2025

Law Enforcement Data Analysis for DHS & ICE (Confidential Project)

- Analyzed large datasets related to immigration enforcement and public safety using **SQL and Python**.
- Developed **interactive dashboards in Tableau and Power BI** to visualize case trends and operational insights.
- Assisted in **fraud detection and risk assessment** by identifying anomalies in government data
- Ensured **compliance with federal regulations**, improving data accuracy and governance.
- Data Analyst Salaries in the USA** - Analyzed 800+ roles to identify salary disparities across states. Used Python and Pandas for data processing Tableau for interactive visualizations.
- Data Analyst in the USA**- Created interactive dashboards using both Tableau and Power BI to analyze geographical trends, job demands and salary variations. Delivered actionable insights for optimizing hiring strategies.
- Customer Purchase Trend Analysis**- Conducted RFM analysis with Python, SQL, and Tableau to identify customer segments and revenue opportunities. Built dashboards for decision-making
- Marketing Campaign Analysis** -Visualized engagement metrics using SQL and Power BI, achieving a 15% engagement boost and optimizing future campaign strategies.
