SKILLS

Programming Languages:

Python, SQL, R

Visualization Libraries: Matplotlib, ggplot2, Alteryx, Seaborn, Pandas, NumPy

Analytical Tools: Google Workspace, Microsoft Excel (VBA, VLOOKUP, Pivot table)/ PowerPoint, Adobe Analytics, Tableau, PowerBI, Alteryx

EDUCATION

The University of Texas at Dallas, USA Master's in Computer Engineering

Aug 2022 - May 2024

Coursework: Statistics for Data Science, Database Design, Machine Learning, Design and Analysis of Algorithm

Nagpur University, India Bachelor's in Industrial Engineering

Aug 2017 - May 2021

Coursework: Management Information System, Supply Chain Management, Operation Research, Statistics and Analytics

CERTIFICATES

Advance certification program in Data analytics - Excelr (Ongoing)

Data Analyst Associate - DataCamp

WORK EXPERIENCE

Data Analyst

Community Dreams Foundation

August 2024 - Present

- Analyzing energy incentive plans to determine the most utilized programs across industrial, commercial, and household sectors, identifying key energy providers and usage patterns.
- Conducting data collection and reporting to ensure accurate insights, while enhancing decision-making processes by extracting actionable insights through the development of interactive Power BI dashboards.
- Optimizing databases and performing exploratory data analysis using Python and SQL to improve data processing efficiency.

Marketing Analyst (Student Supervisor)

The University of Texas at Dallas

April 2023 - May 2024

- Uncovered actionable insights into student engagement in university activities and social interactions using powerful data visualization tools like Excel and Tableau.
- Delivered engaging presentations filled with insights to executive teams, shaping strategies that significantly enhanced student engagement and campus life.

PROJECTS

Analysis of Renewable Subsidy Programs in Arizona

April 2024 - August 2024

- Utilized Python (Pandas, NumPy) to analyze over 15,000 records, uncovering trends in subsidy programs, sectors, and renewable technologies.
- Created visualizations with Matplotlib and Seaborn to highlight key insights and support evidence-based strategies.

Comprehensive Predictive and Statistical Analysis on Diverse Datasets

July 2023 - November 2023

- Designed analytical dashboards for visual insights using Tableau, Power BI, Excel, SQL and Alteryx for customer data analysis, website traffic pattern analysis, sales analysis, and cost-benefit analysis.
- Used linear regression, time series analysis, and random forest model for predictive analysis across all datasets.

Telemedicine Database Management System

August 2022 - December 2022

- Designed and implemented a scheduling system for doctor-patient appointments, streamlining the booking process and enhancing efficiency.
- Developed a relational database in MySQL to manage doctor and patient data, ensuring secure and organized data storage.
- Created and optimized complex queries to simplify and automate the scheduling process for all appointment requests.
