Professional Summary

Experienced and results-driven **Data Engineer** with over 5 years of success delivering scalable, high-performance data platforms across cloud-native architectures. Specialized in real-time streaming, lakehouse design, and production-grade ETL using **Spark, Kafka, Databricks, Airflow, and Snowflake**. Proven ability to cut latency, automate pipelines, and enable data-driven decisions in enterprise environments. Adept at solving complex data challenges with clean, efficient, and testable code.

Professional Experience

Brook Mays Music

Dallas, TX

Senior Data Engineer

Apr 2025 – Present

- Migrated enterprise systems to **Azure Synapse + Delta Lake**, increasing query speed by 60%.
- Built real-time streaming architecture with **Kafka, Spark Structured Streaming, and Azure Event Hubs**.
- Automated batch and streaming ETL flows using **Databricks and ADF**, reducing manual efforts by 80%.
- Delivered CI/CD pipelines with **GitHub Actions** and validated data using **Great Expectations**.

Wipro Limited

New Jersey, USA

Data Engineer

Jan 2024 – Dec 2024

- Delivered a **Customer 360 platform** using **Snowflake and dbt**, integrating CRM, billing, and product data.
- Designed event-driven ingestion pipelines with **Azure Stream Analytics + PySpark** for 50M+ daily records.
- Reduced cloud infrastructure cost by 25% through warehouse tuning and transformation optimization.

University of North Texas

Denton, TX

Graduate Research Assistant

Jan 2023 – Dec 2023

- Developed IoT pipelines using **Azure IoT Hub → Databricks → Power BI** for real-time analytics.
- Created predictive maintenance models with **ARIMA, Prophet** and integrated anomaly alerts.
- Benchmarked distributed compute clusters and managed experiments using **MLflow**.

Capgemini

Bangalore, India

Software Engineer

Jan 2022 – Dec 2022

- Designed data pipelines using **AWS Glue + Apache Airflow** for enterprise analytics.
- Improved Redshift query performance by 30% via schema redesign and materialized views.
- Automated SLA monitoring and pipeline recovery for high-availability systems.

Wipro Limited

Bangalore, India

Python Developer

Jan 2021 – Dec 2021

- Developed Python-based ETL scripts and deployed Flask APIs using **Docker + Jenkins**.
- Reduced manual operations by 40% by automating internal workflows with Django.
- Integrated external APIs for business logic workflows using PostgreSQL.

Technical Skills

Languages: Python, SQL, Bash

Data Engineering: Apache Spark, PySpark, Kafka, dbt, Airflow, Databricks, ADF

Cloud & Tools: Azure, AWS (Glue, Redshift), GCP (BigQuery)
Data Platforms: Snowflake, Delta Lake, Redshift, BigQuery
Automation: Docker, Terraform, GitHub Actions, Jenkins
Monitoring: Great Expectations, MLflow, Prometheus, Grafana
Databases: PostgreSQL, SQL Server, MongoDB
Visualization: Power BI, Tableau
Practices: CI/CD, DataOps, MLOps, GDPR/HIPAA, Data Modeling (Star/Snowflake)

Key Projects

Data Lakehouse Modernization (2025): Migrated legacy OLAP systems to **Delta Lake + Azure Synapse**, optimizing refresh latency. Rebuilt 30+ ETL pipelines with PySpark and integrated lineage validation using dbt. Enabled multi-region access and cost-effective data layers for analytics use cases.

Customer 360 Platform (2024): Engineered Snowflake-based unified view of CRM, billing, and product usage data. Enabled churn modeling and personalization through integrated dashboards. Used dbt Cloud for modular transformation and collaborative version control.

IoT Analytics for Predictive Maintenance (2023): Built real-time pipelines from **Azure IoT Hub** to Databricks and Power BI for manufacturing metrics. Implemented anomaly detection reducing unplanned outages by 35%. Integrated feedback loops to refine predictive accuracy over time.

Healthcare Claims ETL (2022): Developed HIPAA-compliant ETL workflows using AWS Glue for claims and policy data. Created Redshift dashboards for lifecycle and utilization insights. Implemented data validation and SLA alerts with Redshift Spectrum.

Education

University of North Texas
Master of Science – Artificial Intelligence
GPA: 3.66

Denton, TX
2023 – 2024

Presidency University
Bachelor of Technology – ECE
CGPA: 7.59

Bangalore, India
2018 – 2022

Certifications

2022: Databricks Certified Developer – Apache Spark

2022: Advanced SQL – Great Learning Academy

2021: IoT Product Development – Presidency University
