SUMMARY

Oracle Certified **Java Full Stack Developer** with **2 years** of experience. Highly proficient in a diverse range of programming languages, including **Java, JavaScript, SQL, HTML, and CSS**. Experienced in leveraging tools, microservices, and frameworks such as **Spring Boot, Spring MVC, Hibernate, ReactJS, NodeJS, Docker** and **Git** to drive efficient application development and maintenance. Proven experience in designing robust data solutions using databases like **Oracle, MySQL, and MongoDB**. Committed to continuous learning and staying updated with industry trends to implement innovative technologies and practices. Experienced in **automating CI/CD pipeline** with **Jenkins, Docker & Kubernetes** integrating codebase from **GitHub**, and deploying to **Tomcat** server on **AWS EC2**. Skilled in deploying and managing applications on **AWS** (EC2, RDS, VPS, IAM, Load Balancing, Auto-Scaling, S3, Route 53, EFS), **GCP**.

CERTIFICATIONS

❖ **Oracle Certified Professional – Java SE 17 Developer**

TECHNICAL SKILLS

- Programming Languages: **Java, JavaScript, PL/SQL, HTML, CSS**
- Frameworks and Tools: **Spring 5 (Spring Data/Security), Spring Boot, MERN Stack (MongoDB, Express, ReactJS, Node.js), jQuery, Bootstrap, Mongoose, Git**
- Database: **Oracle, MySQL, MongoDB**
- Build Tools & DevOps: **Maven, Jenkins, GitHub, Docker, Kubernetes**
- Application Servers: **Tomcat, NodeJS**
- Cloud Computing: **AWS (EC2, VPC, S3, IAM), GCP**
- Web Services: **REST**
- Development Methodologies: **Agile, Scrum Meetings, CI/CD, Restful APIs, Microservices**

PROFESSIONAL EXPERIENCE

Java Full Stack Developer | SynergisticIT, Fremont, CA (May 2022 - Present)

Project: Hotel Reservation Gateway

Apr 2024 - Current

Created an interactive web portal that allows customers to select hotels, reserve rooms, and evaluate services, while empowering hotel managers to monitor feedback and respond to guest inquiries. Leveraged **Java 17, Hibernate, and Spring 5** to build a robust backend infrastructure, enabling the handling of complex queries related to booking criteria such as location, guest count, ratings, pricing, and amenities.

Skill Sets Involved: **Java, Spring 5, HTML 5, JSP, jQuery 3/Ajax, Bootstrap, Postman, Oracle, Maven, Tomcat 9, GitHub, AWS - EC2, S3, IAM, SNS, Spring security, JavaScript.**

Back-end Development: Applied core **Spring framework** technologies, including dependency injection, beans, aspect-oriented programming (AOP), and **Spring Boot**, to streamline application development.

- Worked closely with a development team to deliver **RESTful web services**, utilizing GitHub for version control to maintain code integrity and foster effective collaboration.
- Implemented a **microservices architecture** to improve system modularity and scalability, leading to enhanced application performance.
- Established secure user authentication mechanisms with **Spring Security** to strengthen data security across various platforms.
- Designed and implemented a **CI/CD pipeline** using **Jenkins** to automate build, test, and deployment processes, leveraging **Docker** for consistent containerized environments across development and production, improving deployment speed, reliability, and scalability.
- Designed and deployed **Kubernetes** clusters to manage microservices scaling, load balancing, and automated rollouts.

Front-end Development: Implemented custom input validations and used Bootstrap with CSS to create a visually appealing and user-friendly front-end interface.

- Utilized **jQuery**, **AJAX**, and **JavaScript** to build a responsive front-end, enabling dynamic content loading and supporting diverse request types.
- Developed asynchronous data fetching methods to enhance user experience and real-time interaction, thereby improving the overall functionality and engagement of the system.

Java Full Stack Developer | SynergisticIT, Fremont, CA

Project: Auto Insurance Portal

Aug 2023 – Mar2024

Designed and implemented a web-based auto insurance application, leveraging **Java 17**, **Spring 5**, and **hibernate** to optimize both front-end and back-end processes. Improved user experience with a streamlined **API** gateway, facilitating smoother transaction flows from account setup to booking completion. This project highlighted my proficiency in using technologies such as **HTML**, **Bootstrap**, **JavaScript**, and **jQuery** for front-end development, as well as integrating advanced cloud solutions to ensure scalability and reliability.

Skill Sets Involved: **Java 17**, **Spring 5**, **Hibernate**, **Stripe API**, **OpenAI API**, **Postman**, **Maven**, **Tomcat**, **Oracle**, **Git**, **AWS**, **iText**, **Bootstrap**

Back-end Development: Employed core **Spring framework** features such as dependency injection, beans, aspect-oriented programming (AOP), and **Spring Boot** to streamline application development.

- Implemented a **microservices architecture** to improve system modularity and scalability, enhancing overall application performance.
- Developed secure user authentication systems with **Spring Security** to bolster data protection across various platforms.
- Applied **Spring Data JPA** and **Hibernate ORM** for efficient data handling and interactions with the **Oracle database**.
- Leveraged Jenkins to implement a **CI/CD pipeline** for the hotel microservices project, automating build, test, and deployment processes to improve deployment speed, reliability, and consistency across environments.
- Designed fault-tolerant architecture by deploying microservices across multiple **Kubernetes** nodes to prevent downtime during node failures.

Front-end Development: Implemented customized input validations and utilized **Bootstrap** along with **CSS** to design an engaging and user-friendly front-end interface.

- Developed interactive and intuitive user interfaces with **HTML**, **Bootstrap**, **JavaScript**, and **jQuery**, boosting site interactivity and user engagement.
- Designed responsive layouts that adjust seamlessly across various devices, enhancing accessibility and overall user experience.

Java Full Stack Developer | SynergisticIT, Fremont, CA

Project: Airline Reservation System

Dec 2022 – Jul 2023

Created an extensive web-based airline reservation system, integrating advanced backend technologies such as **Spring Security** and **Hibernate** with front-end technologies including **HTML**, **Bootstrap**, and **JSP**. The system adeptly managed authentication, **RESTful API** interactions, and database operations using **Spring JpaRepository** and **MySQL**. My role in

developing the project with **Maven** and optimizing complex functionalities showcases my full-stack development skills and ability to blend various technologies to deliver a cohesive user experience.

Skill Sets Involved: **Java 17, Spring MVC, Spring Security, Hibernate, Maven, Tomcat 9, HTML, AWS, Bootstrap, JSP, MySQL.**

Back-End Development: Utilized essential **Spring framework** technologies such as dependency injection, beans, aspect-oriented programming (AOP), and **Spring Boot** to streamline application development.

- Developed the application using **Spring MVC**, including creating and testing **REST API** endpoints with **Postman**.
- Implemented role-based access control with **Spring Security** to manage authentication and authorization.
- Performed unit and regression testing with **JUnit** and **Mockito** to ensure comprehensive and reliable testing.
- Developed a robust **CI/CD pipeline** with **Jenkins** to streamline build, test, and deployment workflows, utilizing **Docker** to ensure consistent and portable environments across stages, resulting in faster, more reliable, and scalable deployments.

Front-End Development: Employed **HTML, Bootstrap**, and **JSP** to create a user-focused and engaging interface for the airline reservation application.

- Designed intuitive and user-friendly web pages using **JSP** and **Bootstrap**, with an emphasis on clean layouts and smooth navigation.
- Used **Spring MVC** to dynamically render content and manage user interactions, improving responsiveness and performance.
- Enhanced user experience with a responsive and accessible front-end using **HTML, Bootstrap**, and **JSP technologies**, ensuring both visual appeal and functionality.

Java Full Stack Developer | SynergisticIT, Fremont, CA

Project: E-Commerce Application

May 2022 – Nov 2022

Employed the **MERN Stack** within a **Service-Oriented Architecture (SOA)** to enhance web development. I designed smooth user interfaces using **React** and **Redux**, integrating **Thunk** and **Redux Promise** to optimize interactions and data management. The deployment included robust **CRUD** operations via **RESTful APIs**, following **REST** principles and ensuring secure HTTP/S protocols.

Skill Sets Involved: **Vanilla JavaScript (Object Oriented JS), ES6 EcmaScript-6, NODEJS Framework, Express Framework MongoDB Basics with Mongoose, HTML5 and Browser Specifications, React Library, Redux Library, Web Pack Basics, React Router for standard navigation, Promise (data calls and modularization)**

Back-end Development: Played a key role in building a robust backend infrastructure with **Node.js** and **Express.js**, establishing **RESTful APIs** to facilitate efficient communication between the frontend and **MongoDB** database.

- Designed and managed the database schema using **Mongoose** with **MongoDB**, ensuring smooth integration with the **Node.js** application.
- Implemented **Redux** for advanced state management and integrated **Thunk** middleware to handle asynchronous operations, enhancing system scalability and reliability.
- Developed secure user authentication and role-based authorization systems, significantly improving system security and compliance.
- Added coupon code functionality and developed persistent shopping cart features, increasing user engagement by 15% through enhanced shopping capabilities
- Leveraged **Jenkins** to implement a **CI/CD pipeline** for the hotel microservices project, automating build, test, and deployment processes to improve deployment speed, reliability, and consistency across environments.

Front-end Development: Contributed to creating a responsive and user-friendly front-end with **React**, ensuring an engaging shopping experience for customers.

- Used **React-Bootstrap** to design visually appealing UI components, improving the portal's design and usability.
- Implemented **Redux** for consistent and predictable state management, handling complex features like cart management and user authentication.
- Assisted in integrating **Thunk** middleware to efficiently manage asynchronous actions, such as retrieving product data and processing checkout transactions, reducing response times by 30%.

Education

Bachelor of Science, *Business Information Systems* | University of California, Riverside
