Business Analyst | Data Analyst | MS Business Analytics Candidate | Ex-Senior Software Engineer

PROFILE SUMMARY

Business Analyst & Data Analyst with 2+ years of experience in predictive analytics, data pipelines, business intelligence reporting, and stakeholder-driven business solutions. Skilled in SQL, Python, Power BI, Tableau, forecasting, machine learning models and KPI reporting to support data-informed decision-making.

EDUCATION

University of Cincinnati, Carl H. Lindner College of Business

Master of Science, Business Analytics | CGPA: 3.9

Cincinnati, Ohio

Expected: December 2025

Jawaharlal Nehru Technological University

Bachelor of Technology, Electrical and Electronics Engineering

Hyderabad, India

May 2022

WORK EXPERIENCE

Market Research Analyst – University of Cincinnati

August 2024 – May 2025

- Conducted experimental consumer research using survey analytics, behavioral modeling, and experimental design.
- Applied supervised learning (classification, regression), factor analysis, and clustering in Python to analyze behavioral drivers.
- Built end-to-end NLP pipelines (sentiment analysis, text mining, binary classification) to process open-ended responses, extract key themes, generate actionable insights, and automate reporting for academic and stakeholder presentations.

Senior Software Engineer - LTIMindtree

July 2022 – July 2024

- Led a 7-member cross-functional team as a client-facing Business Analyst, gathering requirements, aligning deliverables across IT, operations, and business units, and delivering analytics solutions on sales trends, inventory tracking, and warehouse optimization.
- Designed and deployed Power BI dashboards to monitor sales trends, warehouse inventory, and part-level performance, enabling cross-functional visibility and reducing reporting cycle time by 45%.
- Automated reporting workflows and SQL-based data pipelines to track sales orders, shipments, and inventory movement, reducing manual processing time by 60%.
- Built predictive models (Random Forest) to identify parts with high return risk based on historical sales and defect data, improving quality control decision-making and reducing part return-related warehouse delays by 25%.
- Conducted monthly stakeholder reviews to align evolving business needs and translated them into actionable data solutions.

Event Head Intern - Pash

November 2021– January 2022

- Managed data-driven engagement campaigns and coordinated events for 2000+ students, leveraging survey insights and digital analytics to boost participation by 20% and optimize campaign performance.
- Created KPI dashboards and post-event evaluation reports in Excel to track campaign effectiveness and identify growth opportunities in outreach and content engagement.

ACADEMIC PROJECTS

Forecasting Cincinnati Police Crash Trends - R, Tableau

- Built and validated ARIMA and Prophet models using R to analyze traffic crash trends; developed Tableau dashboards and business reports that translated complex data into actionable insights for decision-making.

AI Medical Assistant – Python, Whisper, LLaMA 3

- Built and deployed an AI-powered Streamlit app integrating Whisper for speech-to-text, LLaMA 3 for medical summarization and Q&A, SentenceTransformer for embeddings, and FAISS for semantic search to enable real-time medical data extraction, retrieval, and analysis.

NIOSH Risk Analytics – Excel, SQL, R, Tableau

- Analyzed 9 years of injury data using SQL, R, and Excel to identify regional risk trends, severity patterns, and exposure rates; built automated Tableau dashboards with KPIs to visualize insights and support safety actions, insurance underwriting, and operational risk decisions.

SKILLS

- Certifications:** Python, SQL, Agile Foundations
- Languages & Tools:** SQL, Python, R, Excel (Advanced), Tableau, Power BI, AWS Redshift, FAISS, SentenceTransformer
- Analytics & Data Tools:** Predictive Analytics, Time Series Forecasting, NLP, Supervised Learning, Classification, Clustering, A/B Testing, Data Mining, Data Warehousing, ETL Pipelines, KPI Reporting
- Business & Collaboration Skills:** Business Requirements Gathering, Stakeholder Management, Agile/Scrum, Strategic Problem Solving, Cross-functional Collaboration, Executive Reporting, Technical Communication, Data-Driven Decision Making, Metrics Tracking
