

# Deeksha Sharma, MPH, BDS

713-933-9138 | deeksharma1904@gmail.com | [deekshasharmawork.carrd.co](mailto:deekshasharmawork.carrd.co) | [linkedin.com/in/drdeeks](https://www.linkedin.com/in/drdeeks)

## EDUCATION

**University of Texas Health Science Center, Houston** | *MPH in Epidemiology & Data Science Certificate*  
GPA: 3.94; Recipient of **Dean's Scholarship** and **Delta Omega Honorary Society**

May 2025

**Pt. BD Sharma University of Health Sciences** | *Bachelor of Dental Surgery*

Nov. 2015 - Nov. 2019

## RESEARCH EXPERIENCE

**Research Coordinator** | *Michael and Susan Dell Center for Healthy Living*

Jan. 2023 – Present

- Designed and conducted longitudinal cohort studies for the Preschool Development Grant Birth to Five, implementing rigorous epidemiologic methods and data management strategies to assess health intervention outcomes across diverse populations
- Developed comprehensive data collection protocols and conducted 30+ structured interviews with community stakeholders, designing centralized REDCap database systems to streamline multi-site research workflows and improve data coordination efficiency by 40%
- Conducted advanced statistical analyses of 270+ longitudinal records using NVivo and Atlas.ti for qualitative analysis and R for quantitative modeling, applying epidemiologic methods including survival analysis and risk factor identification to drive evidence-based health intervention recommendations
- Applied sophisticated statistical programming including logistic regression, spatial analysis, and longitudinal data modeling in R and SAS to identify at-risk populations and inform targeted clinical interventions, ensuring data integrity through rigorous quality control protocols
- Maintained active CITI certification in Good Clinical Practice (GCP) through 2026, ensuring ethical compliance and regulatory adherence in population health research

**Research Associate** | *UTHealth Houston School of Public Health*

Jan. 2025 – Apr. 2025

- Conducted population-based epidemiologic research using advanced spatial and statistical analyses in ArcGIS Pro, R, and Python with Dr. Jack Tsai to identify healthcare access disparities across 500+ Federally Qualified Health Centers, focusing on vulnerable populations
- Integrated and analyzed large-scale federal datasets (HUD, HRSA) using SQL and Python, applying epidemiologic methods to assess health disparities and inform data-driven public health policy recommendations
- Authored peer-reviewed manuscript featuring quantitative epidemiologic findings and evidence-based recommendations for reducing healthcare access inequities, demonstrating proficiency in scientific writing and publication processes

**Epidemiology Intern** | *Own Every Piece*

May 2024 – Aug. 2024

- Developed evidence-based health communication materials, including comprehensive dissemination guides to improve population health education on reproductive health and disease prevention, reaching over 1,500 community stakeholders
- Designed interactive epidemiologic surveillance dashboards using Tableau to track demographic patterns and health intervention outcomes, improving reporting efficiency and increasing community partner engagement by 30%

**Graduate Research Assistant** | *Department of Epidemiology, UTHealth School of Public Health*

Sep. 2023 – Dec. 2023

- Coordinated clinical trial research activities for CATCH Healthy Smiles, an NIH-funded oral health intervention study with Dr. Shreela Sharma, managing IRB-approved protocols for 200+ families and students across 20+ Texas schools
- Implemented epidemiologic study design protocols including structured data collection, database management using SQL and STATA, and adherence to Good Clinical Practice standards, ensuring high data integrity for longitudinal health outcome analysis
- Developed quality assurance protocols aligned with NIH regulatory requirements, enhancing data accuracy and completeness by over 40% through systematic validation procedures for epidemiologic research applications

## INDUSTRY EXPERIENCE

**Healthcare Research Associate** | *Gerson Lehrman Group*

Jan. 2022 – June 2023

- Analyzed healthcare epidemiologic trends and clinical research data to produce 400+ evidence-based reports guiding strategic decisions for major consulting firms including Bain and BCG, with focus on population health and clinical research sectors
- Coordinated expert consultation networks with healthcare professionals and research scientists, conducting targeted interviews on clinical trial methodologies, epidemiologic study design, and regulatory compliance for evidence-based decision-making
- Developed specialized research products including epidemiologic literature reviews and health policy analyses, supporting integration with Bloomberg Terminal's AI platform and boosting client engagement by 25%
- Managed scientific content workflows, ensuring editorial integrity and adherence to research standards in healthcare communications and epidemiologic data presentation

**Clinical Documentation Specialist (Scribe)** | *IKS Health*

May 2021 – Dec. 2021

- Created structured clinical data documentation for epidemiologic research applications using EHR systems including EPIC and NextGen, supporting quality data collection and systematic health outcome tracking
- Developed standardized clinical reporting protocols for patient findings and treatment outcomes, ensuring comprehensive medical records suitable for epidemiologic studies and population health research

- Conducted patient examinations, diagnostic imaging interpretation, and dental disease assessments to support clinical research on oral health and infection control.
- Organized community oral health camps, delivering education and counseling on tobacco cessation to reduce infection risks and improve preventive health outcomes.
- Performed infection control-focused dental procedures, adhering to strict clinical protocols to minimize cross-contamination and support patient safety.

## SKILLS

### CORE COMPETENCIES

Epidemiologic Research: Longitudinal Study Design • Survival Analysis • Case-Control Methods • Population Health Research • Disease Surveillance • Risk Factor Analysis • Biostatistical Modeling

Statistical Programming & Analysis: Advanced R Programming • SAS Statistical Analysis • Python Data Science • SQL Database Management • Regression Modeling • Survival Analysis • Longitudinal Data Analysis

Research Collaboration: Scientific Writing & Publication • Peer Review Process • Cross-functional Research Teams • External Research Collaborations • Grant Writing Support • Literature Reviews

### TECHNICAL PROFICIENCY

Statistical Software: R (Advanced), SAS, Python, STATA, SQL | Epidemiologic Tools: REDCap, ArcGIS Pro, Survival Analysis Packages | Research Platforms: NVivo, ATLAS.ti, EndNote | Data Visualization: Tableau, matplotlib, seaborn, ggplot2 | Documentation: Quarto, Markdown, MS Office Suite
