

Deeksha Sharma, MPH, BDS

Houston, TX | Open to Relocation | 713-933-9138 | deeksharma1904@gmail.com | deekshasharmawork.carrd.co | linkedin.com/in/drdeeks

Epidemiologist skilled in advanced statistical analysis and managing large state-level trials. Experienced in study design, protocol adherence, data analysis, and interpretation in clinical research. Proven contributor to focused interviews, grant writing, manuscripts, and presentations. Committed to delivering high-quality data and innovative public health solutions.

EDUCATION

University of Texas Health Science Center, Houston | *MPH in Epidemiology & Data Science Cert.* **May 2025**
• Recipient of **Dean's Scholarship** and the **Delta Omega Honorary Society**.

Manav Rachna Dental College, Faridabad | *Bachelors in Dental Surgery* **Nov. 2019**

EXPERIENCE

Research Associate | *UTHealth Houston School of Public Health* **Jan. 2025 – Apr. 2025**

- Conducted advanced spatial and statistical analyses using ArcGIS Pro and Python with **Dr. Jack Tsai** to identify healthcare access disparities across 500+ Federally Qualified Health Centers, focusing on vulnerable homeless populations
- Integrated, cleaned, and analyzed multi-source federal datasets (HUD, HRSA) to inform data-driven public health policies and improve primary care service delivery.
- Co-authored a peer-reviewed manuscript featuring quantitative findings and evidence-based recommendations to reduce healthcare access inequities.

Graduate Research Assistant | *Michael and Susan Dell Center for Healthy Living* **Jan. 2023 – May 2025**

- Coordinated evaluation activities for the Preschool Development Grant Birth to Five under **Dr. Dorothy Mandell**, enhancing program impact assessment through rigorous data management and analysis.
- Conducted 30+ grantee interviews and designed a centralized REDCap database to streamline data collection and coordination, significantly improving evaluation workflow.
- Conducted qualitative analysis of **270+** quarterly reports using (**NVivo & Atlas.TI**), extracting key insights to inform early childhood intervention strategies and strengthen coalition partnerships.
- Ensured data quality and compliance with Good Clinical Practice (GCP) standards (CITI certified through 2026).
- Applied statistical methods including logistic regression and spatial analysis in STATA on at-risk child datasets to support targeted clinical interventions.

Research Associate | *Own Every Piece* **May 2024 – Aug. 2024**

- Developed the Trusted Adults Dissemination Guide on Canva to improve caregiver-teen communication on reproductive health and sexually transmitted infection (STI) prevention, reaching over 1,500 community stakeholders.
- Designed and implemented an interactive Tableau dashboard tracking demographic and engagement metrics related to teen pregnancy and STI education programs, improving reporting efficiency and increasing community partner retention by 30%.

Graduate Research Assistant | *Department of Epidemiology, UTHealth School of Public Health* **Sep. 2023 – Dec. 2023**

- Coordinated IRB-approved informed consent procedures for CATCH Healthy Smiles, an NIH-funded oral health clinical trial with **Dr. Shreela Sharma** with 200+ families and students across 20+ Texas schools, ensuring ethical compliance and participant safety in a large-scale oral health clinical trial.
- Managed structured data collection and database systems using SQL and R, maintaining strict adherence to Good Clinical Practice (GCP) standards (CITI certified), ensuring high data integrity and reliability.
- Developed and implemented quality assurance and quality control (QA/QC) protocols aligned with NIH regulatory requirements, enhancing data accuracy and completeness by over 40%.
- Contributed to infection prevention efforts by supporting a clinical trial focused on oral health, a key component in reducing microbial transmission and improving community health outcomes.

Senior Healthcare Research Associate | *Gerson Lehrman Group* **Jan. 2022 – June 2023**

- Analyzed healthcare market trends and clinical data to produce 400+ evidence-based reports guiding strategic investment decisions for major firms including Bain and BCG, with a focus on public health and clinical research sectors.
- Curated and moderated expert interviews with former C-suite executives, healthcare professionals, and industry leaders covering clinical trial phases, drug development lifecycle, and regulatory compliance relevant to infection prevention and epidemiologic research.
- Supported integration of GLG's expert knowledge base with Bloomberg Terminal's AI-powered search platform (DS GO), enhancing access to up-to-date clinical and epidemiological content, boosting client engagement by 25%.
- Developed a leading newsroom model delivering high-impact healthcare content focused on clinical research and public health, contributing significantly to platform revenue and information dissemination.
- Managed content workflows ensuring editorial integrity and adherence to regulatory and ethical standards in healthcare communications.

Clinical Documentation Specialist (Scribe) | IKS Health**May 2021 – Dec. 2021**

- Created HIPAA-compliant, accurate clinical documentation for endocrinology and orthopedic outpatient visits using EHR systems including EPIC and NextGen, supporting quality patient care and data integrity.
- Developed structured clinical notes summarizing patient findings, diagnoses, and treatment plans, ensuring clear and comprehensive medical records for research and clinical use.
- Ensured timely and precise population of patient data in electronic health records, facilitating efficient clinical workflows and reliable data capture for epidemiologic and infection prevention studies.

Dental Intern | Manav Rachna Dental College**Nov. 2019 – Jan. 2021**

- Conducted patient examinations, diagnostic imaging interpretation, and dental disease assessments to support clinical research on oral health and infection control.
- Organized community oral health camps, delivering education and counseling on tobacco cessation to reduce infection risks and improve preventive health outcomes.
- Performed infection control-focused dental procedures, adhering to strict clinical protocols to minimize cross-contamination and support patient safety.

SKILLS

STATA, R, Python, SQL, SAS, Tableau, REDCap, NVivo, ATLAS.ti, EndNote, MS Office
