

DEEKSHITHA CHIKKALA

Bloomington, IN (Open to Relocate) | +1 (812) 360-5172 | chikkaladeekshitha2000@gmail.com | [LinkedIn](#) | [GitHub](#)

Data & BI Analyst with **3+ years of experience** delivering automated ELT pipelines, self-service dashboards, and KPI frameworks using SQL, Python, Power BI, and QuickSight across **education, insurance, and marketing**. Skilled in OLAP modeling, A/B testing, and stakeholder insights to improve forecast accuracy, reporting speed, and decision-making.

EXPERIENCE

Operational Data Analyst Indiana University Bloomington	Dec 2024 - May 2025 Bloomington, IN, USA
- Delivered \$30K+ cost savings monthly and 20% better forecast accuracy by designing QuickSight dashboards for 1000+ daily transactions across categories, channels, and inventory SKUs. - Automated 15 daily reports using Alteryx and Redshift, improving speed by 30% and eliminating manual reporting delays. - Ran A/B experiments and K-means clustering in Python on EC2 to grow revenue by 12% and reduce inventory surplus 15%. - Reduced incident response by 25% by building real-time anomaly alerts using operational logs and QuickSight threshold escalations. - Drove 35% higher dashboard adoption by standardizing KPIs, designing OLAP models, and enabling RBAC-based self-service for 30+ stakeholders.	
Data Analyst Intern Bloom Insurance	May 2024 - Nov 2024 Bloomington, IN, USA
- Increased ETL reliability by 30% by developing alert-monitored SSIS pipelines to process 3000+ insurance claims per day. - Reduced Medicaid reporting risk by 20% by implementing row-level security and enhancing governed data documentation. - Increased SLA compliance by 25% and reduced report latency by optimizing 500+ SQL queries and building 30+ SSRS and Power BI dashboards with DAX measures, used by 30+ business leaders across call center and operations teams. - Designed star schema with fact/dimension tables and semantic layers to support Power BI dashboards, reducing query latency by 40% and enabling consistent cross-report metrics.	
Business Intelligence Analyst Synergy Global IT Solutions	May 2021 - Jul 2023 Hyderabad, India
- Increased marketing ROI by 16% by segmenting 10,000+ customer leads and transactions in Oracle SQL for targeted campaigns and personalized remarketing. - Built Tableau dashboards and automated SLA breach alerts across 10+ marketing and customer service channels, reducing penalties by 40% and boosting executive visibility through 30+ ad hoc and automated reports used across sales regions. - Detected pricing anomalies across 100K+ transactions, preventing \$50K/year revenue loss through rule-based SQL validations. - Created documentation and QA workflows for BI reports, improving onboarding consistency and reducing dashboard errors 30%. - Led time-in-motion analysis using Excel VBA and Python logs, reducing manual analyst task time by 28% through workflow optimization and process streamlining.	

SKILLS

Languages & Libraries:	SQL, Python, R, DAX, VBA, NLP
Databases:	MySQL, PostgreSQL, SQL Server, Oracle, Snowflake, Redshift, DynamoDB
Cloud & Engineering:	Airflow, Spark, dbt, SSIS, Alteryx, AWS (EC2, S3, Athena), Azure
BI & Dev Tools:	Power BI, Tableau, QuickSight, SSRS, KPIs, Excel, Git, GitHub, JIRA, Confluence, Jupyter
Concepts:	Reporting Automation, Star Schema & OLAP Modeling, Self-Service BI, A/B Testing, Ad Hoc Analysis

CERTIFICATIONS

Google Advanced Data Analytics Certificate - Coursera	Jan 2025
SQL Associate Certificate - DataCamp	Nov 2024

ACADEMIC PROJECTS

Real-Time Stock Data Pipeline and Analytics GitHub Python, SQL, DynamoDB, Athena, QuickSight	Apr 2025 - Jun 2025
- Automated sentiment tracking on 500+ records/day using DynamoDB and Athena, reducing pipeline latency by 60%. - Built QuickSight dashboards with Python-triggered alerts and anomaly thresholds to flag stock trend changes in real time.	
Customer Churn Prediction Model GitHub Azure, Spark ML, R, Tableau	Feb 2025 - Mar 2025
- Trained 85%-accurate Random Forest model using Spark ML and R (caret), reducing customer churn by 20%. - Visualized churn risk in Tableau across 5K+ customers, improving retention strategy and increasing engagement by over 15%.	
Scalable ELT Pipeline for Automated Reporting GitHub S3, Snowflake, dbt, Airflow, Power BI	Dec 2024 - Jan 2025
- Improved dashboard data quality and reduced downtime by automating refresh pipelines using S3 and tested dbt models. - Reduced ad hoc data requests by 60% by building reusable Power BI views using fact/dim tables and dbt-modeled star schema, enabling scalable semantic layers and metric consistency.	

EDUCATION

Indiana University Bloomington Master of Science in Data Science, GPA: 3.5/4.0 Relevant Coursework: Algorithms, Statistics, Machine Learning, Data Visualization, Databases, Big Data, Cloud Computing	Aug 2023 - May 2025 Bloomington, IN, USA
Jain University Bachelor of Technology in Aeronautical Engineering, GPA: 3.4/4.0	Aug 2018 - Jul 2022 Bangalore, India
