

Deekshitha Gangam

Data Analyst

Chicago, IL | Deekshita6633@outlook.com | (773) 664-2336 | [LinkedIn](#)

SUMMARY

Data Analyst with 4+ years of industry experience driving impact through data-driven decision-making, advanced statistical modeling, and machine learning. Proven success building scalable ETL pipelines using Apache Airflow, AWS Glue, and Snowflake, delivering reliable insights across enterprise systems. Adept at extracting business value through SQL and NoSQL (PostgreSQL, Oracle, MongoDB, DynamoDB), developing complex queries, stored procedures, and automated reporting. Designed intuitive, executive-ready dashboards using Tableau and Power BI, enabling cross-functional teams to act on real-time insights. Spearheaded A/B testing strategies and data mining techniques to optimize marketing and product initiatives. Leveraged LLMs and Generative AI for NLP-driven automation, enhancing efficiency in sentiment analysis and content generation. Known for translating ambiguous business problems into clear analytical deliverables, with a strong command of Excel, Visio, and stakeholder documentation (BRD, FRD, SRS).

SKILLS

Data Analytics & BI Tools: Power BI, Tableau, Jupyter Notebook, Excel (PivotTables, PowerPivot, Macros), Looker **Programming & Data Mining:** Python, R, SQL (T-SQL, PL/SQL), Java, SAS, data mining, anomaly detection, segmentation strategies **Cloud & Modern Data Stack:** AWS (Glue, Redshift, S3), Azure (Synapse, Data Factory), GCP (BigQuery, Airflow, DBT, Snowflake) **Machine Learning & AI:** Scikit-learn, TensorFlow, Keras, NLP, LLMs, Classification/Regression techniques, Random Forest, KNN, K-Means, Neural Networks, LSTM, CNN **Big Data Ecosystem:** Hadoop, Hive, Pig, Spark Streaming, Kafka, PySpark **ETL/ELT & Pipelines:** SSIS, ETL/ELT, Data Wrangling, Data Cleaning, Dimensional Modeling **Statistical Modeling & Analytics:** ANOVA, Bayesian Inference, Time Series Analysis, Statistical Inference **Documentation & Stakeholder Collaboration:** JIRA, Confluence, GitHub, Bitbucket, SharePoint, Salesforce, BRD, FRD, SRS **Data Governance & Reporting:** A/B Testing, Multivariate Testing, Hypothesis Testing, Risk & Decision Analysis **Databases:** PostgreSQL, MySQL, Oracle, MS SQL Server, MongoDB

EXPERIENCE

Data Analyst | McKinsey & Company

Oct 2024 – Present

- Designed and deployed statistical models and ML algorithms using Scikit-learn, TensorFlow, and PySpark, improving forecast accuracy and accelerating decision-making cycles.
- Automated and scaled ETL workflows with AWS Glue, Airflow, Informatica PowerCenter, and DBT, cutting data delivery times by 30% and ensuring seamless system integration.
- Leveraged LLMs and Generative AI (OpenAI, Lang Chain) for advanced text analytics, sentiment classification, and synthetic data generation, enhancing reporting depth and customer insights.
- Engineered real-time data pipelines with Apache Kafka and Hadoop tools (Hive, Pig), enabling high-throughput streaming analytics and 20% faster data availability.
- Developed interactive Tableau dashboards powered by structured data from SQL Server, AWS Redshift, S3, and Excel, driving executive KPI visibility and product analytics.
- Wrote optimized SQL in Snowflake and Teradata with Python scripting to support automation projects, improving reporting efficiency by 40%.
- Ensured data security and integrity across AWS, Azure, and GCP environments through rigorous backup/recovery protocols and compliance monitoring.

Data Analyst | Avenir Technologies

Jul 2019 – Dec 2022

- Migrated on-prem data infrastructure to AWS and Azure, cutting 30% operational costs and enabling secure, scalable access for global teams.
- Built automated ETL pipelines using AWS Glue and SQL, centralizing data from multiple sources and improving reporting speed by 35%.
- Developed 10+ interactive dashboards in Power BI and Tableau, enhancing KPI visibility and accelerating business decisions for multiple departments.
- Improved SQL performance by optimizing schemas and queries, reducing latency by 50% and cutting report generation time significantly.
- Leveraged LLMs (OpenAI, Azure OpenAI) to generate dynamic report summaries, automate ad-hoc analysis, and reduce insight turnaround time by 40%.
- Automated budgeting and data workflows using Excel, Power BI, and UiPath, saving 25+ hours/month and reducing external dependency by \$120/year.
- Collaborated with 4 cross-functional teams, translating complex data needs into deliverables across 30+ sessions, ensuring timely delivery of analytics solutions.
- Integrated Python (NumPy, Pandas, SciPy, and Matplotlib) for data wrangling and segmentation, boosting analysis accuracy across customer cohorts.

EDUCATION

Master in Information Technology and Management | Illinois Institute of Technology

CERTIFICATIONS

- Microsoft Power BI Data Analyst Associate Certificate
- Google Advanced Data Analytics professional certificate
- Microsoft Azure Fundamentals
- LinkedIn & Microsoft certified: Career Essentials in data analysis
