

Deekshitha Teegala

Full Stack Developer

Texas, USA | +1 832-412-7497 | deekshitha.teegala20@gmail.com | [LinkedIn](#)

SUMMARY:

Java Full Stack Developer with 4+ years of experience delivering secure, high-performance healthcare and SaaS platforms for Cigna, Hexaware, and Hellinex Cloud. Back end: Java 17/Spring Boot, Node.js/Express; front end: React 18, Angular, TypeScript; APIs across REST/FHIR with OAuth2/OIDC, JWT, RBAC for HIPAA compliance. Strong DevOps on AWS (EKS, RDS, S3), Terraform, Docker/Kubernetes, and CI/CD (GitHub Actions, Jenkins) enabling reliable blue-green releases. Data and messaging: PostgreSQL, MySQL, MongoDB, Redis, Kafka, RabbitMQ. Quality & observability: Cypress, Jest, Pact, SonarQube, OpenAPI/Swagger, ELK, Prometheus/Grafana. Delivered outcomes: p95 latency -45%, portal load -50%+, weekly zero-downtime releases at 99.95% uptime, and P0 incidents -30%; adept across SDLC and Agile/microservices to translate product goals into scalable, user-centric solutions.

SKILLS:

Methodologies: SDLC, Agile/Scrum, Microservices, DevOps CI/CD

Languages: Java 17, JavaScript, TypeScript, SQL

Backend & APIs: Spring Boot, Spring Security, Node.js Express, REST APIs, FHIR APIs, API Gateway

Frontend: React 18, Angular, React Query, Redux, HTML5, CSS3

Databases & Messaging: PostgreSQL, MySQL, MongoDB, Redis, Kafka, RabbitMQ

Cloud & DevOps: AWS EKS, RDS, S3, CloudFront, Terraform, Docker, Kubernetes EKS and AKS, GitHub Actions, Jenkins, Azure DevOps

Testing & Quality: Cypress, Jest, Supertest, Pact contract testing, SonarQube, OpenAPI Swagger, unit integration and end-to-end testing

Observability: ELK Stack, Prometheus, Grafana, SLO and alerting

Security & Compliance: OAuth2 OIDC, JWT, RBAC, MFA, rate limiting, encryption in transit and at rest, audit logging, HIPAA

Version Control: Git, GitHub

EXPERIENCE:

Cigna Healthcare, USA

Feb 2025 – Present

Java Full Stack Developer

- Built Java 17 / Spring Boot microservices for claims adjudication with Kafka, Redis, and PostgreSQL added idempotent workflows and async processing, improving throughput and cutting p95 API latency by 45%.
- Implemented FHIR-compliant REST APIs with OAuth2/OIDC, RBAC, encryption-at-rest/in-transit, and full audit trails via API Gateway and OpenAPI/Swagger, meeting HIPAA standards.
- Modernized the React 18 + TypeScript member portal using React Query and lazy loading; improved page load time by >50% and Core Web Vitals across key journeys (claim submit/track, benefits).
- Introduced contract tests (Pact), Cypress/Jest suites, and SonarQube quality gates; raised coverage and reduced production regressions, lowering P0 incidents 30%.
- Deployed on AWS EKS, RDS, S3/CloudFront with Terraform and GitHub Actions (blue/green) moved from ad-hoc to weekly zero-downtime releases, uptime 99.95%.
- Added centralized observability (ELK, Prometheus/Grafana) with SLO dashboards and alerting; shortened MTTR and stabilized peak-time traffic.
- Delivered secure Payer-to-Payer data exchange endpoints and rate-limit policies, reducing manual handoffs and call-center escalations.

Hexaware Technology, India

Oct 2020 – Dec 2022

Full Stack Developer

- Delivered a React telehealth web app (appointments, video consults, records) with Redux state and responsive UI supported hundreds of weekly virtual visits during surges.
- Built Node.js (Express, TypeScript) services for scheduling, identity, and records access integrated WebRTC/Twilio enforced HIPAA controls (RBAC, encryption, MFA, audit logs).
- Automated scale-out on AWS with ALB/Auto Scaling and cached hot reads via Redis, ensuring stable sessions during peak demand.
- Led an Angular portal for an Intelligent Process Automation SaaS drag-and-drop workflow builder, role-based admin, and real-time run-state views.
- Designed Java / Spring Boot microservices with API gateway, service discovery, and mixed storage (MySQL/MongoDB); introduced bulkhead/circuit-breaker patterns for resiliency.
- Established Docker + Kubernetes (EKS/AKS) deployments and Jenkins/Azure DevOps CI/CD with quality gates release cadence improved from monthly to weekly.
- Implemented event-driven jobs with RabbitMQ, scheduled tasks, and idempotent handlers; reduced stuck/duplicate workflow executions.
- Outcomes: virtual-visit drop-offs decreased portal TTI improved 45%; back-office effort cut >40% on automated processes; multi-tenant onboarding for 10+ enterprise clients.

Hellinex Cloud, India

Sep 2019 – Sep 2020

Full Stack Developer

- Built a multi-tenant CRM SaaS Angular front end, Node.js (Express, TypeScript) APIs, PostgreSQL/Sequelize, and Redis caching.
- Implemented secure auth with JWT/refresh tokens, RBAC, and rate limiting; added organization/tenant isolation and usage metering for billing.
- Created admin console dashboards (leads, pipeline, support tickets) with reusable Angular components and charting improved user productivity across sales and support teams.
- Containerized services with Docker and deployed to AWS introduced environment-specific configs and rollbacks.
- Wrote unit/integration tests (Jest, Supertest) and API contracts; stabilized releases and reduced regression issues.
- Performance & reliability: p95 API latency -40%, crash-free sessions 99.5%, infra cost -30% after containerization and right-sizing.
- Business impact: onboarded 5+ client companies (1,000 users), DAU +60%, onboarding time -50% via templates and guided setup.

EDUCATION:

Masters in Data Science | University of Houston, TX, USA

Dec 2024

Bachelors in Computer Science | BV Raju Institute of Technology, Narsapur, India

Sep 2020
