SUMMARY

Business Analyst with 5+ years of experience delivering data-driven solutions in financial services through SDLC, Agile, and Waterfall methodologies. Skilled in business requirements gathering, functional documentation (BRD, FRD, SRS), and cross-functional collaboration across finance, compliance, and IT teams. Proficient in Python, SQL, Excel, Power BI, and Tableau for financial data analysis, KPI tracking, and dashboard development. Experienced in impact, GAP, risk, and cost-benefit analyses to support project justification, regulatory compliance, and operational efficiency. Strong background in Agile project management using JIRA and Confluence, with a consistent record of on-time delivery for high-impact reporting and automation initiatives.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Languages: Python, SQL

Documentation: FRD, BRD, SRS

Project Management Tools: Microsoft Office, JIRA, Confluence

BI & Analytics Tools: Tableau, Power BI, Microsoft Excel

Analysis Skills: Cost/benefit analysis, Impact analysis, GAP analysis, Risk analysis, SWOT analysis

Soft Skills: Problem-Solving, Communication (Verbal & Written), Stakeholder Collaboration, Time Management

Operating System: Windows, Linux

EXPERIENCE

JPMorgan Chase & Co. NJ | Dec 2022 – Current | Business Analyst

- Led end-to-end SDLC efforts for financial application enhancements by gathering business requirements (BRD), translating them into functional specifications (FRD/SRS), and collaborating with cross-functional teams through Agile sprints.
- Conducted impact and GAP analysis for a credit risk assessment system, identifying key process inefficiencies and recommending changes that improved data accuracy and compliance by 20%.
- Utilized SQL and Excel to extract, clean, and analyze large financial datasets, enabling the creation of interactive Power BI dashboards that improved executive decision-making speed by 30%.
- Collaborated with stakeholders from finance, compliance, and IT to define business needs, prioritize backlogs in JIRA, and document project progress on Confluence, improving transparency and accountability.
- Performed cost-benefit and risk analysis for a loan origination automation project, helping justify a \$200K budget approval by demonstrating a projected 35% reduction in manual processing time.
- Developed and maintained Tableau dashboards to track key performance indicators (KPIs) for investment portfolios, enhancing portfolio managers' visibility into performance and risk metrics.
- Demonstrated strong time management and communication skills by coordinating deliverables across remote and on-site teams, leading to a 100% on-time delivery rate for quarterly financial reporting tools.

Freddie Mac | Jan 2020- Nov 2022 | Business Analyst

- Utilized Python and SQL to extract, transform, and analyze financial data from large databases, supporting decision-making with data-driven insights.
- Created interactive dashboards and financial reports using Power BI and Excel to monitor KPIs, identify risk patterns, and present findings to stakeholders.
- Conducted GAP analysis to identify functional inefficiencies between current financial processes and business goals, recommending process optimization strategies.
- Performed Risk Analysis to assess potential financial, operational, and regulatory risks, aiding in mitigation planning and compliance assurance.
- Used JIRA for Agile sprint planning, backlog grooming, and tracking progress of finance transformation initiatives across cross-functional teams.
- Prepared business cases, requirement documents, and status reports using Microsoft Office tools, facilitating communication between business and technical teams.
