

SUMMARY

Dedicated **.NET Developer** with **4 years** of experience in web and client/server application development **using Microsoft .NET technologies**. Proficient in **ASP.NET MVC, ADO.NET, AngularJS**, and skilled in building scalable **3-tier, N-tier, and MVC architectures**. Experienced in designing **XML Web Services, WCF, RESTful services, and Web APIs** for seamless integration. Expertise in **SQL database** management (**Oracle, DB2, MySQL, MSSQL**) and optimizing complex queries.

Well-versed in **Agile (SCRUM, TDD)** and **DevOps practices**, with hands-on experience in version control (**GIT, TFS**) and **CI/CD pipelines** using **Azure DevOps**. Adept at leveraging serverless computing, **microservices**, and cloud deployments for enhanced scalability and performance.

PROFESSIONAL EXPERIENCE

University of Cincinnati, Cincinnati, Ohio

Full Stack Developer

08/2023 – 04/2024

- Web Application & Services Development:** Led web application development using MVC architecture, Razor views, and integrated JavaScript, jQuery, AJAX with ASP.NET & C# for enhanced interactivity and backend efficiency. Implemented web services using SOAP, ADO.NET, XML, and .NET Membership, ensuring secure access and leveraging .NET framework capabilities.
- .Net Core:** Migrated legacy applications to .NET Core, improving performance, cross-platform compatibility, and maintainability. Implemented authentication and authorization using JWT, OAuth, and Identity in .NET Core applications.
- VB.Net & API Development:** Developed VB.Net applications and architected Web API solutions for seamless integration. Enhanced collaboration with Confluence documentation and Azure AD user authentication.
- IT Service Management (ITSM):** Applied ITSM principles to improve incident management and service request handling, ensuring efficient resolution and maintaining high service quality and user satisfaction.
- Microservices & Serverless Architecture:** Designed and developed Microservices to enhance modularity and scalability, utilizing REST APIs for inter-service communication. Developed serverless functions with Azure Functions for automation and optimized resource utilization.
- Performance & Database Optimization:** Optimized application and database performance with query optimization techniques, employed OOP principles, and utilized N-tier architecture, Entity Framework, and advanced LINQ for efficient SQL queries and data management.
- Security & Application Integrity:** Implemented robust security features using .NET Membership for authentication and authorization, ensuring secure access to applications.
- Azure Deployment & Service Management:** Managed Azure App Service deployments for high availability, integrated services using NuGet, and developed RESTful services for external connectivity.
- Node.JS:** Integrated Node.js with databases like MongoDB, MySQL, and SQL Server for efficient data storage and retrieval.

Trigent Software

Full Stack Developer

04/2020 – 12/2022

- Application Development & Architecture:** Led robust application development using MVC architecture, Entity Data Model, and integrated RESTful and WCF services to enhance functionality and interoperability. Developed WCF contracts and classes for improved module interaction and data flow.
- Database & Performance Optimization:** Optimized SQL queries, stored procedures, and triggers in DB2 and PL/SQL for IBM, enhancing database performance and reliability. Implemented APM tools to monitor application performance and diagnose issues, ensuring a high-quality user experience.
- UI Design & Client-Side Development:** Directed UI design, implementing client-side validations with jQuery and JavaScript to optimize form processing and maintain data integrity.
- API & ERP Integration:** Played a key role in the design, development, and documentation of essential Web APIs for seamless integration. Managed ERP integration with APIs and web services, ensuring functionality, performance, and compliance with industry standards.
- Data Manipulation & Business Logic Design:** Employed LINQ for efficient data querying and manipulation. Designed middle-tier business logic and database operations using ADO.NET to facilitate efficient data transactions.
- Debugging & Diagnostics:** Provided debugging and diagnostic support for applications, including Windows Service and SharePoint Integration. Developed SmarTeam user-defined tools via dynamic scripting and created data visualizations with ASP.NET Charts, employing state management and caching techniques to enhance web app performance.
- React.JS and Next.JS:** Developed dynamic, single-page applications (SPA) with React, utilizing its component-based architecture for reusability and maintainability. Developed server-rendered and static web applications using Next.js,
- Code Review, Version Control & CI/CD:** Managed version control, project tracking, and CI/CD pipelines using GIT, Azure DevOps, and Jenkins. Actively participated in code reviews and maintained high standards in build and deployment cycles, incorporating continuous integration and testing with NUnit.
- Agile Project Management:** Managed project workflows with Azure Boards, utilizing Agile (SCRUM) methodologies to streamline task management and sprint planning.
- MangoDB :** Monitored and maintained MongoDB performance, leveraging tools like MongoDB Compass and performance profiler utilities

SKILLS

- Programming Languages:** C#, Java, Python, SQL, PL/SQL, T-SQL, C#.Net, C++, VB.Net,.Net Core
- Web Technologies:** HTML, CSS, Node.Js, React.jsTypescript, Angular, XML, JavaScript, jQuery, AJAX, ADO.Net, JSON, Bootstrap, ASP.NET Charts
- Frameworks:** ASP.Net, ASP.Net MVC, Entity Framework
- Databases:** MS SQL Server, MySQL, Oracle, MongoDB, DB2 in IBM
- Tools:** SVN, TFS, GitHub, SSRS, Crystal Reports, VSS, Docker, Cloud Watch, Postman, IIS, SmarTeam Administration Tools, DevOps board, Crystal Reports
- Cloud Services:** Azure DevOps, Microsoft Azure
- Methodologies:** SDLC, Agile, Waterfall, Scrum
- Version Control:** Git, GitHub
- Operating Systems:** Windows OS
- IDE:** Visual Studio Code, Visual Studio.NET
- Debugging & Diagnostics:** Windows Service Debugging, SharePoint Integration Debugging
- Caching Techniques:** ASP.NET page output caching, Data Caching
- State Management:** ASP.NET client-side (view state, cookies, query strings) and server-side (application state, session state, profile properties)

EDUCATION

- University of Cincinnati | Master’s Degree in Information Technology**  
01/2023 – 04/2024 | GPA - **4.0/4.0**
- Guru Nanak Institution of Technical Campus | Bachelor’s Degree in Computer Science**  
07/2017 – 08/2021 | GPA - **8.2/10**

PROJECTS

StarReZ

- Created stored procedures, views, and automated SQL scripts for database maintenance, deployment, and installation.
- Developed SSRS reports integrated with ASP.NET web applications for on-demand generation.
- Designed user interfaces (Web Forms) using ASP.NET server controls, validation controls, HTML, CSS, Bootstrap, Angular, and jQuery for the front-end ordering system.

Personal Umbrella Policy

- Utilized ADO.NET Entity Framework for data access, ASP.NET Web API for services & LINQ with code-first approach.
- Created web services consumed by AJAX calls on the frontend.
- Participated in full SDLC, including requirements gathering, OO analysis, design, and implementation.

Home Business Insurance

- Developed the presentation layer using ASP.NET Web Forms, including user controls, ASP.NET controls, AJAX controls, and HTML controls. Employed advanced ASP.NET MVC concepts for backend development.
- Followed agile Scrum methodology to design, develop, test, and maintain software in 2-week sprints.

CERTIFICATIONS

- [AZ- 900 Microsoft Azure Fundamentals](#)
- [AZ-104 Microsoft Azure Administrator Associate](#)
- [DP -203 Microsoft Certified: Azure Data Engineer Associate](#)
