## PROFESSIONAL SUMMARY:

Epidemiologist and data-driven public health professional with a background in dentistry, epidemiology, and infection control. Experienced in disease surveillance, outbreak response, health data analysis, and clinical research coordination. Proficient in statistical programming (SAS, R), ArcGIS Pro, and data visualization. Demonstrated success in supporting program evaluation, workforce development, and research initiatives. Adept at translating complex data into actionable insights for public health policy, strategic planning, research and health equity advancement.

---

## EDUCATION:

### Master of Public Health - Epidemiology

May 2025

Saint Louis University, St. Louis, MO

### Bachelor of Dental Surgery

December 2019

Rajiv Gandhi University of Health Sciences, Bengaluru, India

---

## WORK EXPERIENCE:

### Epidemiologist/Public Health Intern

August 2024 - May 2025

#### Saint Louis County Department of Public Health, St. Louis, USA

- Conducted community health data analysis and case surveillance of 2000+ electronic medical records from correctional facilities and generated 10+ epidemiological data-driven reports highlighting trends in diseases, substance use, dental treatment and healthcare gaps.
- Designed 2 SOPs, performance metrics, 2 Qualtrics surveys, and 3 team charters to support workforce development, grant proposal, strategic planning and quality improvement.
- Developed interactive dashboards in Excel, Tableau, and Power BI to visualize substance use, withdrawal risk, and mortality trends for Medical Examiner's Office and Corrections Medicine division.
- Conducted GIS-based spatial analysis and community health assessment to identify healthcare access gaps, inform planning, policy recommendations and design equity strategies for effective public health interventions.
- Evaluated DPH Workforce Development Plan using PHAB Domain 8 standards and presented findings to leadership.

### MPH Student Researcher

September 2023 - May 2025

#### Saint Louis University, St. Louis, USA

- Conducted statistical analyses of real-world evidence (RWE), disease surveillance data and CDC database using statistical methods like Regression Analysis, ANOVA, Chi-square tests and Kaplan-Meier Estimation to identify trends.
- Conducted a comprehensive comparative analysis of oral health systems in the U.S. and India using ArcGIS, Excel, literature review, statistics and policy analysis. Developed an interactive web map, ArcGIS layouts, and delivered a presentation of the findings at capstone symposium.
- Contributed to Community Health Assessment, outbreak investigations and data interpretation for chronic disease, healthcare-associated infections (HAIs), communicable disease and oral health studies.
- Created analytical reports, conducted literature reviews, assisted in project management, presentations and developed dashboards using data visualization software to communicate quantitative findings to diverse audiences.

### Associate Dentist

February 2021 - June 2023

#### Private Dental Clinics, Bengaluru, India

- Managed clinic operations, infection control protocols, clinical assessments, legal and consultative services.
- Diagnosed and treated 300+ patients with diverse oral health needs and preventive care.
- Conducted 20 community outreach events, 10 public health education and tobacco cessation counseling sessions.

### Public Health Coordinator/Medical Officer

April 2021 - February 2022

#### B.B.M.P, Bengaluru, India

- Coordinated field epidemiologic assessments, data analytics, outbreak investigations, risk evaluation, best practices and collaboration with healthcare providers, the community and other stakeholders for effective service delivery.
- Spearheaded smooth operations across 25 health care facilities, supervised a team of 25+ staff that managed South Zone War Room's emergency helpline operations as well as 4 mobile triage units, 3 COVID-19 testing & contact tracing teams at Primary Health Center (PHCs) for effective accessibility of pandemic resources and effective decision-making.

- Supported immunization coverage assessments, identified issues and came up with risk management, technical solutions and recommendations to improve vaccination campaigns that achieved 100% coverage in high-risk areas.
- Delivered public education sessions at schools and health facilities on COVID-19 protocols and vaccinations.
- Managed public health data collection and analysis, test-driven development, status updates, situation monitoring, cluster investigation strategy, healthcare-associated infections (HAIs) and community infection control protocols.

#### **Dental Resident Researcher (Intern Dentist)**

**February 2020 - February 2021**

#### **Krishnadevaraya College of Dental Sciences & Hospital, Bengaluru, India**

- Performed 100+ dental procedures and conducted 10 school-based dental screenings and rural outreach camps.
- Contributed to dental public health research initiatives, analyzing patterns in oral health epidemiology.
- Participated in controlled clinical trials involving vitals and clinical data collection, study implementation, drug development, participant recruiting, consent management, IRB & HIPAA applications and regulatory documentation.
- Mentored and coached junior students on instrumentation, cavity preparation and infection control practices.

---

#### **CERTIFICATES:**

- Certified in Infection Control - American Health Training.
- CITI Program - OSHA Bloodborne Pathogens, Clinical Research Coordinator (CRC), Good Clinical Practices (GCP), Human Research Investigators and Key Personnel.
- Six Sigma Belt Certification - The Council for Six Sigma Certification.
- Certified Dentist - Karnataka State Dental Council.

---

#### **PROJECTS**

- **Bridging the Gap: GIS Analysis of Dental Health Systems in India and the USA (January - May 2025):** Conducted a comprehensive comparative analysis of the oral health landscape in the U.S. and India. Link: <https://arcg.is/OSSOCn0>
- **DIG Trial Data Analysis Using SAS (December 2024):** Conducted statistical analysis of Digitalis Investigation Group trial data using SAS to explore clinical outcomes in heart failure patients. Performed data cleaning & statistical analysis.
- **Cancer Incidence & Mortality Rates in Missouri (December 2024):** Created an interactive and dynamic webpage using ArcGIS maps to explain the incidence and mortality rates of cancer based on healthcare access in Missouri. Link for StoryMap: <https://arcg.is/Xunra>
- **Breast Cancer Literature Review (August - December 2024):** Conducted comprehensive meta-analysis of research papers focusing on risk factors, early detection strategies, and interventions. Synthesized findings on correlation between breast cancer and use of hormone replacement therapy.

---

#### **SKILLS:**

- **Epidemiology:** Outbreak Analysis, Disease Surveillance, Infection Control, Environmental Epidemiology, Medical Record Abstraction, Risk Factor Analysis, Clinical Intervention Planning.
- **Data Analysis & Interpretation:** SAS, R Studio, Excel, Power BI, Statistical Modeling, Electronic Health Records (EHR).
- **Public Health:** Program Planning and Evaluation, Policy Development, Community Health Assessments (CHA), Community Outreach, Public Health Education, Community Health Improvement Plan (CHIP), Surveys.
- **Regulatory & Compliance:** Joint Commission, CDC, HIPAA, OSHA, CDPH, IRB, GCP, IRRC Guidelines.
- **Research Methodologies:** Study Design and Execution, IRB Submissions, Literature Reviews, Clinical Data Management, Clinical Trial Management, Scientific Writing, Scientific Communication, Phlebotomy, Basic Life Support.
- **Quality Improvement:** SOP Development, Root Cause Analysis, KPIs, Process Mapping, Strategic Planning, Quality Assurance, Stakeholder Engagement, Performance Metric Tracking.
- **Geographic Information Systems (GIS):** ArcGIS Pro, ArcGIS Online, ArcGIS StoryMaps.
- **Tools:** Microsoft Office Suite (Excel, PowerPoint, Word), Zoom, Microsoft Teams, Canva.
- **Soft Skills:** Team Leadership, Public Speaking, Organizational Skills, Communication Skills, Detail-oriented, Community Engagement, Decision Making, Problem Solving, Interpersonal Skills, Presentation Skills, Time Management.

---

#### **VOLUNTEER EXPERIENCE:**

##### **Food Outreach, St. Louis, MO**

**March 2024 - August 2024**

- Supported nutrition delivery and food security programs for patients with HIV, cancer, and low-income communities.

##### **Dental Camps**

**June 2019 - June 2023**

- Organized and delivered preventive oral health services for low-income and underserved communities.
