PROFESSIONAL SUMMARY

Pharmacovigilance and adverse event reporting professional with over 5 years of global experience in ICSR case processing, medical device reporting, and regulatory compliance across clinical trial and post-marketing environments. Demonstrated expertise in complaint management, adverse event investigation, and cross-functional collaboration with regulatory authorities. Strong background in quality assurance, CAPA documentation, and regulatory submission support spanning multiple therapeutic areas including oncology, neurology, and cardiovascular diseases. Proven track record in process optimization, audit readiness, and maintaining compliance with FDA regulations including 21 CFR Part 803 and 820.

PROFESSIONAL EXPERIENCE

Medicinal Genomics Corporation

Beverly, MA, USA

Regulatory Affairs Intern

04/2024 - 07/2024

- Drafted formal regulatory request letters and directly liaised with state authorities to advocate for updates to microbial testing standards (Aspergillus, Salmonella, E.Coli, STEC, Yeast and Mold) for cannabis safety.
- Spearheaded the bi-weekly update of the company's Cannabis Microbiological Testing Compendium by analyzing and interpreting regulatory changes across 20+ U.S. states.
- Delivered daily summaries of cannabis regulatory updates to senior management, ensuring compliance with evolving state-level amendments.

Syneos Health

Hyderabad, TG, India

Safety PV Specialist

12/2020 - 04/2023

- Processed 200+ ICSR reports monthly, including spontaneous, solicited, literature-based, and clinical trial cases using Oracle Argus, ensuring accurate MAH verification, duplicate checks, validity, seriousness, causality, listedness assessment.
- Managed medical device complaint intake and evaluation processes, conducting initial review and assessment of device-related adverse events to determine reportability requirements under 21 CFR Part 803 (Medical Device Reporting) and ensuring proper escalation of serious injuries and malfunctions.
- Collaborated with cross-functional teams to develop and implement IRT safety database for case intake and triage, resulting in 25% faster processing time and improved data accuracy in pharmacovigilance procedures.
- Performed comprehensive complaint investigations for medical device reports, evaluating whether devices failed to meet specifications, assessing device relationship to reported incidents, and maintaining separate documentation for MDR-reportable events in compliance with 21 CFR 820.198.
- Trained new hires and cross-functional team members on literature case processing, including regulatory expectations, active moiety rules, and EMA MLM case handling scenarios—resulting in improved case quality, consistency, and audit readiness across teams.
- Performed follow-up triage of incoming reports to accurately identify adverse events and product quality issues, managing ICSR follow-up requests by contacting authors for literature cases and patients, consumers or HCPs as per reporting source.
- Conducted daily reconciliation of case inflow and outflow to ensure accurate tracking and compliance with regulatory requirements, providing end-of-day reports to the manager for review and decision making.
- Conducted peer quality reviews and mentored new PV staff on case processing and system navigation.
- Managed complaint files and documentation for medical device adverse events, maintaining complete records of investigations, corrective actions, and follow-up activities in accordance with FDA Quality System Regulation requirements.

Bioclinica

Mysore, KA, India

Drug Safety Associate

10/2017 - 08/2020

- Performed data entry of various case reports, applying accurate MedDRA coding for adverse events, updating causality and seriousness assessments, and composing well-structured narratives in compliance with regulatory guidelines.
- Processed intake and triage of various case reports, which include business partner cases, pregnancy reports, line listings, and spontaneous/solicited reports, with a 98% quality score in documentation accuracy, demonstrating experience in interpreting ICSR source documentation.
- Managed safety inboxes (vendor and client), including archiving emails, acknowledgments, and document record-keeping, following vendor SOPs and the query resolution process with global study sites. Maintained consistent follow-up on outstanding queries and translation reports to meet regulatory timelines.
- Performed daily triage assignment of incoming pharmacovigilance cases, prioritizing based on seriousness criteria and expedited reporting timelines.
- Supported CAPA documentation, audit readiness, and document archiving activities per regulatory and internal standards.
- Generated and disseminated biweekly RIMS tracker using ArisGlobal LifeSphere, providing cross-functional teams with updated insights on Marketing Authorization Holder (MAH) assignments and current product authorization status across global markets.

SKILLS

- **Pharmacovigilance Tools:** Oracle Argus, ArisG, Veeva Vault Safety, Oracle Empirica Signal, AgXchange
- **Regulatory Frameworks:** 21 CFR Part 11 (Electronic Records and Signatures), ICH E2A/E2B/E2C(R2)/E2F Guidelines, Knowledge of GCPs, GVPs, ICH guidelines, and international regulations., Postmarket Surveillance Studies (21 CFR 314.80, 312.32 and 21 CFR 822) regulations
- **Document Types:** Knowledge of pharmacovigilance ICSR (MedWatch, CIOMS I&II), Aggregate reporting (PADER, PBRER and DSUR) documents
- **Operations:** Case Triage, AE Follow-up, Reconciliation, CAPA Management, Audit Readiness, Standard Operating Procedures (SOPs), Product labeling, Data entry, MedDRA coding, Quality review, Narrative writing, Literature Screening, Benefit-Risk Assessment, Proficiency in Microsoft Office: Word, PowerPoint, Excel

EDUCATION

Northeastern University

07/2023 - 06/2025

Master's, Regulatory Affairs

GPA: 3.9

- Therapeutic Product Development.
- Pharma & Medical Device Law.
- Fundamentals of CMC Regulations and Methods.

Acharya Nagarjuna University

11/2011 - 12/2017

Bachelor's, Doctor of Pharmacy

GPA: 3.5

PROJECTS

Leprosy

Guntur, AP, India

Student

01/2017 - 08/2017

- A Cross-Sectional Study on Beliefs, Attitudes, Misconceptions and Knowledge of Patients & Community towards Leprosy in and Around Rural Areas of Guntur District.

CERTIFICATIONS

- Good Clinical Practice (Issued by NIDA Clinical Trials Network).
- Drug induced liver injury (DILI) (Issued by CIOMS).
- Regulatory Framework for Human Drug Compounding (Issued by Accreditation Council for Continuing Medical Education (ACCME)).
- Post Graduate Diploma in Aggregate Reporting (Issued by Cliniminds).
- Advance Coding (Issued by MedDRA).
