QUALIFICATIONS

- Over 3 years of experience in data analysis, dynamic visualization, and reporting using SQL, Python, Tableau, Power BI, and Looker, delivering actionable insights to drive strategic decision-making.
 - Proven ability to work with product management and engineering teams to gather and refine requirements, validate functionality, and ensure seamless project execution.
 - Successfully managed complex projects with a focus on timely delivery and high-quality outputs, effectively translating technical concepts for non-technical audiences to ensure alignment with business objectives.
 - Strong communicator and problem-solver, utilizing analytics, automation, and visualization to enhance processes, streamline workflows, and support informed decision-making, ensuring technical efforts meet business needs.
-

EXPERIENCE

Research Analyst, [Digital Innovation Lab](#), San Diego, CA

08/2023 – 08/2024

- Coordinated with cross-functional teams, tracking milestones and ensuring timely completion of project deliverables for an AI-driven career development tool.
- Automated the collection of 10,000+ data entries using Python, improving data quality by 25% and identifying key market trends and sentiments. Conducted testing and validation, to ensure accuracy and functionality of automated processes.
- Conducted market research to understand user requirements, ensuring AI career development bot matches user needs. Refined requirements and supported roadmap development for innovative solutions, aligning technical efforts with product objectives.

Quantitative Analyst, [Lavin Entrepreneurship Center](#), San Diego, CA

01/2023 - 11/2023

- Managed and optimized a database of 10,000+ records, improving data accuracy and segmentation by 25%, leading improved targeting and marketing strategies.
- Conducted exploratory data analysis using large datasets to extract trends and user behavior patterns, improving audience segmentation and marketing strategies.
- Developed automated Looker dashboards using Python and SQL, streamlining reporting processes and supporting data-driven decision-making for stakeholders. Documented all FRS and related documentation, ensuring clear communication of system functionalities.

Business Intelligence Analyst, [Diagonal.ai Clients: Bilcare, Tata Cliq](#), Bangalore, India

08/2020 - 06/2022

- Collected and analyzed business requirements across finance, operations, and internal datasets, creating strategic reports that aligned with broader business goals, delivering actionable insights to stakeholders
 - Developed automated dashboards and reports using SQL and Qlik Sense for senior management, improving reporting efficiency by 40%. Led data modelling and transformation to optimize internal processes, resulting in 20% improvement in Operational efficiency and reduced overall costs.
 - Partnered with cross-functional teams to ensure timely resolution of issues, troubleshooting problems, and assisting teams in understanding data-related challenges
-

PROJECTS

Forecasting Future Sales and Customer Trends

09/2023 - 11/2023

- Led sales trend forecasting using Python and R (ARIMA/SARIMA), analyzing historical data to predict future sales, which can improve business decision-making and profitability. Identified key trends and patterns, optimizing business processes for peak seasons and increasing overall performance by 20%.

PowerBI Car Sales Dashboard

03/2023 - 05/2023

- Designed an interactive Power BI dashboard utilizing Power Query for data cleaning and Advanced DAX for complex data modeling. Created critical KPIs such as Total YTD Sales, Average YTD Price, and Total YTD Cars Sold, providing insights into sales trends, pricing, and consumer preferences.
 - Visualizations helped identify YoY growth, MTD comparisons, and regional sales performance, driving targeted marketing strategies and optimizing inventory management.
-

SKILLS

- **Programming Language:** Python (Pandas, NumPy, Scikit-learn, Beautiful Soup), SQL.
 - **Data Visualization:** Tableau, Power BI (Advanced DAX), Excel (Advanced Formulas, PivotTables), Qlik Sense, Looker Studio.
 - **Project Management Tools:** Microsoft Project, JIRA, Trello.
 - **Tools & Technologies:** Jupyter Notebook, Visual Studio Code, Selenium (For Web Scraping and Automation), MS Office Suite, Google Workspace (Docs, Sheets, Drive).
 - **Communication:** Verbal & Written Communication, Project Reporting, Collaboration, Meeting Facilitation, Presentation Skills.
 - **Problem-Solving:** Root Cause Analysis, Solution Development, Critical Thinking, Attention to Detail.
 - **Technical Frameworks & Processes / Project Management:** ETL (Extract, Transform, Load), SDLC, Waterfall, Agile, Scrum.
-

EDUCATION

Master of Science in Information Systems, San Diego State University

08/2022 - 08/2024

Coursework: Statistical Analysis, Data Management, Electronic Business, OOP for Business Applications, Time Series Analysis, Cloud Computing, Entrepreneurship, Financial Analysis, Supply Chain management.
