

DEEPIKA REDDY MADDURI

New York City | +1 551-804-1582 | maddurideepikareddy@gmail.com

SUMMARY

Full Stack Engineer with experience in developing Java-based web applications using Spring Boot, React.js, HTML, and CSS. Proven success in building scalable, secure solutions and resolving critical incidents to enhance platform performance. Demonstrated ability to translate requirements into actionable tasks and collaborate cross-functionally, ensuring efficient delivery of high-quality, user-friendly applications.

EDUCATION

Montclair State University (MSU), Montclair, NJ

Aug 2023 - Dec 2025

Master of Science, Computer Science

- **GPA:** 3.9
- **Coursework:** Computer Algorithms, Software Engineering, Computer Architecture, Computer Forensics, Machine Learning, Computer Forensics, Operating Systems

WORK EXPERIENCE

Accenture

Feb 2022 - Aug 2023

Full stack Engineer

Hyderabad, India

- Engineered scalable solutions across 6+ countries by leveraging Java 8+ and Spring Boot, enhancing platform availability for over 5 million users.
- Translated 100+ stakeholder requirements into actionable tasks using object-oriented programming principles and best practices in Java and JavaScript, improving delivery speed by 25%.
- Diagnosed and resolved 200+ critical incidents through effective debugging and SQL query optimizations, reducing system downtime by 30%.
- Optimized bug resolution turnaround by 40% by integrating automated system tests and refining monitoring tools.
- Facilitated onboarding sessions for 10+ new developers, emphasizing Maven/Gradle practices and maintainable code standards to reduce ramp-up time.
- Initiated the early development phase of a client-critical project, utilizing full-stack expertise with Java, Spring Boot, and React.js to accelerate launch by 15%.
- Collaborated cross-functionally with QA, DevOps, and business teams in an agile environment, achieving shared sprint goals and increasing deployment success rate by 20%.

PROJECTS

Autonomous Multi-Agent System for Real-Time Bargain Detection

- Developed a multi-agent system that scanned 100+ RSS feeds daily, identifying optimal deals using LLM-based price estimations.
- Designed and integrated 7 autonomous agents (planner, scanner, ensemble, messaging) to automate end-to-end deal notifications.
- Built and deployed the system on Modal, achieving response time < 3 seconds for most queries.
- Delivered an intuitive Gradio UI with real-time updates, improving system usability by 35% as reported by test users during feedback sessions.

Multi-Agent Trading with MCP

- Built a multi-agent trading platform using Model Context Protocol (MCP), connecting LLM “Trader” and “Researcher” agents to live market data and account tools, enabling real-time autonomous trade execution.
- Implemented MCP servers for balance/holdings management, buy/sell execution, and live price lookups, handling >500 simulated trades/day with consistent state synchronization.
- Orchestrated LLM agents across OpenRouter, DeepSeek, Grok, and Gemini, improving execution latency by 35% and ensuring 99.9% reliability with tracing and turn-limit safeguards.
- Developed a Gradio dashboard for real-time visualization of PnL, portfolio value, and trade history, achieving sub-second update latency via async streaming.
- Optimized async orchestration and tool-augmented reasoning loops, enabling automated portfolio rebalancing every 15 minutes and 25% higher throughput in multi-agent interactions.

SKILLS

- **Languages:** Java 8+, Python, JavaScript/TypeScript, SQL, HTML/CSS
- **Frontend:** React.js, Next.js, Tailwind CSS, Figma, Angular
- **Backend & APIs:** Spring Boot, Flask, FastAPI, Node.js, REST APIs, WebSockets, JSP, J2EE, JDBC
- **Databases:** PostgreSQL, MySQL, MongoDB, Firebase
- **AI/ML:** TensorFlow, PyTorch, scikit-learn, Hugging Face, OpenAI APIs, RAG pipelines, LLMs, NLP (spaCy, NLTK)
- **DevOps & Tools:** Docker, Jenkins, GitHub Actions, Maven/Gradle, Git, Postman, Kibana, Grafana
- **Other:** Agile, JIRA, Ethical AI, Human-Centered Design, Data Structures, Object-oriented Programming, Master’s Degree
