PROFESSIONAL SUMMARY

A results-driven Data Analyst and SQL Developer with over 4+ years of experience in leveraging SQL, Power BI, and Python to drive data analysis, optimize operational efficiency, and deliver actionable insights. Proficient in strategic decisions, data visualization, statistical analysis, data automation, optimizing decision-making, forecasting, and cost savings while ensuring data integrity.

EDUCATION

Master of Science, Computer and Information Systems

December 2024

Saint Leo University, Tampa, FL, USA

Bachelor of Technology, Electronics and Communication Engineering

May 2017

Balaji Institute Of Technology And Sciences, Warangal, TG, India.

WORK EXPERIENCE

Data Analyst

October 2021 - August 2022

Edge rock Software Solutions Pvt Ltd,

Hyderabad, IN

- Fabricated **SQL queries** for schemas, views, stored procedures, and functions crucial for seamless data migration.
- Generated dynamic Power BI reports to monitor 25+ KPIs, increasing operational efficiency by 20%
- Responsible for creating and changing the visualizations in Power BI reports and Dashboards per the stakeholder's Requirements.
- Optimized order cancellation rates by 3% through data-driven storytelling and insightful dashboarding.
- Automated cost reporting processes using Power BI, reducing manual effort by 10 hours per week and improving real-time decision-making.
- Involved in writing complex SQL queries, creating views, Joins, Constraints, DDL, DML, and functions based on the business requirements.
- Conducted deep-dive analysis on vendor pricing structures and identified areas for cost renegotiation, contributing to a cost savings of \$300K annually.
- Monitored inventory levels through SAP Materials management and controlled out-of-stock metrics.
- Conducted demand forecasting analysis using Python and SQL, improving supply chain efficiency and reducing stockouts for high-demand products.

SQL Developer

Feb'18 – October 2021

Cognizant Technology Solutions,

Hyderabad, IN

- Conducted extensive regression testing, analyzed results, and provided detailed feedback to the development team for continuous improvement
- Developed complex SQL queries, stored procedures, functions, and triggers to support various applications and ensure data integrity.
- Transformed and migrated data from electronic case report forms (ECRFs) to structured database tables using SQL and PL/SQL.
- Mapped functional requirements to detailed workflow processes to ensure accurate and efficient system implementation.
- Executed complex SQL queries for data extraction, transformation, and loading (ETL) processes, providing necessary data extracts in CSV format for business analysis.
- Developed a database application in MS Access, ensuring seamless interaction with SQL tables and stored procedures.
- Performed regular data loading and maintenance routines to keep software packages up-to-date and operational.
- Conducted thorough regression testing, analyzed results, and communicated issues and improvements to the development team.
- Implemented SQL Server monitoring tools to optimize performance and minimize false alarm notifications.
- Collaborated effectively with cross-functional teams to troubleshoot database-related issues and enhance system reliability and performance.

TECHNICAL SKILLS

Data Analysis:

SQL, Python, R, Excel, PostgreSQL, XML

Visualization tools:

Tableau, Power-BI, and Google Studio.

Databases:

SQL Server, Amazon Redshift, and Microsoft Azure SQL server.

Methodologies:

Agile, Lean Six Sigma, MySQL, NoSQL.

Project Management tools:

Asana, Eclipse and Jira.
