SUMMARY

A Skilled Software Engineer with 3+ years of experience in developing scalable web applications. Master's in computer science. Proficient in Python, Java, and JavaScript, with expertise in React, Angular, Spring Boot, .NET Core, and cloud services like AWS and Azure. Skilled in REST/GraphQL APIs, microservices, Docker, Kubernetes, and CI/CD automation.

PROFESSIONAL EXPERIENCE

Software Engineer Intern, Super Intro

Feb '25 – Present

Skills – React.js, Spring Boot, Kafka, AWS Lambda, AWS CDK, Docker, GitHub Actions, GraphQL, Microservices, REST APIs, DevOps

- Built and deployed a real-time transaction platform using React.js, Spring Boot, and Kafka, increasing processing throughput by 60% and improving overall system responsiveness by reducing API latency by 40%.
- Architected and containerized AWS Lambda microservices using CDK and Docker, implementing scalable, fault-tolerant infrastructure with 99.99% uptime in production environments.
- Enhanced data efficiency by integrating GraphQL alongside RESTful APIs, optimizing high-frequency data retrieval and cutting payload sizes by up to 35%.

Software Engineer, Dell Technologies

Jan '24 - Dec '24

Skills – Angular 10+, ASP.NET Core, REST APIs, RabbitMQ, PowerShell, DocuSign, SmartComm, Prometheus, Grafana, SQL Server

- Created dashboards for live clinical trial monitoring using Angular and ASP.NET Core, enabling centralized oversight across 30+ research sites and ensuring full regulatory compliance.
- Automated document generation and participant management workflows by integrating Medidata Rave, CTMS, DocuSign, and SmartComm, saving over 200 manual hours per cycle.
- Restructured backend pipelines into an event-driven architecture using RabbitMQ, and enhanced ETL reliability through PowerShell-based scripting and scheduling.

Software Engineer, ADP Private Limited

Jun '22 - Jul '23

Skills – React.js, GoLang, MongoDB, Kubernetes (EKS), Cypress, JWT, RBAC, RESTful APIs, Microservices, Docker

- Developed a global B2B commerce platform with GoLang and React.js, handling real-time inventory and transactions for over 50,000 users across multiple regions.
- Deployed and managed containerized services using Kubernetes (EKS), with auto-scaling policies and health checks that improved system stability during peak load conditions.
- Established secure access and API layers with JWT authentication and RBAC, and improved test coverage to 92% through Cypress-based automated test suites.

Software Engineer Intern, Zemoso Technologies

Feb '22 - Jun '22

Skills – Vue.js, Flask, PostgreSQL, .NET Core, AWS S3/SNS/SES, Azure DevOps, CI/CD, ETL, Git, Agile

- Reengineered HR and inventory systems using Vue.js on the frontend and Flask/PostgreSQL on the backend, achieving a 75% boost in workflow efficiency and tracking accuracy.
- Migrated legacy logic to .NET Core Web APIs with optimized SQL queries, which resulted in 3x faster execution and significantly reduced system latency.
- Implemented CI/CD workflows with Azure DevOps and integrated AWS services such as S3, SNS, and SES to build event-driven and fault-tolerant deployments.

Software Engineer Intern, ADP Private Limited

Jun '21 - Jan '22

Skills – AngularJS, Spring Boot, MySQL, Redis, Jenkins, Maven, JUnit, Karma, CI/CD, REST APIs

- Conceived and coded 3+ core SaaS modules with AngularJS, Spring Boot, and MySQL, enabling zero-code workflow configuration; this slashed client onboarding time by 4 days per client.
- Reduced data retrieval times by 60% through implementation of Redis caching and database optimization using refined stored procedures.
- Automated Jenkins-based build and deployment pipelines using Maven, streamlining continuous integration and minimizing manual deployment risks.

TECHNICAL SKILLS

Programming: Python, Java, C++, JavaScript, Nodejs, Typescript, Go, C#, SQL

Frontend: React.js, Angular, Vue.js, Redux, React Bootstrap, JavaScript, TypeScript, HTML5, CSS3, SASS, WebSockets

Backend: Node.js, Express.js, .NET Core, Flask, Django, Spring Boot, Go

Database: PostgreSQL, MySQL, MongoDB, MS SQL Server, Oracle, Redis, Elasticsearch

Cloud & DevOps: AWS (Lambda, EC2, S3, CDK, RDS), Azure, Docker, Kubernetes, Jenkins, GitHub Actions

APIs & Messaging: RESTful APIs, GraphQL, RabbitMQ, Kafka, DocuSign, SmartComm, Equifax

Testing & Tools: JUnit, Cypress, Selenium, Postman, Mocha, Jest, JMeter, NUnit, Git, PowerShell

Practices & Platforms: CI/CD, Agile/Scrum, TDD, SDLC, SOLID, Design Patterns, Code Reviews, Visual Studio, VS Code, Jira, Figma

EDUCATION

Masters in Computer Science – University Of South Florida | 3.7/4.0

Aug '23 - May '25

Bachelors in Computer Science – JNTUK | 8.44/10

Jul '18 - May '22
