

Deepthi Pamisetty

Irving, TX, USA | +1 (682) 360-3927 | deepthipamisetty07@gmail.com | [LinkedIn](#)

SUMMARY

- **Data & Business Analyst** with cross-industry experience in **banking, fintech, healthcare, and technology**, delivering data solutions that support compliance, risk control, and business growth.
- Proficient in **SQL, Python, and advanced Excel**, with expertise in **Power BI, Tableau, and Looker** for building ETL workflows, automating pipelines, and creating advanced reporting dashboards.
- Applied **predictive modeling, statistical analysis, and forecasting techniques** to improve decision-making, optimize operations, and support product and pricing strategies.
- Strong background in **data governance, audit readiness, and regulatory compliance** (Basel III, GDPR, HIPAA, CFR Part 11), ensuring accuracy, security, and transparency in analytics delivery.
- Collaborated with **executives, product managers, and cross-functional teams**, translating complex data into actionable insights that drive strategy and operational efficiency.

PROFESSIONAL EXPERIENCE

Data Analyst | JP Morgan Chase & Co. | USA

Jan 2025 – Current

- Consolidated financial and CRM records using **SQL** for extraction, **Python** to streamline validation and reconciliation, and **Excel** for governed reporting, reducing **manual fraud checks by 30%** and supporting Basel III compliance.
- Built ETL workflows in **Spark, Hadoop, and Alteryx** to integrate **disparate banking systems**, accelerating batch processing and enabling near real-time reconciliation for compliance and finance teams.
- Designed interactive dashboards in **Power BI and Tableau**, giving risk and finance teams visibility into liquidity, loan defaults, and market exposure, accelerating executive decision-making **by 20 hours weekly**.
- Developed predictive models in **Scikit-learn** to anticipate delinquency trends across **1.5M accounts**, strengthening risk-adjusted lending strategies and protecting **\$240M in assets**.
- Automated **regulatory data validation** by integrating **AWS (S3, Lambda)** with **Azure DevOps pipelines**, reducing **1,200+ hours** of manual analyst effort annually.

Business Analyst | Airbnb | India

Aug 2022 – Jan 2023

- Analyzed booking funnel events with **SQL (BigQuery, Presto)** and **Python**, using **Excel pivot tables** to visualize drop-offs for UX teams and uncover friction points that drove design changes and reduced checkout abandonment.
- Created **Looker and Tableau** performance reports tracking KPIs on occupancy, cancellations, and revenue per stay, enabling managers to refine pricing strategies and drive **\$18M in incremental bookings**.
- Leveraged **Amplitude and Mixpanel** to track customer engagement across mobile and web platforms, delivering behavioral insights that increased feature adoption rates.
- Implemented **Python-based time-series forecasting models** enriched with market data to support operations planning in **25 cities**, preventing **overbooking incidents**.
- Managed Agile sprint cycles with **Jira and Confluence**, converting stakeholder requirements into analytics features that accelerated product release timelines.

Data Analyst | Dell Technologies | India

Jul 2020 – Jul 2022

- Analyzed global hardware support datasets using **Python, scikit-learn, and SQL** on **PostgreSQL and MongoDB**, processing **20M+ service records** to model warranty claim trends and reduce product return costs by **\$3.2M annually**.
- Constructed **ETL pipelines** with **PySpark, Hadoop, and Apache Airflow**, consolidating logs from 15+ data centers and reducing reporting latency from **48 hours to under 4 hours**.
- Implemented **cost-optimization strategies** by integrating **AWS cost monitoring** usage patterns, reducing annual cloud expenditure by **\$1.1M**.
- Visualized operational KPIs in **Tableau and Power BI**, producing interactive reports on hardware utilization that boosted executive decision-making and reduced manual reporting.
- Optimized **SQL Server warehouses** by designing indexes, applying partitioning strategies, and tuning queries on multi-terabyte datasets, cutting runtimes from minutes to seconds and enabling faster analytics for teams across global regions.
- Directed **Agile delivery cycles** in **Jira, Confluence, and ServiceNow**, coordinating cross-functional analysts and engineers to ensure alignment on deliverables.
- Built cost monitoring solutions by automating data extraction with **AWS Lambda**, analyzing usage in **BigQuery**, and creating advanced **Excel models (pivot tables, macros, scenario analysis)** to deliver audit-ready reports and streamline compliance.
- Collaborated with senior stakeholders and compliance teams to implement **data governance practices**, ensuring adherence to **GDPR and HIPAA** while supporting analytics for **50+ product lines**.

Data Analyst | Cipla | India

Jan 2019 – Jul 2020

- Evaluated clinical trial datasets using **SQL, Python, and Excel**, collaborating with medical teams to validate drug-response outcomes and accelerate regulatory approvals.
- Developed **ETL workflows** with **SSIS, Power Query, and Hadoop** to integrate lab and sales data, improving reporting turnaround from **7 days to 1 day** for compliance audits.
- Visualized pharmaceutical sales trends in **Tableau, Power BI, and Excel**, providing executives with actionable insights that optimized supply chains and increased monthly order fulfillment by **18,000 units**.
- Modeled outcomes with **ANOVA, regression, and forecasting**, predicting drug shelf-life and inventory needs, enabling R&D to refine storage strategies and cut wastage by **₹2.3 crore annually**.
- Standardized **data governance processes** across **SQL Server warehouses**, implementing version control, access rules, and audit logs that ensured accurate reporting and maintained regulatory compliance under **21 CFR Part 11**.

TECHNICAL SKILLS

- **Programming & Query Languages:** Python, SQL
- **Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, TensorFlow, Matplotlib, Seaborn, ggplot2, SciPy
- **Data Visualization & Reporting:** Tableau, Power BI, Excel (Pivot Tables, VLOOKUP, Charts), Amplitude, Mixpanel
- **Databases & Data Warehousing:** SQL Server, PostgreSQL, MySQL, MongoDB, Teradata
- **ETL & Big Data Tools:** Hadoop, Spark, Alteryx, SSIS, Azure Data Factory, Power Query, LIMS integrations
- **Cloud Platforms & Tools:** AWS (S3, Lambda), Azure (DevOps, pipelines), Google BigQuery, Jupyter Notebook, IntelliJ, Git
- **Business Analysis Tools:** Salesforce (CRM/ERP), Jira, ServiceNow, Confluence, Microsoft Visio, PowerPoint
- **Methodologies & Frameworks:** Agile (Scrum, Kanban), Waterfall, SDLC, Data Governance, Time-Series Forecasting
- **Statistical & Analytical Techniques:** ANOVA, Regression Analysis, Hypothesis Testing, Confidence Intervals

EDUCATION

University of Texas at Arlington USA Master's in Computer Science	<i>Jan 2023 – Dec 2024</i>
GITAM School of Technology India Bachelors in Computer Science and Engineering	<i>Jul 2014 – Apr 2018</i>

PROJECTS

Patient Risk Monitoring and Resource Optimization Dashboard

- Orchestrated ETL pipelines with **SQL and Azure Data Factory** to process **2M+ records** from EHR, billing, and staffing systems, consolidating patient and operational data into a centralized warehouse for real-time monitoring.
- Engineered **Power BI** interactive reports with filtering, drill-downs, and automated alerts that tracked bed occupancy across 15 wards and staff availability, while **Python-based risk models** flagged high-risk patients to guide preventive care and reduce unplanned readmissions.

Customer Behavior Analytics & Sales Conversion Dashboard

- Implemented **BigQuery SQL pipelines** to handle **10M+ monthly clickstream and transaction events**, creating unified datasets on customer journeys across web and mobile platforms.
- Delivered **Tableau** visual analytics with product funnel views and applied **Python-based RFM segmentation** to identify **25K+ high-value customers**, driving targeted campaigns and measurable improvements in checkout completions.
