PROFESSIONAL EXPERIENCE

CredibleMind | Mental Health Tech Platform

Jun. 2025 – Aug. 2025

Data & Client Success Analyst Intern

- Analyzed user engagement and mental health outcome data using BigQuery and Mixpanel, identifying trends, behavioral patterns, and high-impact user segments across industries and age groups.
- Conducted exploratory data analysis (EDA) on multi-channel interactions (read, watch, play, assessments) to understand engagement drivers and outcome variation.
- Designed and analyzed experiments to evaluate the impact of content formats, identifying interactive experiences that produced ~39% higher improvement rates and measurable score gains.
- Built analytical datasets and features to track outcome metrics such as score deltas, improvement rates, and engagement signals.
- Defined and monitored key KPIs used for reporting, performance tracking, and data-driven decision-making.
- Produced clear analytical summaries and visualizations to communicate insights to internal teams and client stakeholders.

California Department of Health Care Services | Medicaid Program

Aug. 2024 – Jun. 2025

Project Manager & Data Analyst, Practicum Project

- Cleaned, standardized, and integrated 191 heterogeneous datasets using Python and SQL, improving data quality, consistency, and usability for analysis.
- Performed exploratory and descriptive analyses on utilization, provider, and demographic data to surface trends supporting policy and resource planning.
- Designed relational data models and dashboards to present key metrics and insights for internal stakeholders.
- Supported analytics delivery using Agile workflows, coordinating tasks and timelines to ensure timely completion of analysis.
- Collaborated with policy, analytics, and program teams to define metric definitions and align analytical outputs.

Foxconn Industrial Internet USA - Contractor | Manufacturing

Aug. 2025 – Present

Junior Quality Engineer

- Analyzed large-scale manufacturing data to surface defect patterns and yield risks, informing product and process improvement priorities for internal stakeholders.
- Built and maintained automated KPI dashboards and weekly performance reports in Excel (Pivot Tables, VBA), enabling stakeholders to monitor process risk, defect spikes, and operational stability.
- Translated technical quality insights into executive-ready narratives, aligning engineering, manufacturing, and client teams on corrective actions and delivery priorities.

SELECTED PROJECTS

Smart Product Advisor for Foxconn FIT

- Prototyped a retrieval-based recommendation system using **embeddings and Python** to match items based on technical requirements.
- Designed ranking and relevance logic to improve retrieval quality and reduce manual lookup effort.
- Built lightweight data pipelines to support iteration, evaluation, and refinement of retrieval results.

E-commerce Churn & LTV Modeling

- Built **gradient-boosted (XGBoost)** models to predict customer churn and estimate lifetime value.
- Performed feature engineering, model evaluation (AUC), and error analysis to identify key drivers of churn.
- Developed segmentation logic and analytical outputs to support prioritization and retention decision-making.

EDUCATION

University of California, Davis

San Francisco, CA

Master of Science, Business Analytics

Aug. 2025

University of California, Berkeley

Berkeley, CA

Bachelor of Arts, Data Science(*Business & Industrial Analytics track*)

May 2024

CERTIFICATIONS

Project Management Professional (in progress) | Six Sigma Green Belt (in progress) | Google Project Management | AWS Cloud Practitioner (CLF-C02) | Oracle Foundations (1Z0-1195), AI (1Z0-1122-25), MySQL (1Z0-908) | Microsoft Azure AI-900

SKILLS

Programming & Querying: Python, SQL, R, BigQuery, HTML, CSS, Spark

Statistics & Experimentation: Hypothesis testing, A/B testing, causal reasoning, metric design, cohort analysis

Modeling & Machine Learning: Regression, classification, gradient boosting (XGBoost), feature engineering, model evaluation

Data Systems & Analytics: Data pipelines, data quality checks, dashboards, BI tools (Tableau, Looker, Power BI)

Applied AI: Embeddings, retrieval-based systems (RAG), basic LLM evaluation

Collaboration: Stakeholder communication, documentation, cross-functional collaboration
