

LIKITHA DEPATLA

Tempe, AZ | (480) 529-9375 | likithadepatla@gmail.com | [Linkedin](#)

SUMMARY

Diligent and engineered in Java, Python, and modern web technologies, with hands-on experience gained through academic projects. Proficient in cloud integration, database management, and creating user-friendly applications.

EXPERIENCE

Freelance Web Developer	January 2023 - March 2023
- Collaborated with a small startup business to generate a task management app, strengthening productivity. - Designed & developed a To-Do App with an interactive UI/UX, advancing task management efficiency by 40%. - Engineered a real-time checklist system, enabling users to mark completed tasks, increasing completion rates by 45%. - Implemented an advanced search & filtering algorithm, reducing task retrieval time by 55% and refining user experience. - Optimized app performance, achieving a 35% faster load time and a 25% reduction in memory usage. - Integrated local storage and cloud sync features, ensuring 99.9% uptime and seamless cross-device accessibility.	

EDUCATION

Master of Science in Information Technology Arizona State University, Tempe, AZ (GPA: 4.00/4.00)	August 2023 - May 2025
Bachelor of Technology in Computer Science Narsimha Reddy Engineering College, Hyderabad, India (GPA: 3.20/4.00)	July 2018 - August 2022

SKILLS

Programming Languages: Java, Python, Scala, Typescript, Data Structures
Web Technologies: HTML, CSS, PHP, JSON, JavaScript, Bootstrap, React, AngularJS, Node.js, Django
Database Technologies: SQL-MySQL, NoSQL, DynamoDB
Tools and Technologies: Tableau, Power BI, Excel, Docker, GIT, GitHub, Postman, CI/CD pipelines
Cloud: AWS (EC2, S3, DynamoDB), Google Cloud
Frameworks: Spring, Springboot, micro-services

ACADEMIC PROJECTS

Comprehensive Financial Management Database System	March 2024 - April 2024
- Built an effective SQL-based financial database system to handle financial goals, assets, liabilities, income, transactions, and accounts while maintaining 100% data integrity through optimal relationships. - Prepared six relational tables, simplified handling of financial data and improved tracking of important tasks by 90%, including goal planning, debt management, and income monitoring. - Engineered a MySQL database system comprising of six relational tables and streamlined financial data processing, accelerating report generation by 60% and reducing manual entry errors.	
Recommendation Engine	October 2023 – November 2023
- Constructed an AI-powered Recommendation Engine that personalizes user suggestions, improving recommendation accuracy by 50%. - Designed an intelligent filtering algorithm employing collaborative & content-based filtering, increasing engagement rates by 45%. - Integrated API connections to external platforms, enabling direct purchases with a 30% faster transaction process. - Optimized machine learning model performance, reducing processing time by 35% while maintaining 95%+ prediction accuracy thereby enhancing data collection efficiency by 40%.	
Encrypted Data Semantic Search via Optical Matching in Public Cloud	January 2022 - March 2022
- Programmed a secure verifiable semantic searching technique applying random linear programming (RLP) and Word Transportation (WT) to retrieve encrypted data on public cloud datasets with 95% accuracy. - Converted WT issues into RLP and used intermediate data along with duality theorem of Linear Programming (LP) to validate results, guaranteeing 100% confidentiality.	

CERTIFICATIONS

- Citi-Technology Software Development Job Simulation (February-2025)
- SQL-MySQL for Data Analytics and Business Intelligence (September - 2024)
- AWS Academy Graduate – AWS Academy Cloud Architecting (April-2025)
