SUMMARY

Experienced Data Analyst with 3 years of experience delivering actionable insights by transforming raw data into meaningful visualizations and predictive models. Adept at extracting and processing large datasets using SQL, Python, and cloud platforms like Azure and AWS, while building dynamic dashboards in Tableau and Power BI to support business decision-making. Skilled in statistical modeling, risk analysis, and data storytelling, with a strong focus on financial and insurance domains. Collaborates cross-functionally with stakeholders, engineers, and analysts to drive data-driven strategies and streamline reporting workflows.

SKILLS

Data Extraction & Querying: SQL, Azure SQL Database, Snowflake, AWS Athena, Structured Querying, Joins & CTEs

Data Manipulation & Processing: Python (Pandas, NumPy), Excel (Pivot Tables, VLOOKUP, Conditional Formatting), Jupyter Notebook

Data Visualization & BI Tools: Tableau, Power BI, Matplotlib, Seaborn, KPI Dashboards, Interactive Filters

Statistical Analysis & Modeling: Logistic Regression, Risk Scoring Models, Variance Analysis, Portfolio Volatility

Cloud Platforms: Azure Data Factory, Azure Synapse, Azure Blob Storage, AWS Lambda, AWS Glue

Data Warehousing: Snowflake, Azure Synapse Analytics, Cloud-based Storage & Access Control

Reporting & Documentation: JIRA, Jupyter Notebook, PowerPoint for stakeholder reporting

Domain Knowledge: Insurance Analytics, Financial Risk Analysis, Credit Scoring, Loan Default Detection

EXPERIENCE

AIG, USA

Data Analyst

Feb 2025 – Present

- Collaborated with the claims and underwriting teams to analyze large volumes of travel insurance claim records and customer data hosted in Snowflake, using SQL and Python to uncover region-wise risk and policy abuse patterns.
- Designed and implemented automated data pipelines on AWS using AWS Glue and AWS Lambda to extract, transform, and load historical claim and customer data into Snowflake for cross-team reporting and advanced analytics.
- Built interactive dashboards in Tableau and Power BI to visualize claim trends by destination, seasonality, and customer demographics, enabling leadership to spot fraud signals and improve pricing strategies across regions.
- Conducted deep dive analysis using Pandas and Excel to clean, validate, and aggregate multi-source data, helping identify fraudulent behaviors and reduce false payouts through insight-driven reporting shared with the fraud prevention unit.
- Developed a dynamic risk scoring framework by integrating internal claim trends with third-party risk indicators via APIs, streamlining the claims review process and assisting underwriters in making data-backed policy decisions.

Aplus Datalytics, India

Data Analyst

Feb 2021 – Jul 2023

- Extracted and cleaned multi-source investment and loan records from Azure SQL and Snowflake to enable asset exposure and borrower default analysis for financial institutions using the FinSecure360 and CreditPulse Insights platforms.
- Conducted risk segmentation by analyzing historical investment volatility, borrower repayment behavior, and credit utilization using Pandas, Seaborn, and Excel for generating data-backed client profiles.
- Designed predictive models using Scikit-learn to flag high-risk portfolios and potential defaulters, helping NBFC clients implement preventive credit strategies and reduce overdue repayments.
- Built Azure-integrated data pipelines and automated scheduled reports through Azure Data Factory and Logic Apps to support recurring audits and enhance financial advisory workflows.
- Developed Tableau and Power BI dashboards to visualize asset distribution, loan default hotspots, and client-specific performance metrics, improving decision-making across advisor and underwriting teams.
- Created dynamic risk scoring frameworks by merging internal finance data with external credit ratings, assisting stakeholders in rebalancing investments and restructuring loans proactively.
- Collaborated with cloud and analytics teams to deploy models and dashboards on Azure Synapse and Blob Storage, ensuring secure data access and enabling faster insights delivery across cross-functional units.

EDUCATION

Masters in Data Analytics and Information Systems

May 2025

Texas State University, USA

B Tech in Electronics and Communication Engineer

Jun 2021

Amrita Vishwa Vidyapeetham, India

CERTIFICATES

- **Google Data Analytics Professional Certificate**
- **Introduction to Tableau – Coursera**
- **Machine Learning for Business – Coursera**
- **AI for Marketing – Coursera**
