Summary

Software Engineer with a strong foundation in computer science and engineering, specializing in full-stack development. Proficient in creating dynamic and responsive web applications using modern technologies such as React, Node.js, and MongoDB. Experienced in building role-based applications, integrating third-party APIs, and ensuring secure and scalable solutions. Passionate about problem-solving and continuously learning new technologies to enhance user experience.

Education

Ahmedabad University

Bachelor of Technology in Computer Science and Engineering (GPA: 2.67 / 4.00)

Expected May 2026

Ahmedabad, Gujarat

Projects

Keptit - the storage solution | Next.js, React.js, TypeScript, Appwrite, ShadCn, Tailwind CSS

[Link](#)

- Designed and developed a modern UI/UX cloud platform for storing, organizing, and accessing documents, images, and media.
- Integrated login and signup with otp functionality using **Appwrite**.
- Implemented real-time file upload tracking with visual progress indicators for enhanced user feedback.
- Integrated features like **search, filter by date/type and categorized navigation** for seamless file browsing.
- Implemented features of **file management functionalities** like rename, details, share, delete, download.

LSPD Website(WMC 5.0) | React.js, Express.js, Node.js, MongoDB, face.api.js

[Link](#)

- Built a role-based web application for a fictional police department, providing a secure and user-friendly platform for both the public and administrators.
- Implemented core features such as a Most Wanted List, anonymous crime tip submission, and news and announcements management.
- Integrated a **face recognition API** for matching suspect images against the most wanted list, enhancing user interaction and functionality.
- Ensured responsiveness and accessibility using **React.js** with **Material UI**, and deployed the project on **Vercel** with a **MongoDB Atlas** database.

Real-time Chat Application | React.js, Express.js, Node.js, MongoDB, Material UI

- Implemented WebSocket communication with **Socket.io** for instant messaging and live updates across clients.
- Integrated user authentication and authorization using **JWT** and **bcrypt** for secure access and data protection.
- Added **real-time notifications** to alert users of new messages, mentions, and other key activities within the chat.
- Incorporated a **search and filter** functionality to help users easily find previous conversations, contacts, and chat groups.

Technical Skills

Languages: C, C++, JAVA, Python, JavaScript, TypeScript, Golang, SQL,

Technologies: React.js, Next.js, Express.js, Bootstrap, Node.js, TailwindCSS, Material UI, ShadCn UI, MongoDB, Appwrite, MySQL

Developer tools: Postman, VS Code, Git, GitHub

Certifications & Activities

Udemy Backend Development: NodeJS, ExpressJS, MongoDB & More - The Complete Bootcamp

[Link](#)

- Completed 42 hours backend development course from Udemy with the Instructor Jonas Schmedtmann.

Ingenious Hackathon 6.0

Mar'25 – Mar'25

- Participated in Ingenious Hackathon 6.0 organized by Ingenium and IEEE together. We developed a project related to Blockchain.

Website Making Competition (WMC) 5.0

Jul'24 – Aug'24

- Participated in Website Making Competition 5.0 for the Hard Problem Statement and developed all features given in that.
