

Devamani Papani

Analyst

+1 (720) 291-6273 | devamani.hveg@gmail.com

SUMMARY

- Experienced Analyst with 4+ years across Industry, skilled in SQL, Python, and data visualization with Power BI and Tableau. Proven ability to extract actionable insights, build ETL pipelines, and drive data-informed decision-making.
- Proficient across the entire Software Development Life Cycle spectrum, adeptly handling System Investigation Analysis, Design, Development, Testing, and Deployment phases.

SKILLS

Languages: SQL, Python, R

Data Visualization Tools: Tableau, Power BI

Documentation: FRD, BRD, SRS, User Stories

Database Management: Oracle, MS SQL Server, PostgreSQL

Data Modeling & Transformation: ETL processes, data pipelines

Project Management Tools: MS Project, MS Office, MS SharePoint, MS Excel

Tracking/Other Tools: Jira, MS Visio, HP Quality Center, JAD, UAT

Analysis Skills: Cost/Benefit Analysis, Impact Analysis, Risk Analysis, SWOT Analysis, GAP Analysis, Cohort Analysis

EXPERIENCE

Northern Trust, USA | Jan 2024 - Current

Business Analyst II

- Led the development and optimization of data models and ETL pipelines to streamline data processing, report generation time by 40%.
- Designed and implemented complex data pipelines using HTML, CSS, SQL, Python, and automated workflows, ensuring data integrity and consistency across multiple reporting platforms.
- Collaborated with Project Management Office (PMO) and Subject Matter Experts (SMEs) to document comprehensive UAT test cases.
- Created dynamic dashboards in Tableau and Alteryx, Power BI, providing insights on KPIs for executive and management teams. Collaborated with stakeholders to refine dashboard requirements, resulting in a 20% improvement in report and to business needs.
- Worked with Salesforce, Workday, and Blackbaud Financial Edge NXT to ensure seamless integration with client systems. Experience integrating ERP systems like SAP with other tools such as JIRA and MII to enhance data flow and streamline operations.
- Engaged with risk management processes, enhancing understanding and mitigation strategies for operational challenges. Designed and implemented management reporting dashboards, improving visibility into key business metrics.
- Proven ability to participate in all stages of the SDLC, including requirement analysis, design, development, deployment, and maintenance.

Softura Technologies, India | Jan 2019 - Jan 2022

Business Analyst

- Conducted in-depth data analysis to support strategic business decisions, improving data accuracy and reporting efficiency by 30%.
- Built and optimized SQL scripts and Python scripts for data extraction and transformation, automating routine data processes and improving data accessibility. Reduced manual data processing time by 50% through automation, significantly enhancing efficiency.
- Authored and executed detailed UAT test cases, identifying defects and ensuring timely resolution to maintain software quality. Developed regression test cases for future automation, streamlining testing processes and improving efficiency.
- Leveraged JIRA for test case management, defect tracking, and seamless team communication. Supported hands-on test case writing, execution, and defect reporting, ensuring adherence to project timelines and deliverables.
- Hands-on experience in implementing, configuring, and maintaining ERP systems, with a strong focus on SAP modules related to manufacturing and order-to-cash processes.
- Utilized data visualization tools, such as Power BI, create insightful dashboards and enhance reporting capabilities. Utilize SCRUM/KAN-BAN methodologies to manage multiple projects and ensure timely delivery of solutions.
- Pioneered developing and implementing a problem-solving framework within the team, empowering members to autonomously tackle challenges and fostering a proactive culture geared towards effective issue resolution.

EDUCATION

Master's in Business Analysis | University of Colorado, Denver, USA

May 2024

Bachelor of Computer Applications | Sri Venkateswara University, India

May 2019
