Summary

• **4+ years of experience** with companies and projects • **AI-driven problem solver**, delivering customer-focused solutions and improving software quality • **Effective communicator and team player** with a business-oriented mindset and project management skills • Believe in **driving impact and making life easier** with full-stack skills to build user-centric products

Education

Northwestern University

Master of Science in Information Technology - GPA: 3.77/4.0

December 2024

Evanston, Illinois, United States

Sardar Vallabhbhai Patel Institute of Technology

Bachelor of Engineering in Information Technology - GPA: 3.2/4.0

June 2022

Vasad, Gujarat, India

Skills

Programming Languages: Java, Python, JavaScript, Typescript, C

Frameworks: React, Next.js, NestJS, React Native, Spring Boot, Angular, Express, NodeJS, Bootstrap, Django

Databases: MySQL, MongoDB, PostgreSQL, Firebase

Cloud Services: AWS (S3, API Gateway, Secret Manager, Lambda, RDS, EC2), Google Cloud Platform

Developer Tools: CoPilot, Pieces AI, ChatGPT, GitLab, Kubernetes

Experience

Sigma Solve, Florida, United States

March 2025 – Present

Full Stack Engineer

- Addressed visibility gaps in global dental lab operations by developing secure real-time end-to-end platform resulting in 65% faster processing, 100% shipment traceability, and dramatic reduction in delivery errors.
- Faced rapidly changing client needs leading to direct communication with client and product owner, and translate feedback into agile sprint deliverables and production deployments resulting weekly on-time releases, zero feature rollbacks and 40% faster delivery cadence.
- Engineered complex modules for case-product linking, billing workflows, accounting integration, and automated label/sticker generation - streamlining operations and reducing manual overhead by 70%.

Superstars: Professional Network, New York, United States

October 2024 – December 2024

Software Engineer Intern

- Drove user-centered design improvements in Figma to elevate UI/UX, boosting user satisfaction by 20% and cutting usability issues by 15%.
- Engineered high-performance front-end features using Angular, HTML, CSS, and JavaScript, seamlessly integrating APIs with Postman and leveraging AI-powered code reviews to accelerate load speeds by 30% and reduce data errors by 25%.
- Optimized Agile development cycles with strategic, data-backed feedback and AI enhancements, slashing project completion time by 15% and achieving stronger alignment with sprint goals and user expectations.

AtliQ Technologies, Gujarat, India

January 2023 – August 2023

Software Engineer

- Contributed to "Share the Church" React Native app that was downloaded 50+ times from the App Store
- Integrated advanced features using ParseJS, AWS, RNCallKeep, and Zoom SDK for in-app call support and automatic crisis detection with a 90% accuracy rate in a Mental Wellness App called Wellness Empowered. Prioritized user safety and proactive intervention, leveraging technology for mental health support by using LLMs for idea and edge case generation.
- Orchestrated the successful execution of the company-wide Annual Town Hall Meet 2023, leading a team of 4 in event planning, organizing logistics, and delivering an engaging and impactful experience, attended by 70+ employees.

Helios Solutions, Gujarat, India

January 2022 – August 2022

Full Stack Engineer Intern

- Complete software life cycle development of an advanced Dashboard and Analytics system for Project and Personnel Management utilizing Spring Boot, Angular, Bootstrap, and MySQL, resulting in a 25% reduction in manual reporting efforts and a 20% decrease in database access time, empowering stakeholders with faster real-time data insights and enhancing user experience.

Projects

Tag | React, AWS, R

May 2024

- End-to-end development of CRM for personal network management providing network analysis using models like ALAAM, ERGM.
- Provide visualizations and analytical insights on relationships causing 20% increase in relationship management and new ties.

Wildcat Spotlight | React, Firebase

April 2024

- Increased engagement by 30% after end-to-end launch of an event sharing webapp for university student groups.

Mood Based Music Recommendation System @ DevanshiPatel18/melomanie | AWS, Angular, Spotify API

December 2023

- Led SDLC of an innovative web platform transforming music recommendations to align with user mood with 5 user inputs.
- Used Pieces AI SDLC tool for automated unit-test generation and code completion to achieve 20% increase in efficient software testing, deployment rates, and code documentation and 10% reduction in code-smells.
